18:28 <@sup_g> sup big dawg
18:30 <&Sabu> chillin fams
18:30 <&Sabu> miss your ass
18:30 <&Sabu> been busy working over the holidays
18:30 <&Sabu> trying to make $$ for the fam
18:30 <&Sabu> I saw part of the logs with this kid disco throwing my name out
like a namefa
18:31 <&Sabu> basically my nigga we'll either kill the channel itself and
separate ourselves from those newbies
18:31 <&Sabu> and bring the revolusec with us
18:31 <&Sabu> or something
18:31 <@sup_g> I like the revolusec people
18:31 <@sup_g> I wasn't aware that they were that organized and also skilled
18:33 <&Sabu> yeah
18:33 <&Sabu> they're good money when it comes to organization
18:33 <&Sabu> they've also graciously hooked us up with like 90gb of syrian
government emails
18:35 <@sup_g> it could be strategic to keep using some of these cabincrew people
18:35 <@uid0> we could move to silcd for inner circle and stay here for keeping
in touch with cabincrew.
18:35 <@sup_g> to do more public shit
18:38 <&Sabu> eah
18:38 <&Sabu> yeah
18:38 <&Sabu> silc sounds good for core. issue is we kind of want to still work
with revolusec guys
18:39 <&Sabu> so it'll taint our silc to bring them over
18:39 <@sup_g> yeah maybe we can keep it separate for now
18:40 <@sup_g> still strategizing for this upcoming shit
19:03 <&Sabu> yup yup
19:08 <@sup_g> comments on #antisec ... ?
19:16 <~elChe> ohah Sabu
19:19 <&Sabu> hi
19:22 <~elChe> Sabu yesterday we brought biella and quinn norton
19:22 <~elChe> to promote xmas
19:24 <&Sabu> very cool
19:24 <&Sabu> biella, rocks
19:26 <@uid0> Quinn is on our side too. At least I got that impression.
19:29 <&Sabu> yeah
19:30 <@sup_g> yes
19:30 <~elChe> yep she is
19:30 <@sup_g> to some degree, anyway
19:30 <~elChe> biella and her were talking offline
19:30 <@sup_g> it's a good idea to let some reporters in on some data so they can
more accurately parse it ahead of time for the article
19:30 <~elChe> Sabu u should ping parmy perhaps
19:31 <~elChe> so we got some forbes financial times shit
19:31 <~elChe> get*
19:32 <&Sabu> I'm talking to her now
19:32 <&Sabu> what do we need?
19:32 <&Sabu> bitch just went offline as you said that haha
19:32 <~elChe> lol
19:34 <~elChe> hm
19:34 <~elChe> silcd should be for us we cant risk it
19:34 <~elChe> like happened with fake palladium
19:35 <~elChe> we can use channels here to talk to other ppl
19:41 <&Sabu> yup

22:39 <~elChe> guise
22:39 <~elChe> http://en.wikipedia.org/wiki/List\_of\_Bank\_Identification\_Numbers
22:39 <~elChe> your cheatsheet
22:40 <@sup_g> can we test some of these CCs?
22:40 <@sup_g> sabu said some are bad?
22:42 <~elChe> bad?
22:42 <~elChe> hows taht?
22:42 <~elChe> like faked
22:42 <~elChe> or like expired
22:43 <~elChe> we should start testing this weekend
22:43 <~elChe> not yet
22:43 <~elChe> bank billing cycle not closed yet
22:44 <@sup_g> like didn't work bad
22:44 <@sup_g> it's not fake, the data is def legit
22:45 <~elChe> we need to check this out
22:45 <~elChe> cause it would mean someone snitched
22:45 <@sup_g> well, it could also be because they discovered the breach and
notified the credit card corporations.
22:46 <@sup_g> Except that would be in the news and shit, how you gonna keep
notifying all them clients and be quiet about it?
22:50 <@sup_g> I'm gonna try backdooring su or sudo to see if we can get some
cleartext root passwords, and hopefully they double for the other servers.
22:52 <~elChe> ok
22:53 <~elChe> we could start checking cards this friday
22:53 <~elChe> if they r all bad that mean someone snitched
22:53 <~elChe> i dont buy the shit about they notified the banks
22:54 <@sup_g> they couldn't possibly all be bad
22:54 <@sup_g> yeah I bet they would want to try to keep that shit quiet, under
wraps
22:54 <@sup_g> because obviously there would be a lot of mad high profile clients
22:54 <~elChe> too many to notify all of them
22:55 <~elChe> without getting some news about tit
22:55 <~elChe> hm
22:55 <@sup_g> yes
22:55 <@sup_g> well I can try running a card or two now
22:55 <@sup_g> to test
22:55 <~elChe> try to parse the card and filter those still not expired
22:56 <@sup_g> yep
22:56 <~elChe> we ll start friday going hard just in case
22:56 <~elChe> we got nothing
22:58 <@sup_g> any quick and fast online store to test against?
23:03 <@sup_g> gonna try buying some pop tarts
23:03 <~elChe> eff
23:03 <~elChe> or buy ukash online after register some fake email
23:04 <~elChe> hm we should check this weekend those posted on antisechan
23:04 <~elChe> if they r not working
23:04 <@sup_g> any enemies we want sent pop tarts?
23:04 <@sup_g> it's impossible that all aren't working
23:04 <~elChe> it would seem someone burned them
23:05 <~elChe> i saved those posted on the channel
23:05 <@sup_g> also it is unknown how many and which have been used by h and crew
already
23:05 <~elChe> to verify if some of us fucked them
23:05 <~elChe> before time
23:07 <@sup_g> clever
23:07 <@uid0> sup_g: h never showed up again after finding these ccs, right?
23:07 <~elChe> nop
23:08 <~elChe> but he declared he ll be off for some days too
23:08 <~elChe> so we r not sure what s up
23:08 <@sup_g> I did talk to him a day after
23:08 <@sup_g> and worked on the boxes for a minute
23:08 <@sup_g> but wicked says him disappearing for days is not unusual
23:08 <@uid0> k
23:09 <~elChe> but its possible he s trying to sell the lot to russians
23:09 <@sup_g> the lot??

```

```

#lulzxmash.log
23:13 <~elChe> i mean the whole bunch
23:14 <~elChe> hm
23:14 <@sup_g> he wouldn't sell ALL of em
23:14 <~elChe> can u upload 5 or 4 of them, already parsed, to cz
23:14 <~elChe> i ll check also
23:15 <~elChe> i ll try to get ukash with some faked account
23:15 <@sup_g> To increase the security of online transactions, all the major
credit and debit card providers have introduced additional checks called
3D-Secure (like an online version of Chip and PIN). You have chosen to use a card
that is part of the 3D-Secure scheme, so you will need to authenticate yourself
with your bank in the section below.
23:15 <@sup_g> for real?
23:15 <@sup_g> time to check another card I guess
23:16 <~elChe> lol
23:16 <@sup_g> Easier for me to paste via jabber than to login to shell
23:16 <~elChe> ok
23:16 <~elChe> i m logged
23:24 <~elChe> hm check this one
23:24 <~elChe> Cyber_war_News CWN
23:24 <~elChe> Specialforces.com hacked, Agents accounts details leaked by
@Abhaxas bit.ly/tstSxI #anonymous #antisecc #news #infosec
23:24 <@sup_g> WTFEEEEEE
23:24 <@sup_g> =( =(
23:25 <@sup_g> that was our target
23:25 <~elChe> well, there has been another big dump of email accounts from MANY
federal agency's, police agency's, the air force and many other places. The
attack comes from @Abhaxas.
23:26 <~elChe> The leak comes from specialforces.com a website shop that
specialize's in tactical equipment and gear for Military, law enforcements,
special forces etc.. The leak contains 18244 accounts, If you take note of the
last column you will see that many of them belong to certain agency's.
23:26 <~elChe> Most of the accounts have the officers names, emails and passwords
and as we have seen in the past many of these officers tend to use the same
passwords over and over which makes it easy for people to start digging around a
bit further...
23:26 <~elChe> leak: [REDACTED]
23:26 <@sup_g> I had to own that server to steal the encryption keys and wrote
the scripts to mass parse and decrypt them to get those damn passwords.
23:27 <@sup_g> That's OK though. This just means we can put the specialforces
rootlog in our zine =>
23:27 <@sup_g> Fuck, maybe even dump the CCs.
23:27 <~elChe> we should use those CCs before they got fucked
23:27 <~elChe> or if not we should post them now
23:28 <~elChe> for lulzxmash
23:28 <@sup_g> well the thing about it is
23:28 <@sup_g> no CVV
23:28 <~elChe> hm
23:28 <@sup_g> It will still cause mass mayhem.
23:28 <@sup_g> Also, we have the addresses. He doesn't have them in this
LE_leads.txt.
23:30 <~elChe> hm yeah
23:30 <@sup_g> did he post a statement?
23:30 <@sup_g> or just the u/p list
23:30 <@uid0>
http://www.telegraph.co.uk/news/uknews/crime/8949060/Police-to-test-laser-that-bl
inds-rioters.html
23:32 <~elChe> ohshit
23:32 <~elChe> uid0: need your help
23:32 <~elChe> can u test some cards?
23:33 <@uid0> elChe: what up?
23:33 <@uid0> sup_g: where did he get it from?
23:33 <@uid0> elChe: Uhm, I'm not really familiar with carding.
23:33 <@sup_g> uid0: long story about this actually
23:33 <@sup_g> i'll write about it for the zine
23:34 <@sup_g> but long story short, he was able to get mysql dumps for their
site
23:34 <@sup_g> which contained blowfish encrypted passes and CCs
23:34 <~elChe> do u want to answer it?

```

```

                                #lulzxmas.log
23:34 <@uid0> elChe: But I can try if you tell me what to do. ^^
23:34 <@sup_g> I re-owned and rooted their server
23:34 <@sup_g> and grabbed the encryption keys back again
23:34 <~elChe> saying 'thanks abhaxas we ll post the rest u didnt find it'
23:34 <@sup_g> as well as their massive mail spools
23:34 <~elChe> lol
23:35 <@sup_g> dropping the CCs will only enhance the mayhem
23:35 <@sup_g> especially cause we got an FBI home address + card
23:36 <~elChe> ok
23:36 <~elChe> but well do it for Xmas then
23:36 <~elChe> just 10 days to wait
23:36 <@sup_g> yep =)
23:37 <@sup_g> this will be a thick ass zine
23:37 <@sup_g> lots of rootings
23:39 <@sup_g> testing a card now
23:39 <~elChe> https://pastee.org/██████
23:40 <~elChe> nolulz
23:40 <@sup_g> what's that?
23:40 <~elChe> check waht got when tried to use one card on ukash
23:41 <@sup_g> error?
23:41 <~elChe> lol
23:43 <@sup_g> You have entered an invalid number or partial credit card or debit
card number. Please check your entry and try again.
23:44 <@sup_g> with the first one I tried.
23:48 <@sup_g> That card number is already assigned to another PayPal account.
For security purposes, each card may only be assigned to one PayPal account. If
you have already opened a PayPal account, please retrieve the relevant

23:51 <~elChe> hm what about openning an itunes account
23:51 <~elChe> and buy lots of gift card
23:51 <~elChe> then we just release the codes
23:52 <@sup_g> That card number is already assigned to another PayPal account.
For security purposes, each card may only be assigned to one PayPal account. If
you have already opened a PayPal account, please retrieve the relevant

23:52 <@sup_g> but it again
23:52 <@sup_g> hrm.
23:53 <@sup_g> *got it again
23:53 <@sup_g> maybe these cards are legit
23:53 <~elChe> well if paypal detected it
23:53 <@sup_g> I give up on checking cards for now.
--- Day changed wed Dec 14 2011
00:11 <~elChe> agh theres some system asking for another passwd for online
00:12 <@uid0> Another passwd?
00:15 <~elChe> yep
00:21 <~elChe> agh same
00:21 <~elChe> visa and mastercard
00:21 <~elChe> use securecode
00:22 <~elChe> a pin needed to complete transaction
00:22 <@sup_g> some merchants may not require that
00:22 <@uid0> http://www.mastercard.us/support/securecode.html :\
00:22 <@uid0> And apparently it's not active by default.
00:32 <@uid0> Strange paranoia this evening. xD Constantly feeling like someones
in here, staring at me.
00:33 <@sup_g> It's me.
00:33 <@uid0> Oh noez, surprise buttsex :(
00:34 <@sup_g> NO ESCAPE
00:34 <@uid0> 4 days until it's Bradleys birthday.
00:34 <@sup_g> we can do somethin
00:34 <@sup_g> A donation or two
00:35 <@sup_g> Or two hundred.
00:36 <@uid0> Maybe they can really get away with the "mental illness" "should've
never been brought to a warzone" thing.
01:02 <~elChe> agh fuckign shit
01:03 <@uid0> =
01:03 <@uid0> ?
01:06 <@sup_g> ok I found out
01:06 <@sup_g> # Temp. band-aid to fix php logo issues on site due to invalid

```

#lulzmas.log

cache

```
01:06 <@sup_g> */5 * * * * /opt/adm/bin/ghettoClearCache.sh
01:06 <@sup_g> was in crontab on www server
01:06 <@sup_g> so the php logo issues was unrelated to what we were doing
01:07 <@sup_g> still, they noticed breach
01:07 <@sup_g> some other way that is
01:09 <@uid0> sup_g: How did they respond?
01:09 <@uid0> Backdoors gone?
01:09 <@sup_g> Nope.
01:09 <@sup_g> None of them.
01:09 <@sup_g> well actually,
01:09 <@uid0> How do you know they noticed?
01:09 <@sup_g> They did kill remote mysql login
01:09 <@sup_g> And changed the www password on db2
01:10 <@sup_g> So they found whatever h gave up to us.
01:10 <@sup_g> (He did paste it in #antisecc channel)
01:10 <@uid0> aye
01:10 <@sup_g> Also, in /root/inspect/ are several recent apache and sshd logs
01:10 <@sup_g> and .bash_history shows him greppin for certain times
01:11 <@sup_g> I am surprised they did not take boxes down, honestly
01:11 <@sup_g> We REALLY need to root this core box.
01:11 <@uid0> usually the admins don't think that far to issue any warnings.
01:11 <@sup_g> That's where the mail's at. The good shit.
01:12 <@sup_g> Reviewing some newly acquired sql files.
01:19 <~elche> agh shit
01:28 <~elche> trollolol!!!!
01:28 <~elche> i got one working
01:28 <~elche> donated for EFF
01:29 <@sup_g> screenie <3
01:29 <~elche> not so much cause the poor guy came from AJE
01:29 <~elche> xD
01:29 <@sup_g> for real?
01:29 <~elche> but well i can troll them with this
01:29 <@sup_g> lol.
01:29 <@sup_g> btw downloading police chief facebook
01:29 <~elche> just 100$ he cant cry for that
01:29 <~elche> ok screenies
01:33 <~elche> http://[REDACTED]
01:33 <~elche> XD
01:34 <@uid0> awesome!
01:35 <@uid0> Also yay for using firefox. :D
01:36 <~elche> XD
01:36 * uid0 doesn't like Chromium.
01:36 <~elche> ok so some of them are still usable
01:36 <~elche> i propose to prepare an EFF donation raid
01:37 <~elche> also sup_g get all those anarcho org u want to doante to
01:37 <@uid0> Can one donate bitcoins to them?
01:37 <~elche> and check if they have easy forms
01:37 <@sup_g> i'll get a list for ya but not now
01:37 <~elche> we should crack our heads to get a way to get them into money
01:38 <~elche> try to filter all the amex sup_g
01:38 <~elche> amex better for this
01:39 <@uid0> wikileaks is accepting BTC donations btw
01:39 <@uid0> Almost not possible to get em back.
01:40 <@uid0> 1HB5XMLmzFVj8ALj6mFBsbifRoD4miY36v <-- w1
01:41 <~elche> yeah but how we ll change the CCs into bitcoins quickly?
01:41 <@uid0> bitcoin exchange pages
01:41 <~elche> hm ok..
01:42 <~elche> im not strong on those things...
01:42 <@uid0> mtgox for example
01:42 <~elche> u need like 4-6 days before transaction complete
01:43 <~elche> and i think they use bank transfer and not CCs
01:43 <@uid0> trying to figure out
01:44 <@uid0> Bradley Manning Support Network offers a webform:
https://co.clickandpledge.com/sp/d1/default.aspx?wid=38591
01:44 <@uid0> But no amex :\
01:44 <@sup_g> we hit that one during the sheriffs hack =>
01:45 <@uid0> which one?
```

```

                                #lulzxmas.log
01:47 <@sup_g> donated to that clickandpledge URL for bradley
01:48 <@uid0> oic
01:49 <@sup_g> have to split in a few
01:49 <@uid0> Ok, I fugred something out elChe.
01:49 <@uid0> Paypal --> Liberty Reserve --> Bitcoin :>
01:49 <~elChe> oops i made another donation
01:49 <~elChe> 500$
01:50 <@uid0> xD
01:50 <@uid0> Here you can exchange liberty reserve for CC
http://www.electrumx.com/
01:50 <~elChe> hm how we need some paypal account for that
01:50 <@uid0> Not even need to get a paypal acc.
01:50 <~elChe> can u setup that?
01:50 <~elChe> we can try little test tomorrow
01:50 <@uid0> lemme try
01:51 -!- sup_g [v@kerpia-4172ED4C.formlessnetworking.net] has quit [Input/output
error]
01:52 <@uid0> elChe: You mean setting up paypal acc?
01:52 <~elChe> i mean try to get that rollin
01:53 <~elChe> i m stressed now
01:53 <@uid0> yeah, we could make a little test with $5 or so.
01:53 <~elChe> i think ill make another donation
01:53 <~elChe> xD
01:53 <~elChe> $5?
01:53 <@uid0> Yeah, tomorrow.
01:55 <~elChe> dont be avaricious
01:55 <~elChe> lets do 500
01:57 <@uid0> lol, just found smth nice
01:57 <@uid0> they're accepting cc for btc
01:58 <@uid0> Most orders are delivered immediately at checkout time. If there is
ever a delay, it will only be for a few minutes while your order is verified.
01:59 <@uid0> but $500 per day limit. :\  

01:59 <~elChe> ok
01:59 <~elChe> make raid of 300 or 250
02:01 <@uid0> Or do you have any chance to make that ccs as paysafe cards?
02:05 <@uid0> Nah, disregard that. They all want authentication we can't provide.
-.-
02:09 <~elChe> which would be the limit for a CC
02:09 <~elChe> belonging to dia.mil
02:11 <@uid0> I found an online shop where one can buy paysafe card usng visa &
mastercard
02:11 <@uid0> elChe: Depends on the type of card they're using.
02:12 <~elChe> US air force debit master
02:12 <~elChe> i d say 500
02:12 <~elChe> dont want to risk to try 1000 and trigger some shit and get stuck
02:12 <~elChe> agree?
02:13 <@uid0> some cards even have a $500 trigger.
02:13 <~elChe> ok
02:13 <@uid0> Currently looking up if I can find any information on this.
02:16 <~elChe> hm ok 350 then
02:17 <@uid0> 499 would do it as well. xD
02:17 <@uid0> Never seen any <500
02:23 <~elChe> lol
02:23 <~elChe> ok well too late
02:23 <~elChe> but here your lulz

02:24 <@sup_g> back
02:24 <@sup_g> uid0 i'm lining up a few teasers as well, non-cc related
02:25 <~elChe> hahaha
02:25 <~elChe> ok waht
02:25 <~elChe> look this sup_g
02:25 <~elChe> http://[REDACTED]
02:25 <@sup_g> i'm making a big list, and we can just pick and choose which to do
on each day

```

```

                                #lulzxmas.log
02:26 <@sup_g> shit like access to various chief emails, access to
fbivirtualacademy.edu, some for official use only docs, etc
02:28 <@uid0> OK, checked back again. If you have "premium" cards, their daily
transfer limits is at least $2,500 (often as much as $9,000). For "normal cards"
it's $500-$2000.
02:33 <~elche> ok
02:33 <~elche> i was thinking
02:34 <~elche> if we dont say anything for a while
02:34 <~elche> we can spend ton of money
02:34 <@uid0> aye
02:34 <~elche> cause the cards will look unrelated between them for a while
02:35 <~elche> they will trigger the usual mechanism of fraud when users will
rant about spendings
02:35 <~elche> so they ll be treated as individual cases
02:35 <~elche> [B[B[B[B[B
02:35 <~elche> 24hrs / 24
02:36 <~elche> wehn we feel they r done
02:36 <@uid0> Yes, we should also not specify how much money from individual
accounts went to which org.
02:36 <~elche> we can then post all the details about how we spend the money
02:36 <@uid0> Maybe just "Donations summing up to x went to y" or smth like that.
02:37 <~elche> hm ok
02:37 <~elche> but we should post some screenshot as proof
02:37 <@uid0> Otherwise we'd somehow help them cleaning up the mess.
02:37 <@uid0> Yes, some screens are ok.
02:37 <@uid0> But no detailed records I'd say.
02:38 <~elche> ok ok
02:39 <@uid0> Do it like the gov with their black budget, just giving total sums.
xD
02:39 <~elche> hhahhah
02:40 <~elche> we could even do some counter-info campaign
02:40 <~elche> example
02:40 <~elche> this last screenshot is pretty much lulzy
02:40 <~elche> lets say we post
02:41 <~elche> 'DIA hacked and we r spending their money in donations' or
something more lulzy
02:41 <~elche> so they will be looking there
02:41 <@uid0> LOL, that's brilliant. Oo
02:41 <@uid0> would create so much fucking mayhem.
02:42 <~elche> and not where we r really working
02:42 <@uid0> They'll be going mad and shutting their stuff down, which costs
moneyz.
02:42 <~elche> sure at least they will block all their CCs
02:42 <@uid0> Better yet claiming we got that info from an "insider". xD
02:43 <~elche> hahaha
02:43 <@sup_g> hmm 64 character hash, looks like md5
02:43 <@sup_g> ideas what it is? got another users table for the target corp,
almost all @target.com
02:44 <~elche> intranet?
02:44 <~elche> lotus?
02:44 <~elche> ok we need Sabu opinion about the counter info
02:44 <@sup_g> err I nmean, what hash algo
02:44 <@uid0> sup_g: Linksys router? ;)
02:45 <~elche> and probably we ll need nimaa to agree
02:45 <@uid0> could be sha-384
02:46 <~elche> sup_g: can u filter all CCs belonging to Defense Intelligence
Agency?
02:46 <@sup_g> elche I'm just gonna set up this db and phpmyadmin for yall on our
server
02:46 <@sup_g> so yall can sort through it
02:46 <@sup_g> will that work?
02:46 <~elche> ok ok
02:49 <@uid0> sup_g: where did you find that hash? Any leads?
02:50 <@sup_g> it came from a db entitled '██████████' which appears to be some
group or phone conference system
02:50 <@sup_g> there's a users table here
02:50 <@sup_g> it also has an ldap u/p
02:51 <@uid0> openfire = Cross-platform, open source XMPP server written in Java,

15:58 <@sup_g> yoyo
15:58 <@uid0> yo
15:58 <~elChe> hi sup_g i read the pr u showed me
15:59 <~elChe> can u add more lulz shits there? its good but too serious
sometimes
16:00 <@sup_g> cool u like so far?
16:00 <@sup_g> working on other sections now
16:00 <@sup_g> yeah I hear ya
16:00 <~elChe> public expect good jokes and funny humiliating comments in
16:00 <@sup_g> I was thinking we should collect a big list of all the pranks and
orders we pull
16:00 <@sup_g> for lulzxmas
16:00 <@sup_g> split it up day by day line shit up ahead of time
16:00 <~elChe> also..i was thinking
16:01 <~elChe> can u verify the CCs db
16:01 <~elChe> i was wondering if
16:01 <@sup_g> from source?
16:01 <@sup_g> yes
16:01 <~elChe> h got all
16:01 <~elChe> dropped em
16:01 <~elChe> just leave a bunch of them
16:01 <@sup_g> yes did you get my message regarding that?
16:01 <~elChe> and then we ll be used to obfuscate his stolen shit
16:01 <@sup_g> wicked says they got ~40k and he does not believe h delivered all
of it to us
16:02 <@sup_g> I mean, I know for a fact what we got is not the entire DB, just
the most relevant tables
16:02 <@sup_g> and probably not complete CCs
16:02 <~elChe> get them from original source if u can
16:02 <@sup_g> alex said he copied the entire DB as well
16:02 <@sup_g> from source, and we can always get it from source again anytime
16:02 <~elChe> i hope were not falling i a trap

                                #1ulzxmas.log
16:02 <@sup_g> I just discovered phpmyadmin existing on target servers already
16:02 <@sup_g> nah I believe it is legitimate
16:03 <~elChe> yep but he could have taken the good shit
16:03 <@sup_g> the tables h delivered matched 'show tables' when I was on the box
16:03 <~elChe> leave few behind
16:03 <~elChe> and drop many
16:03 <~elChe> so he went on black market to sell out
16:03 <@sup_g> it's possible. and also even more worrisome because he has been
MIA since the start
16:03 <@sup_g> is that for certain?
16:04 <~elChe> finally we ll be fine anyway but he took the money and leave us
the cost if so
16:04 <@uid0> elChe: Yes, I said that a few days ago. But the comments were "he
often wents missing for some time".
16:04 <@sup_g> yeah I hear what you're saying
16:04 <@sup_g> yeah that's what wicked says
16:04 <@sup_g> speaking of, he worked on that statement quite a bit
16:04 <@sup_g> and is ready to pass it on to someone else if someone else wants
to work on it
16:04 <@uid0> He's mia for almost a week now.
16:05 <~elChe> i ll trust you guise but no more outside this group
16:05 <@sup_g> updated: https://cryptobin.org/ pw: xmas
16:05 <@uid0> same
16:05 <~elChe> wicked is fine but we r not sure where his loyalty rely on
16:06 <@sup_g> I do trust the other revsec folks on this operation: they did
bring us the target, and do seem to be working with us through it's finish
16:06 <@sup_g> I certainly like revsec folks a lot more than these cabincrew
creeps
16:07 <~elChe> yep sure but still doesnt resolve the trusty thingy
16:08 <~elChe> they worked with mama and since mama leaks internal info to french
intelligence
16:08 <@sup_g> wait whaa?/
16:08 <~elChe> i ll keep a distance on this
16:08 <@sup_g> k i'd like to hear this about mama
16:08 <@sup_g> because I sort of work with her a bit with freeanons
16:08 <~elChe> agh sup_g i already told all to you guise
16:08 <@sup_g> above gorund shit like make flyers, etc
16:09 <~elChe> uid0: how long was when i got confirmation?
16:09 <~elChe> like 2 months or kinda
16:09 <@sup_g> also do yall know if the mail was copied successfully?
16:09 <@uid0> elChe: Yes.
16:09 <@sup_g> alex said he got it going, copying them all in it's entirety
16:09 <@uid0> And we believed her to be some kind of fed/intel for even longer.
16:09 <@sup_g> not sure if it finished though: and don't want to hop on the box
now because it is biz hours for them
16:10 <~elChe> i m ftp'ing like 30gb of something alex asked
16:10 <@sup_g> clearspace? or the other thing
16:10 <~elChe> yep that
16:10 <@sup_g> ok clearspace is good but the mail is probably more relevant
16:10 <~elChe> the other thing is kinda 200gb
16:10 <~elChe> i dunno how we ll do that
16:10 <@sup_g> oh yah that must be mail =(
16:10 <@sup_g> I was thinking we order some servesr with them stolen CCs.
16:10 <@sup_g> lots of servers with big hard drives.
16:10 <@sup_g> and make four or five mirror .onions with them
16:11 <@sup_g> a few will go down right away, a few might now.
16:11 <@sup_g> not.
16:11 <~elChe> uid0: can u get an offshore server with one of those verified CCs?
16:11 <~elChe> i ll try it too
16:11 <@sup_g> since web/onion is really the most practical way to browse these
mails and clearspace
16:12 <@sup_g> torrent is damn impractical, no one will download
16:12 <@sup_g> we might want to offer it anyway but even so, focus on web viewing
16:12 <~elChe> hm i was thinking about
16:12 <~elChe> getting servers with CCs
16:12 <~elChe> they ll die soon if discovered ofc
16:12 <~elChe> and give address to media outlets
16:12 <~elChe> so they take the emails to analyse themselves

```

#lulzxmas.log

16:13 <@sup_g> it may be till the end of the mnth before the cc owner recognizes the bad charges
16:13 <~elChe> i hope so
16:14 <~elChe> what do u think about giving it to media sup_g ?
16:14 <@sup_g> so if we have a few of them, at least one will likely last long enough for folks to browse for long enough after release
16:14 <@sup_g> I think we should, trusted media that is.
16:14 <@sup_g> provided that the media respect the embargo on the target date
16:14 <@sup_g> which is what, 24th?
16:14 <@sup_g> when the games begin?
16:15 <~elChe> hm i dunno we should discuss
16:15 <~elChe> if we cry the target out
16:15 <@sup_g> i'm all for defacing and rm -rf'n these servers ASAP.
16:15 <~elChe> we risk the CCs getting blocked
16:15 <@sup_g> while we still can because I believe they noticed some fishy activity
16:15 <@sup_g> True.
16:16 <~elChe> probably if its burning
16:16 <@sup_g> elche so you did get them 200GB? how soon you think before we can have them on a server somewhere?
16:16 <~elChe> we should shred all there
16:16 <~elChe> nop alex is thinking about those 200gb
16:16 <~elChe> im getting clearspace
16:17 <@sup_g> ah ok they haven't copied yet?
16:17 <~elChe> nop as far as i know
16:17 <@sup_g> clearspace does have some good shit.
16:17 <~elChe> alex could have started downloading something
16:17 <@sup_g> if yall are interested to see what it is, we have some logins on clearspace.targetname.com so you cans ee
16:18 <~elChe> clearspace is currently downloading
16:18 <~elChe> but its big
16:18 <@sup_g> it's an employee portal, collaboration system
16:18 <~elChe> it ll take time to complete
16:18 <@sup_g> yeah it's big because they store all these PDF and other bigass file attachments int he DB itself
16:18 <@sup_g> we may want to find a way to extract from the DB the files themselves
16:18 <~elChe> sup_g: we should think about keeping stra... out for xmas release
16:18 <@sup_g> or find some other way to make the data in it practical
16:18 <@sup_g> for real?
16:18 <~elChe> until we abused all we could from the CCS
16:19 <@sup_g> yeah i hear what you're saying.
16:19 <@sup_g> well,
16:19 <@sup_g> maybe we can stretch it out at least a week longer till new years?
16:19 <@sup_g> i'm worried that they will eventually discover the extent of the breach anyway
16:19 <~elChe> ok new year and u fucked it up
16:19 <~elChe> but we dont say a word about CCs
16:19 <@sup_g> No?
16:19 <~elChe> we r donating right now sup_g
16:20 <~elChe> i would prefer those donations reach target before all get stuck
16:20 <@sup_g> I think there are legal rules to notify clients of breaches
16:20 <~elChe> if we hurry up on this we ll get spot for sure
16:20 <@sup_g> or that personal info could have been compromised
16:20 <~elChe> but we ll not fuck em financially
16:21 <@sup_g> though the ccs and financial mayhem is definitely the most lulzy and newsworthy element of this attack
16:21 <@sup_g> and also goes with the lulzxmas theme of stealing from rich and giving to poor
16:22 <@sup_g> an equally important part is destroying their servers and dumping their user/address list and private emails
16:22 <@sup_g> with the goal of destroying the target
16:22 <@sup_g> i'm hoping bankruptcy, collapse
16:22 <~elChe> have u seen some traces from backup logs there?
16:22 <~elChe> can we get info about where they backup their files?
16:22 <@sup_g> yes
16:22 <~elChe> if we know about CCs backup
16:23 <~elChe> we could know the risk better

#1ulzxmas.log

16:23 <@sup_g> they have autobot scripts that back up files to one of the servers, core, that we have root on
16:23 <~elChe> hm
16:23 <~elChe> if we shred all
16:23 <@sup_g> they may also have an external storage, I read that they did indeed copy mail backups to an external drive, so there may be backups that we cannot rm
16:23 <~elChe> CCs data will be lost...
16:23 <~elChe> yep the external one bugs me
16:23 <@sup_g> well obviously we dump all the data before it's rm'd
16:24 <@sup_g> we can't really control whether they have backups outside of the range of servers we have access to
16:24 <@sup_g> if they got em, they got em
16:24 <~elChe> yeah
16:24 <@sup_g> it's still going to be a nightmare for them to try to recover and put their systems back online. they're quite intricate
16:24 <~elChe> yep that i dont care
16:25 <~elChe> its about slowing CCs fraud notifications
16:26 <@sup_g> also
16:27 <@sup_g> I was thinking about not dropping the password lists for the california and new york targets
16:27 <@sup_g> for several reasons
16:27 <@sup_g> we can dump the mail spools, and own the california domain
16:27 <@sup_g> and maybe trade the lists with others whoa re interesting in exploiting
16:28 <@sup_g> btw, some of those PDFs we uploaded last week for bradley manning made it to publicintelligence.net
16:31 <~elChe> waht did u get from ny targets?
16:32 <~elChe> mail spools?
16:33 <~elChe> if so we can just leak that in the name or retaliation and think about the rest
16:34 <@sup_g> yes
16:34 <@sup_g> we have ~8 mail spools, and many of them contain them private documents
16:34 <@sup_g> also some logins
16:34 <~elChe> ok packed all together in the xmas special pack its ok
16:35 <~elChe> passwd could be traded
16:35 <@sup_g> yes
16:35 <@sup_g> we can leak all that without giving away the password lists
16:35 <@sup_g> folks will be getting plenty of passwords from the str target
16:35 <@sup_g> not to mention the specialforces shit they should already have a fuckload of government cleartexts available
16:35 <@sup_g> yes trade passwords
16:36 <@sup_g> no way to use credit cards without CVV information?
16:36 <@sup_g> cause if not, we should just dump these specialforces ccs
16:36 <~elChe> no as far as i know
16:36 <~elChe> yep include the specforce CCs on the xmas pack
16:36 <~elChe> we cant do big shit with em anyway
16:37 <@sup_g> nope
16:37 <@sup_g> may as well just contribute to the mayhem
16:37 <~elChe> and they ll help to obfuscate the other ones we have
16:37 <@sup_g> yes
16:38 <@sup_g> also california has some CCs but no CVV too
16:38 <@sup_g> more mayhem then
16:38 <@sup_g> we can post those and not the passwords
16:38 <~elChe> yep perfect
16:38 <@sup_g> hah hey elche what's up with that calendar
16:38 <~elChe> i consider priorities should be based on those assets which could bring the most of financial cost
16:40 <@sup_g> Maybe starting on the 24th, we can just start posting screenshots and assorted random CCs, without revealing larger target?
16:40 <~elChe> lol yep the calendar... well one of the girls i was dating (from calendar girls) brought a big scandal so she fucked up the other girls ready to post
16:40 <@sup_g> making donations and shit
16:41 <@sup_g> oh no good eh?
16:41 <~elChe> i could get more pics tho
16:41 <@sup_g> same here it just hasn't been priority for me

Page 15

```

#lulzmas.log
16:41 <~elChe> i ll look for some designer to prepare the calendar skelleton
16:42 <~elChe> so we can add pics at last moment
16:42 <~elChe> about that
16:42 <~elChe> i mentioned that to Sabu
16:42 <~elChe> i was thinking about that dia.mil guy
16:42 <~elChe> we can post the screenshot
16:43 <@sup_g> which guy?
16:43 <~elChe> donating money
16:43 <~elChe> and say
16:43 <~elChe> 'ok we r sitting on financial details from defense intelligence
agency of US, and we giving up a hell of donations with them'
16:44 <~elChe> that will bring chaos and it will obfuscate
16:44 <~elChe> the real CCs
16:44 <~elChe> we ll get authorities focusing on the wrong shit
16:44 <~elChe> that will give us time
16:45 <@sup_g> nice.
16:46 <@sup_g> we maybe can use that as distraction for the week of the 24th
16:46 <@sup_g> leading till the 1st
16:46 <~elChe> yep
16:46 <@sup_g> and then on the 1st we rm and drop the full zine
16:46 <~elChe> we can bring some confussion on xmas
16:46 <~elChe> meanwhile we keep working ont the real shit
16:47 <@sup_g> with four domains being owned in this zine we got a nice .txt
lined up
16:48 <@sup_g> hmmmmm
16:48 <@sup_g> maybe with the release of specialforces credit card dumps early
around the 24th, we can use that to have the public / police believe that is the
source of the donations
16:48 <@sup_g> thereby putting increased public pressure on specialforces
misdirecting the source of the real shit
16:49 <~elChe> yep but also we should declare
16:49 <~elChe> we got intel agency financial shit
16:49 <@sup_g> ahh yes
16:49 <~elChe> that will bring chaos since its a military action
16:50 <@sup_g> yes
16:50 <@sup_g> and also specialforces has a lot of military passwords
16:50 <@sup_g> fuckloads in fact
16:50 <~elChe> they will stay cracking their heads out figuring out
16:50 <~elChe> while we keep raping our db
16:50 <@sup_g> [REDACTED] | wc
16:51 <~elChe> in some way i like those dumb trolls of charrie
16:51 <@sup_g> [REDACTED] [REDACTED] [REDACTED]
16:51 <~elChe> cause their clueness
16:51 <~elChe> bring obfuscation to the operation
16:51 <@sup_g> well I'd like to draw some line between our operation and the
groupies and kiddies attracted to us but also doing dumb shit while waving our
flag
16:52 <@sup_g> it's pissed off some blackhats
16:52 <~elChe> i know but sometimes
16:52 <@sup_g> not to mention how their actions are undisciplined and reckless
16:52 <~elChe> success is more important than what some blackhats think
16:52 <@sup_g> half-owned targets that could have been exploited better
16:52 <@sup_g> I agree
16:52 <@sup_g> Most important thing is hitting the big targets as hard as
possible
16:52 <~elChe> smarter ones will figure out the whole plan behind
16:53 <~elChe> this about results no individual proud
16:55 <~elChe> also i need to talk to quinn
16:55 <~elChe> i read some paper linking her with some harvard hacker snitching
16:55 <@sup_g> hrm for real?
16:55 <~elChe> so i want to hear the whole story from her
16:55 <@sup_g> I talked to her for a while the other day actually.
16:55 <@sup_g> Side note, is there a problem with the 31. server?
16:56 <@sup_g> "Permission denied (publickey)"
16:56 <~elChe> wait
16:56 <@sup_g> do you have link to that paper?
16:57 <~elChe> hm retry
16:58 <~elChe> i dont see any problem

```

```

#lulzmas.log
16:58 <@sup_g> yeah it's def not working hmm.
16:59 <~elChe> if u shared access with alex
16:59 <~elChe> check if he changed ssh keys
16:59 <@sup_g> httpd user
16:59 <@sup_g> and no i never gave him or anyone else access
16:59 <@sup_g> can we RT
http://www.thetechherald.com/articles/The-FBIs-warning-about-doxing-was-too-littl
e-too-late
16:59 <@sup_g> I can't hop on our twitter atm
17:00 <~elChe> ok show me original twt
17:00 <~elChe> i ll do it
17:00 <@uid0> already tweeted sup_g
17:00 <~elChe> ok
17:01 <@sup_g> k thx
17:02 <@sup_g> ragan's always provided decent coverage
17:02 <~elChe> sup_g: last chars from pub key
17:02 <~elChe> zqGx2w==
17:02 <@sup_g> and also regarding quinn I was similarly worried about her keeping
her mouth shut ahead of time
17:02 <~elChe> check it
17:02 <@sup_g> 1 min lemme verify
17:02 <~elChe> it should work i think
17:03 <@sup_g> yes that is indeed the last few characters of that key
17:03 <~elChe> hm strange
17:03 <@uid0> sup_g & elChe:
http://29.media.tumblr.com/tumblr_lwfe5p8ucp1qm6jhmo1_500.jpg
17:03 <~elChe> u should be login there
17:03 <~elChe> i didnt have problems
17:03 <~elChe> haahahaha
17:03 <@sup_g> uid0 nice
17:04 <~elChe> tweet it uid0
17:04 <~elChe> it rocks
17:04 <~elChe> fictional terrorists
17:04 <~elChe> XD
17:04 <@sup_g> ok elche I was able to ssh but not sftp, lemme see what's up
17:04 <~elChe> agh i hope dumpster didnt pushed bastille again
17:04 <@sup_g> ah ok works now.
17:04 <~elChe> ok cool
17:05 <@uid0> Already done elChe
17:07 <@sup_g> btw, I uploaded the full specialforces u/p/address/cc list to 31
17:07 <@sup_g> mothafucka's 15MB
17:07 <~elChe> scottish terrorist
17:07 <~elChe> hahahhahHAHAHHAHAHAH
17:07 <~elChe> i had one of those when i was a child
17:08 <~elChe> ok coming bakc to norton
17:09 <~elChe> she said me last time she cant promise to keep things quiet
17:09 <@uid0> Then lets keep her out.
17:09 <@uid0> No risk.
17:09 <~elChe> i said its ok, i always keep that in mind when i talk to her
17:09 <~elChe> no no
17:09 <~elChe> not needed
17:09 <~elChe> she can hang out
17:10 <~elChe> and we can use the situation to propagate counter-info
17:10 <~elChe> being carefully about not fooling her nor discreting her
17:10 <~elChe> discrediting*
17:10 <~elChe> lets be honest
17:11 <~elChe> general public never get more than 10% what really happens
17:11 <~elChe> on the background
17:11 <~elChe> just the final official actions
17:11 <@sup_g> yeah that's what quinn told me too
17:12 <@sup_g> I asked her if she would be interested in reviewing some of the
data pre-release, provided she does not speak about it until it goes off, and
that she does not talk to police about it
17:12 <@sup_g> she side stepped both concenrs
17:12 <~elChe> if we play clever, we can make all of them happy
17:12 <~elChe> and keep the plans going
17:13 <~elChe> i already tested her last time
17:13 <~elChe> gave her the screenshot about dia.mil donation

```

```

#lulzmas.log
17:13 <~elChe> if it breaks out on the wild
17:13 <~elChe> we know we cant trust her
17:13 <@sup_g> hey also if oyu can clue me in with specific info about mama's
collaboration with french authorities
17:13 <~elChe> anyway i was thinking to post it soon for xmas
17:13 <~elChe> so no risk there
17:13 <@sup_g> because like I said I have worked with her on some public projects
including freeanons
17:13 <@sup_g> I asked her about her politics and she said she was anarchist
17:14 <@sup_g> and I know she works with two other cool peeps nix and vanzetti,
also both anarchists
17:14 <~elChe> mama leaks internal info about our structure
17:14 <~elChe> to french dgse
17:14 <~elChe> thats french intel agency
17:14 <@sup_g> for real? she has before? is this confirmed?
17:14 <@sup_g> it's the first I heard of it
17:14 <@uid0> sup_g: She's dragging ppl in tinychats + cam and tries to SE guys
in pms.
17:14 <@sup_g> that's weir
17:14 <@uid0> sup_g: we talked abt this for months. Oo
17:15 <~elChe> its confirmed form french intel officers i know
17:15 <@sup_g> I swear I never heard of this, in fact, I believe I asked some of
yall about it before
17:15 <@sup_g> well i never passed her any info about anything not related to
public freeanons
17:15 <@sup_g> does not know my involvement in anything
17:15 <~elChe> i was starting mistrusting her long time ago
17:15 <@sup_g> but this is disturbing
17:16 <~elChe> she tried to flex attention out of bahrain op
17:16 <~elChe> then months after we learnt dgse was involved there to keep things
down
17:16 <~elChe> then ppl was saying me they got her pm em lurking personal info
17:17 <@sup_g> =(
17:17 <~elChe> then yahazkel was saying
17:17 <@sup_g> well she is still running with freeanons
17:17 <~elChe> she messed the french channels
17:17 <~elChe> and lurking ppl there
17:17 <~elChe> then she tried to get from me the current status of kayla
17:18 <~elChe> after all ppl know she got the official version she got pwnd by
police
17:18 <~elChe> some days before bricksquad posted a dox
17:18 <~elChe> saying kayla wasnt in jail
17:18 <@sup_g> well couldn't that be a legitimate question, from someone involved
with anonymous legal support collective?
17:19 <~elChe> no sup_g i know mama since months
17:19 <@uid0> same here
17:19 <~elChe> she lurks getting personal info from them
17:19 <~elChe> she force commanderX to show up on tinychat once
17:19 <~elChe> before he got busted
17:19 <@sup_g> k well thanks for the heads up then, not that it really changes
too much because I wasn't working with her on that level, but it's good to know
17:19 <@uid0> elChe: You remember the way she acted in #freedommods sometimes?
Like she was trying to disrupt trust amongst ppl.
17:20 <@uid0> heh: http://kimjongunlookingatthings.tumblr.com/
17:20 <~elChe> ofc
17:20 <~elChe> its her work
17:20 <~elChe> she psychologist
17:20 <~elChe> she manipulates ppl
17:21 <~elChe> at the beginning she was trying to be rude and was annoying then
17:21 <~elChe> then she learns works better to seem nice and send kisses and love
to everyone
17:21 <~elChe> main problems ppl are stupid and buy her shit
17:21 <@sup_g> fuck I'm a sucker for the kisses
17:22 <~elChe> lol
17:22 <~elChe> once i talked to sabu
17:22 <~elChe> i knew she infiltrates revolve
17:23 <~elChe> so we should keep them at some distance from us
17:23 <~elChe> she translate things for them

```

```
#lulzmas.log
```

```

17:23 <@sup_g> hrrmmmm.
17:23 <~elChe> she speaks like 6 languages mainly arab focused
17:23 <@sup_g> this is disappointing because I was sort of liking our
collaboration with revsec
17:24 <~elChe> finally i understood she speaks them not so well but those arabic
related
17:24 <~elChe> sup_g: probably not their mistake
17:24 <~elChe> she s good on her shit
17:24 <~elChe> she manipulates ppl
17:25 <~elChe> and being and old lady
17:25 <~elChe> lets consider she practices a lot
17:25 <~elChe> practiced*
17:25 <@sup_g> fyi: [REDACTED] = specialforces dox
17:25 <@sup_g> I have a few more NY spools uploaded there as well that I need to
uncompress and render
17:26 <@sup_g> and you did move those [REDACTED] and shit to 31 right?
17:26 <~elChe> hm CCs details there too
17:27 <@sup_g> yes they are all in that one .txt
17:27 <@sup_g> passwords, addresses, ccs
17:27 <@sup_g> formatted well
17:30 <~elChe> LOL
17:30 <~elChe> wait
17:30 <~elChe> wait wait wait
17:30 <~elChe> she said to you
17:30 <~elChe> she s anarchist???
17:30 <~elChe> HAHAAHAHAHAHAHAHAHAHAHAHAHA
17:30 <~elChe> fucking liar
17:30 <~elChe> hahahah
17:30 <@sup_g> Yes she did
17:30 <@sup_g> Do you know if nix and vanzetti are aware of this about her?
17:30 <~elChe> my dear friend she just want one thing
17:30 <~elChe> got u in her pocket
17:31 <~elChe> we discussed this issue on core team
17:31 <~elChe> i dont want to babysitting all ppl
17:31 <~elChe> ppl should learn to protect themselves
17:31 <@sup_g> I must have missed the memo.
17:31 <@sup_g> About mama.
17:31 <~elChe> from being manipulated
17:32 <@sup_g> But, nothing was compromised, so it's cool
17:32 <~elChe> u missed cause at the time u forgot to keep a shell on the silcd
17:32 <@sup_g> hey so kfair is up on 31?
17:32 <@sup_g> and others?
17:33 <@sup_g> i'm writing the txt for the california shit and would like to
quote our clueless syadmin kfair
17:33 <~elChe> dont know but i can upload them
17:33 <~elChe> ok when finish current transfers
17:33 <~elChe> i ll upload them
17:34 <@sup_g> k
17:34 <@sup_g> there were a few I gave you I believe
17:34 <@sup_g> I think you listed them back to me
17:35 <~elChe> yep i got them
17:35 <~elChe> i ll upload them when finish current massive transfer
17:36 <@sup_g> yeah this is pretty ridiculous
17:36 <@sup_g> I have seen several NYPD SHIELD PDF bulletins in the clearspace
dump tho
17:39 <@sup_g> and also references to documents in clearspace in some of these
people's dumps that may have detailed it infrastructure info
17:43 <~elChe> uid0: r u around?
17:50 <@uid0> elChe: I am, just had lunch. :D
17:51 <@sup_g> Maybe donations to various occupations are in order.
17:51 <@sup_g> pizzas pop tarts and coffee and shit.
17:59 <~elChe> uid0: how much have u spending already?
17:59 <~elChe> aprox
18:00 <~elChe> yep sup_g we need to empty those fucking CCs
18:00 <@sup_g> yes
18:00 <@sup_g> well
18:01 <~elChe> fuck i ll be downloading for 4 days minimum lol
18:01 <@sup_g> let me test their DB

```

[illegible]

```

                                #1ulzxmas.log
18:38 <@sup_g> might want to see if any of the CCs in the list
18:38 <@sup_g> belong to Stratfor
18:38 <@sup_g> cause if so, we gotta go extra hard on them
18:38 <@sup_g> but probably not until the breach itself
18:39 <@sup_g> also this came in earlier today: ""Is it ok to work from home
today or is there more security changes cleanup to do? Actually, most of this
week would be even better.""
18:39 <~elChe> i checked there r details
18:39 <~elChe> of transaction made on behalf of fbi many mil bases
18:39 <~elChe> dhs and so
18:40 <@sup_g> nice.
18:40 <@sup_g> those are golden
18:40 <@sup_g> will piss them off
18:40 <@sup_g> especially if we are able to transfer to secure anonymosu cash and
get away with it
18:40 <@sup_g> get away with actually getting the money and using it without them
being able to revoke it
18:42 <~elChe> but couldnt get the CCs details
18:42 <~elChe> so i think we didnt get the whole pack
18:44 <@uid0> Yup, there are many entries in the cc list not matching any of
those in the other list.
18:44 <@uid0> So I assume h is a raging homofag and sold the rest.
18:44 <@uid0> fucktard
18:45 <~elChe> taht cause sup_g will verify on the original source if something
is not there
18:45 <~elChe> i was wondering if he dropped a big part of the CCs details
18:45 <~elChe> just left a bunch
18:45 <@sup_g> wicked says that he did only provide a partial list to us
18:45 <@sup_g> however we do still have root on www
18:45 <~elChe> so he can sell them sharing responsibilities
18:46 <@sup_g> I mean he did bring the hack to the table, so he is entitled to
some choice as to what to do with the hottest of the data
18:47 <~elChe> ok but u rooted the shit out there
18:47 <~elChe> u own the shit
18:48 <@sup_g> yes, we should grab the DB, and abuse it for our own ends
18:48 <@sup_g> i'll have to wait until off business hours
18:48 <@sup_g> they are likely online now
18:48 <@sup_g> and spawning reverse shells is kinda sketchy
18:49 <~elChe> yep
18:49 <@sup_g> connecting to the db2 server can only be done through the www
server directly
18:49 <@sup_g> not even phpmyadmin running on one of their other non-www servers
is able to connect apparently
18:50 <@sup_g> ok also
18:50 <@sup_g> if we are busting everything out on the 24th
18:50 <@sup_g> regarding orders and rm'n
18:50 <@sup_g> we hshould have some text to release, even if it is not our full
zine .txt which we should drop on the eve of the 1st
18:51 <~elChe> ok
18:51 <~elChe> wahts your idea then?
18:53 <@sup_g> well there's advantages and disadvantages to blowing the cover on
the target on the 24th
18:53 <@sup_g> advantage is none of theyr staff will really want to work on it
18:53 <~elChe> ok
18:53 <@sup_g> but it could potentially jeadordize the stability of the cards
18:53 <@sup_g> if they notif
18:53 <~elChe> yep
18:53 <@sup_g> so we can either just keep releasing teasers starting on the 24th
18:53 <@sup_g> and screenshots of some of the donations
18:53 <@sup_g> maybe a few live CCs or a few thousand etc
18:53 <~elChe> i consider success on the financial mayhem should be prioritized
18:54 <@sup_g> eventually culminating on the eve of the first
18:54 <@sup_g> I agree
18:54 <~elChe> ok
18:54 <@sup_g> though, if card companies start noticing the trend of custosers,
and tie it to the target
18:54 <~elChe> we should release something on xmas
18:54 <@sup_g> and target is notified that their customer cards are being abused

```

#lulzxcmas.log

18:54 <~elChe> nypd and california
18:54 <~elChe> and something else related to donations
18:54 <@sup_g> well the ny and cali targets I was saving for the eve of the first, due to the fact that noise demonstrations are planned outside of jails
18:54 <~elChe> probably trolling about intel agencies financial
18:54 <@sup_g> in california as well as nyc
18:55 <~elChe> ok cool
18:55 <~elChe> also we should work on making them lulzy
18:55 <@sup_g> and also, because there's still a bit more prep work needed to be done
18:55 <@sup_g> yes
18:55 <~elChe> succeed depends also they get main public
18:55 <~elChe> not only hackers
18:56 <~elChe> this movement will succeed on the force of the whole ppl
18:56 <~elChe> not on a bunch of skilled ones only
18:56 <~elChe> so we need to feed them with fun
18:57 <@sup_g> I agree
18:58 <~elChe> i consider its pretty much funny we use 1% tactics on our stuff
18:59 <@sup_g> I wonder what other leaks people are planning for this lulzxcmas.
18:59 <~elChe> marketing, branding, advertisement, media campaigns
18:59 <~elChe> we r starting to doing it better
18:59 <@sup_g> standard community organizing principles
18:59 <~elChe> we use the system against the system
19:04 <~elChe> i think sup_g some groups are trying to make some shits on their own
19:04 <~elChe> thats the best part
19:04 <@sup_g> yes this is good
19:04 <~elChe> those trolls of charriewong got into
19:04 <~elChe> even being trolls
19:05 <~elChe> they spread the mayhem
19:05 <~elChe> sure cabincrew and other ones will do something
19:05 <~elChe> probably teampoison will try something to avoid getting out of the party
19:05 <~elChe> thats waht it was supposed to happen
19:06 <~elChe> ppl working on shits on their own for xmas
19:06 <~elChe> more shits around
19:06 <~elChe> more chaotic for govt to catch up
19:06 <@sup_g> yep.
19:06 <@sup_g> they will not sleep well
19:08 <~elChe> that cause i was thinking lot about the CCs
19:08 <~elChe> if we keep the CCs quite
19:09 <~elChe> each case will be treated individually and not like a massive fraud
19:09 <~elChe> many of them probably will just keep some of the donations without saying shit
19:10 <~elChe> that cause we really need to think about the best solution for this
19:10 <@sup_g> yah the timing is very essential
19:10 <~elChe> cause we ve chances to succeed
19:10 <~elChe> even str will not likely to say word about it
19:10 <@uid0> "COURAGE TO RESIST" xD
19:10 <~elChe> to avoid all the image cost to them
19:11 <~elChe> if their high profile clients got compromised
19:11 <~elChe> is likely they would prefer to minimize as possible as they can the damage for their public image
19:11 <~elChe> so theres a modest chance they will not say too much about the CCs
19:12 <@sup_g> Best quote:
19:12 <~elChe> if they saw we dont mention it too
19:12 <@sup_g> "You do realize how preposterous it is to suggest that stratfor simply shutdown complete for 2 days, right?"
19:12 <@sup_g> it manager
19:12 <@sup_g> regarding a server change or something
19:12 <@sup_g> if they're freakin bout 2 days, then they are truly fucked
19:12 <~elChe> lol
19:12 <@uid0> 2 days cost them several millions.
19:12 <~elChe> xD
19:13 <@sup_g> also
19:13 <@sup_g> some internal military portals

```

                                #lulzXmas.log
19:13 <@sup_g> do autologins to stratfor
19:13 <~elChe> hm
19:13 <@sup_g> I think we may get some surprises with their emails.
19:13 <@sup_g> A lot of it is 'agents in the field'
19:14 <@uid0> we're releasing the "NOC list" xD
19:14 <@uid0> That was mission impossible, right?
19:14 <~elChe> hahhhaha
19:15 <~elChe> lol we could really knock them off business probably
19:16 <@uid0> Afterwards I'll move country I guess. xD
19:16 <~elChe> hahah
19:17 <@sup_g> yeah I think this could be a nail in the coffin for them
19:17 <@sup_g> no one will trust them with their info again
19:17 <@sup_g> business ruined
19:18 <@sup_g> they may even face lawsuits and criminal charges for not securely
protecting cusotmer info
19:18 <@sup_g> if I recall correctly, cvv info is never to be stored
19:18 <@sup_g> The operation is apparently being run by two "very well-known
hackers" called 'Charrie' and 'LulzFunny'. They were quoted as saying: 'we're
both well known for hacking but have never done this sort of thing and neither
have any hackers before!?'
19:18 <@sup_g> 'and neither have any hackers before!' this drives me nuts
19:19 <~elChe> hahahaha
19:20 <~elChe> dont feed the trolls sup_g
19:20 <~elChe> ahahah
19:21 <~elChe> yep it makes me dreaming about smacking their heads down
19:21 <~elChe> but well think about it as a distraction
19:21 <@sup_g> yep
19:21 <@sup_g> more mayhem the merrier
19:21 <@sup_g> and we will look good in comparison
19:25 <~elChe> hm i was thinking [B[B[B[B[B
19:25 <~elChe> we should get many vps with those CCs and mirror them
19:26 <@uid0> we should get some boats with those ccs. :>
19:27 <@sup_g> yeah we should get as many servers as possible
19:27 <@sup_g> who cares if a few are taken down
19:27 <@sup_g> lol @ In a statement 'Anonymous' said, 'future acts of aggression
against our movements will be met with a vengeance?' 'It's outrageous and it's
not funny. we will pursue this to the fullest extent of the law,' said Tom Nee.
19:29 <~elChe> i ll pursue them with the fullest lenght of my cock
19:43 <~elChe> ok got pm

#lulzmas.log

19:52 <@sup_g> because me and him have never gotten along

19:52 <@sup_g> and I don't trust him worth shit

20:00 <@sup_g> but hmm if vuln is good fuck it

20:00 <~elChe> he showed me many stuff

20:01 <~elChe> the thing bugs me always why he never gets his hands dirt on them

20:01 <@sup_g> he says he did this one himself

20:01 <@sup_g> and no one else is aware of it

20:01 <~elChe> ok why dont he publish the release?

20:01 <~elChe> or handle it to us

20:01 <@sup_g> yeah it's somewhat fishy, but, if it works

20:02 <@sup_g> and I believe he is attempting to hand this to us

20:02 <@sup_g> <r000t> burn, I gave up the name of someone who hasn't been on the scene in years

20:02 <~elChe> if he wants to help he should get his hands dirty like all of us do

20:02 <@sup_g> I would never trust him, honestly

20:02 <@sup_g> as far as working on ops

20:03 <@uid0> I guess he's working for LE in some kind and trying to incriminate ppl.

20:03 <@sup_g> anonymoose or r000t?

20:03 <@sup_g> r000t already just admitted to snitching

20:03 <~elChe> both lol

20:03 <@sup_g> so he is persona non gratta

20:03 <@uid0> sup_g: both!

20:04 <~elChe> im not in anonops

20:04 <~elChe> but if u r

20:04 <~elChe> tell anonymoose to work on the un.org links and prepare a dump

20:04 <~elChe> and get his hands dirty for once in a fucking life for gods sake

20:04 <~elChe> u can quote me

20:13 <@uid0> r000t snitched on ev0

20:13 <@sup_g> and probably lots of others

20:13 <@sup_g> does he run an ircd?

20:19 <@sup_g> q's active?

20:20 <@uid0> He is? where?

20:21 <@sup_g> on anonops?

20:21 <@sup_g> maybe bogus?

20:22 <@uid0> Certainly bogus.

21:02 <~elChe> agh

21:02 <~elChe> if q is bogus

21:02 <~elChe> u should ask someone to take it down

21:02 <~elChe> big risk if not

21:05 <@uid0> I think they know.

21:08 <~elChe> ok

21:08 <~elChe> we could wait for jc to verify also

21:12 <@uid0> He's not eving connecting by ssl.

21:12 <@uid0> So it's definitely not q.

21:14 <@uid0> wow, look at this "Zeitgeist 2011: Year in Review" video from Google @ youtube.

21:14 <@uid0> It's pretty good.

21:16 <@uid0> <http://www.youtube.com/watch?v=SAIEamakLoY>

21:19 <~elChe> lol pretty much

21:19 <~elChe> did u tweet it?

21:19 <~elChe> they featured anon

21:19 <@uid0> Not yet.

21:19 <@uid0> I'll do now.

21:19 <~elChe> wondering if they liked the tweet we made about their donations

21:20 <~elChe> can i do it?

21:20 <~elChe> the tweet i mean?

21:20 <@uid0> They featured lulzsec also :D

21:20 <@uid0> Sure

21:24 <~elChe> done

21:25 <~elChe> lol i did it with other account

21:25 <~elChe> xD

21:25 <~elChe> ok fixed

23:30 <~elChe> but not sure if they r enough secured now
23:30 <~elChe> dont want to compromise this temporary ip whilst doing sensitive transfer
23:31 <~elChe> not sure if mronion is working, does it?
23:32 <@uid0> it's working
23:32 <@uid0> If jc added you ofc.
23:32 <@uid0> not donationg atm, but will start again in an hour.
23:33 <~elChe> ok i ll start too
23:33 <~elChe> we should hurry up
23:33 <~elChe> if we want to get magical 1 000 000
23:34 <@uid0> well, we can't prove to have donated \$1,000,000 anyway. Just estimate. :\
23:34 <~elChe> hahah yeah i know
23:34 <~elChe> but if we know we did it
23:34 <~elChe> its enough
23:34 <@uid0> sure thing
23:34 <~elChe> ppl will believe it too i think
23:35 <~elChe> so we need to try to do it

01:05 <~elChe> ah sup_g not here
02:51 <@uid0> elche: what's the difference between :1:2 Transaction rejected and :4:4 transaction rejected !?
02:53 <~elChe> hm?
02:53 <~elChe> u tried 4 without success?
02:53 <~elChe> well that happened to me also
02:53 <~elChe> i just continued until i got better luck
02:54 <@uid0> elche: No, usually I get ":1:2" when rejected (in that yellow box on eff.org) but some time ago I had ":4:4" when rejected.
02:54 <@uid0> Just don't know what those codes mean.
02:59 <~elChe> ah ok
03:00 <~elChe> no more explanation than that?

04:59 <~elche> alex is cracking his head to figure out how to transfer 200gb from
rootd box
04:59 <&Sabu> I been busy the past few days working and shit so I'm backed up
04:59 <&Sabu> did we get all mails from stratfor yet?
05:00 <~elche> not yet
05:00 <~elche> theyr 200gb
05:00 <&Sabu> that ftp seems interesting++
05:00 <&Sabu> that=antisecc release

05:26 <&Sabu> wow
05:26 <~elChe> hm
05:26 <&Sabu> On July 13, 2005 the police traced his IP by using E-Detective system developed by Decision Group Inc , found out Zhang Ximing hid in a rented apartment in Taichung . At 8:55 am, criminal police's Bureau Chief Hou You-yi arranged to surround and carry out the capturing strategy immediately. The criminal investigation bureau altogether with 125 police forces participated in the arrest action. Zhang Ximing was shot in the back , fell to the ground and was arrested finally, ending his ten years of ordeal.

19:37 <@sup_g> hey homeys
19:52 <~elChe> hi sup_g
19:52 <~elChe> http://www.quinnnorton.com/said/?p=374
19:52 <@sup_g> yo
19:52 <@sup_g> was that one you posted about earlier?
19:52 <@sup_g> the scene thing?
19:52 <@sup_g> hey also
19:52 <@sup_g> alex has mail - and we need to copy it to other servers now for
mirroring / private viewing purposes
19:53 <~elChe> hm ok
19:53 <~elChe> how big is it, 200gb?
19:53 <~elChe> hm we should take another server gods sake
19:53 <~elChe> also importatn
19:54 <~elChe> need ur PR for lulzxmas
19:54 <@sup_g> ok yes
19:54 <@sup_g> question
19:54 <~elChe> i ll get quinn to read it and try to push wired article
19:54 <@sup_g> what I had before was mostly fit for a 'post-action' reportback
19:54 <@sup_g> suitable for the first
19:54 <@sup_g> it's not something really fit to be released tomorrow, especially
since we are not destroying the target
19:54 <@sup_g> Or are we?
19:55 <~elChe> i only think we should keep strat on hold cause it needs work on
it
19:55 <~elChe> and the rest should go out
19:55 <@sup_g> ok
19:55 <@sup_g> well in that case, we need a PR suitable for tomorrow
19:55 <~elChe> we need to troll about CCs and mention intel agencies
19:55 <@sup_g> which will include mostly bragging about donations primarily
19:55 <@sup_g> right?
19:55 <~elChe> ok ok
19:55 <@sup_g> also some screenshots, and maybe dump a few shitty cards
19:55 <~elChe> its cool cause u r not lying indeed
19:55 <@sup_g> also, we need some servers
19:56 <~elChe> we abused a little on donations already
19:56 <@sup_g> should we quote an estimated amount of how much cash we usurped so
far?
19:56 <@sup_g> and maybe post some screensots as proof
19:56 <@sup_g> also, did you see the Company list
19:56 <@sup_g> cause we should hit some of the companies on that list
19:56 <~elChe> i m not sure if money was already blocked in some cases
19:57 <~elChe> but in those were the donations was technically received after
card check
19:57 <@sup_g> I'm sure some went through, but mostly are gonna be toast in the
end
19:57 <~elChe> we could say we r around little lower than 500.000
19:57 <@sup_g> ok.
19:57 <@sup_g> and do some of the screenshots available contain the name of the

```

company that donated?

19:57 <~elChe> donations

19:57 <@uid0> I donated another ~50-60k today.

19:58 <~elChe> i got some cool screenshots

19:58 <@sup_g> as long as we are able to provide proof that we donated via screenshots

19:58 <@uid0> mostly to EFF & Bradley Manning

19:58 <~elChe> dhs and dia.mil

19:58 <@sup_g> and also maybe dump some rando cards that are still active, even though they will be abused to fuck

19:58 <@uid0> didn't do any screens though

19:58 <@sup_g> we will have enough to prove

19:58 <~elChe> the psychological effect about seeing dhs and mil there will be enough

19:59 <~elChe> we should avoid any mention to potential source

19:59 <@uid0> let's dump 1 or 2 high profile cards (intel/military) and some more random.

19:59 <~elChe> yep ok

19:59 <@sup_g> But not too many, so as to give away the source.

19:59 <~elChe> we should choose them on the most randomly possible way

19:59 <@sup_g> If we want, we can dump the specialforces list.

19:59 <@sup_g> It will get people excited about cards

20:00 <~elChe> uid0: did u managed to buy stuff for aaron barr?

20:00 <~elChe> have *

20:00 <@sup_g> btw

20:00 <@sup_g> we need some servers asap

20:00 <@uid0> ah damn...forgot abt that

20:00 <@uid0> well, we can still do it live elChe. :>

20:00 <~elChe> we need vefificated card for that

20:00 <~elChe> some of them dont work

20:01 <@sup_g> yeah

20:01 <@sup_g> if this one server goes donw, we lose all mail

20:01 <@uid0> first try if it's working on EFF, then use it at amazon or smth else.

20:01 <@sup_g> it is all successfully copied though

20:01 <@sup_g> ~150-200GB

20:01 <@sup_g> plus the sooner we can get emails up the sooner we can skim for lulz

20:01 <@sup_g> but in reality we may as well leave that to crowdsourcing

20:02 <~elChe> waht about release to press

20:02 <~elChe> ask them for mirroring

20:02 <@sup_g> maybe we can ask wired.

20:02 <@sup_g> on the condition that they keep quiet about the name of the target

20:02 <~elChe> i ll rent another big server but impossible to do so on this weekend

20:03 <~elChe> we cant

20:03 <~elChe> we cant get that

20:03 <~elChe> quinn said me its difficult to promise embargo more thant couples of days

20:03 <@sup_g> For real?

20:03 <@sup_g> Guess we can't ride with her then.

20:03 <~elChe> yep

20:04 <~elChe> we can give them but they cant hold all for more than 3 days

20:04 <~elChe> its criminal

20:04 <~elChe> we should give them mirror but two days before release

20:05 <~elChe> they r not able to wait for more orthey ll get legal troubles

20:05 <@sup_g> ok

20:05 <@sup_g> well we can use that one revsec rooted server they used

20:05 <@uid0> other news outlets gave a shit abt this in the past.

20:06 <@sup_g> <sup_g> we have massive amounts of mail, and we'd like to provide yall with some preview info, but we need to make sure that the police / source of the email isn't notified prior to our official release

20:06 <@sup_g> <quinn> i can give you until next week, and a promise of confidentiality for that time, cleared with my eidtor

20:06 <@sup_g> <quinn> editor

20:06 <@sup_g> <quinn> but don't give me anything that can't go public at the end of the embargo period

20:06 <~elche> ok ok
20:06 <~elche> not bad
20:06 <@sup_g> #NYC last night advocate.nyc.gov got RM'd but is back on line...
here is the database... [REDACTED] <#Anonymous #AntiSec #SQL
20:06 <@sup_g> 7 minutes ago
20:06 <@sup_g> Hmm.
20:07 <~elche> hm mail should be released via wired
20:07 <~elche> just mails
20:07 <@sup_g> k.
20:07 <~elche> alex has a copy
20:07 <~elche> so its ok in worst case
20:08 <~elche> i ll get new server to keep them online
20:08 <~elche> and well search for mirrors
20:08 <@sup_g> <quinn> we can pick and date and time for the embargo to lift. i
don't have to reveal anything to LE or anyone at any point, if i don't want to.
20:08 <@sup_g> 'if I don't want to?'
20:08 <~elche> we could try to ping wikileaks to mirror it too
20:08 <@sup_g> Yeah we really should.
20:08 <@sup_g> I can hop on.
20:08 <~elche> quinn is ok sup_g
20:09 <@uid0> sup_g: Assange is so desperately crying for donations atm. xD
20:09 <~elche> lol
20:09 <~elche> i thought about donate to them using the ccs
20:09 <@uid0> we are forced to put all our efforts into raising funds to ensure
our economic survival. For almost a year we have been fighting an unlawful
financial blockade. We cannot allow giant US finance companies to decide how the
whole world votes with its pocket. Our battles are costly. We need your support
to fight back. Please donate now.
20:10 <~elche> but didnt want to bring more troubles
20:10 <@sup_g> we should do it.
20:10 <@sup_g> Fuck it, do it!
20:10 <~elche> they ll get even more troubles
20:10 <@uid0> elche: VISA & MasterCard aren't processing donations to them
anyway.
20:10 <~elche> and excuses to get pwnd by LE
20:10 <~elche> ohreally uid0 ?
20:10 <~elche> fuck them
20:11 <~elche> we can setup some flattr account
20:11 <~elche> and try to workaround it
20:11 <@sup_g> also elche
20:11 <@uid0> <http://shop.wikileaks.org/donate>
20:11 <@sup_g> is the cz server down?
20:11 <@sup_g> I cann't conenct via ssh or sftp.
20:11 <@sup_g> If it's down we're in trouble.
20:12 <~elche> hm
20:12 <~elche> nop
20:12 <~elche> wait
20:12 <@uid0> <https://flattr.com/donation/give/to/wikiLeaks>
20:13 <~elche> wtf???
20:13 <~elche> cz is down
20:13 <@sup_g> oh fuck.
20:14 <~elche> wait i need to check waht happend
20:14 <@sup_g> do you still have backups of some of the files I gave you?
20:14 <~elche> give a me second
20:14 <~elche> yep i have backups
20:17 <~elche> hm
20:17 <~elche> nothing strange
20:18 <~elche> even the guys talking about icy gave me one free month for issues
20:18 <~elche> but nothing about cz service
20:19 <~elche> hm
20:19 <~elche> pretty much strange
20:19 <~elche> i ll get mad
20:19 <@uid0> open ticket?
20:19 <@sup_g> lol @ having lots of wired.com accounts in users.csv
20:20 <~elche> hm yep ill wait dumpster to show up if he touched something
20:20 <~elche> in 2 hours i ll fill ticket
20:20 <~elche> dont want to attract attention on that server when we r close to
release

#lulzmas.log

20:21 <~elche> holy shit
20:21 <~elche> theres always a problem at last moment
20:22 <~elche> sup_g: did u fill it more than expected?
20:22 <~elche> how much space left last time u checked
20:23 <@sup_g> I haven't checked space since I left, but, I did not NEARLY upload
12GB
20:23 <@sup_g> 120GB
20:23 <@uid0> guys, we made it to #1:

20:24 <@sup_g> wikileaks says contact JA's lawyers regarding submissions.
20:25 <@sup_g> So scratch that one.
20:25 <@sup_g> sabu's offering a server
20:25 <~elche> ok
20:25 <@uid0> sup_g: wikileaks infrastructure is usually not as good as they want
ppl to make believe.
20:25 <~elche> we need local copies
20:25 <~elche> too
20:26 <@sup_g> yes we do, asap
20:26 <@uid0> Look at the "Inside wikileaks" book from Domscheit Berg, he
explains how they ran on one shitty old server for quite a long time.
20:26 <~elche> first we need local copies, we cant risk losing those emails
20:26 <~elche> one we secured several physical copies around
20:27 <~elche> we put them up
20:27 <~elche> need to figure out waht happened to cz
20:27 <~elche> if it got pwnd
20:27 <~elche> someone snitched on us
20:28 <@sup_g> yes, this is alarming.
20:28 <@sup_g> because it had EVERYTHING
20:28 <@sup_g> including the cards for both targets.
20:28 <@sup_g> actually all three targets it had cards
20:28 <~elche> dont freak out
20:28 <~elche> we have copies
20:28 <~elche> but we should be investigate what happened if really happened
20:28 <@sup_g> ok
20:29 <@sup_g> well
20:29 <~elche> it could be some other problem also
20:29 <@sup_g> I will ahve to reupload all the ny spools
20:29 <@sup_g> which took a long time.
20:29 <@sup_g> networking?
20:29 <@sup_g> where's b0tm0n?
20:29 <~elche> we r working with offshore pirates servers
20:29 <~elche> no i dont think b0tm0n screwed this one
20:29 <~elche> i told him to not touch dumpserver at all
20:30 <~elche> but support answered me about icy box and it was isp problem
20:30 <~elche> lets wait about what happend on cz
20:31 <~elche> if something happened
20:31 <~elche> we r being hunted down
20:31 <~elche> if nothing happened we r fine
20:31 <@uid0> I had some routing problems to CZ the last days (vpn box located
there).
20:32 <~elche> i suggest you start copying data to usb keys and start giving them
to trusted ppl
20:32 <@uid0> We beat @BarackObama on Twitter in terms of importance/influence
according to DailyDot. :D
20:32 <~elche> lol
20:32 <~elche> uid0: the vpn experimental one is icy one
20:32 <~elche> not cz
20:32 <@uid0> elChe: I have a vpn node in cz myself.
20:33 <~elche> hm?
20:33 <~elche> hows that??
20:34 <~elche> u sure cz or latvia??
20:34 <@uid0> elChe: Has nothing to do with those boxes.
20:34 <~elche> ah lol
20:34 <~elche> i was freaking out
20:34 <~elche> xD
20:35 <~elche> ok so there were some issues on cz
20:35 <~elche> in general
20:35 <@sup_g> ok

20:35 <@sup_g> great
 20:35 <~elChe> sup_g: when u ll have the PR ready?
 20:35 <@sup_g> tonight.
 20:36 <~elChe> we can start with that at least
 20:36 <@sup_g> and I plan on setting aside all day tomorrow to ride
 20:36 <@uid0> elChe: But file a support ticket nonetheless. One never knows.
 20:36 <~elChe> yep ok i ll fill one now
 20:36 <~elChe> god sake i gave them lots of money
 20:37 <~elChe> hope they hold those box up
 20:37 <~elChe> in theory they promised we could also host warez
 20:44 <~elChe> ok ticket sent
 20:49 <@sup_g> -rwxrwxrwx 1 507 100 165831547823 Dec 20 18:59
 backup.tar
 20:49 <@sup_g> holy mother of...
 20:49 <~elChe> what???
 20:49 <@sup_g> that's the emails
 20:49 <@sup_g> copying to one hacked server
 20:49 <@sup_g> which we can set up as a .onion
 20:50 <@sup_g> then sabu has another server with 2TB of space we can set up an
 onion there
 20:50 <@sup_g> as long as we have 2-3 .onions we should be good to ride
 20:50 <@sup_g> they wont' be able to take all of them down
 20:50 <~elChe> ok but 200gb transfer will take a long time
 20:50 <@sup_g> Yes it will.
 20:50 <@sup_g> But much less than a week.
 20:51 <@sup_g> And when it's on two servers, its easier to copy to four, then
 eight
 20:53 <@sup_g> copying ~3MB/minute
 20:53 <@sup_g> have it in screen session
 20:54 <@sup_g> err 3MB/sec
 20:54 <@sup_g> I mean that's not bad.
 20:56 <@sup_g> a half gig copied already
 20:56 <@sup_g> so we may be in business
 20:59 <~elChe> ok
 20:59 <~elChe> but we need local copies too
 20:59 <~elChe> at least one of us should have
 20:59 <@sup_g> yes I agree.
 20:59 <@sup_g> I cannot copy =(
 20:59 <~elChe> and spread
 21:01 <@uid0> I don't even have enough storage for 150-200gb
 21:01 <@sup_g> I found a 500GB hard drive in the dumpster, once.
 21:03 <~elChe> ok i ll get hard drives and i ll copy myself too when we got some
 mirror
 21:04 <@sup_g> we will have a mirror pretty soon
 21:04 <~elChe> and i ll send the hdd to your homes
 21:04 <~elChe> lol
 21:04 <@sup_g> i'm thinking hours
 21:04 <@sup_g> heee1111 no
 21:04 <~elChe> trolllolol
 21:04 <@sup_g> I really hope c goes back up.
 21:04 <@sup_g> I spent some time rendering some new NY spools last night.
 21:04 <~elChe> cz will go back or i ll go mad against isp
 21:05 <~elChe> but we have copies at least
 21:06 <@sup_g> yes
 21:06 <~elChe> even i we got pwnd
 21:06 <~elChe> we can rebuild same shit
 21:06 <~elChe> i dont think so
 21:07 <~elChe> but if its real
 21:07 <~elChe> i want to know what the hell happened
 21:13 <~elChe> ok
 21:13 <@sup_g> btw I am talking to quinn
 21:13 <~elChe> perfect
 21:13 <@sup_g> Maybe group chat?
 21:13 <~elChe> is on crypto?
 21:13 <@sup_g> She said she will respect the embargo
 21:13 <@sup_g> yes
 21:15 <~elChe> agh she needs to fix her client
 21:15 <~elChe> ok she ll be here soon

```

                                #lulzXmas.log
21:16 <~elChe> sup_g: dont give details about servers and where we got stuck or
not
21:16 <@sup_g> Of course not.
21:16 <~elChe> shes really ok with us
21:17 <~elChe> but she has secret service on her all time
21:17 <@sup_g> for real?
21:17 <~elChe> even we should avoid mentioning targets
21:17 <~elChe> yep for real
21:17 <@sup_g> I haven't mentioned specific targets.
21:17 <~elChe> target we r keeping on hold like strat
21:17 <~elChe> not to mention
21:18 <@sup_g> I said donations are going, and starting tomorrow there'll be a
string of teasers and tricks, leading to a big bang ~31st
21:18 <~elChe> cool
21:20 <~elChe> hm
21:20 <~elChe> really strange
21:21 <~elChe> she cant connect using ssl here...
21:21 <@uid0> I hate wrapping gifts.
21:21 <@sup_g> Fuck, I was just talking to her not with SSL.
21:21 <@sup_g> well I didn't mention targets.
21:22 -!- quinn [quinn@kerpia-AF880741.hfc.comcastbusiness.net] has joined
#LulzXmas
21:22 <~elChe> finally
21:22 <~elChe> lol
21:22 < quinn> that's much better
21:22 < quinn> sorry, i iz lame.
21:23 < quinn> though, to be fair, so is ssl
21:23 <~elChe> lol
21:23 <@sup_g> hah I shoulda checked whether you were using SSL prior to
messaging you.
21:24 <~elChe> sup_g any PR coming soon for quinn?
21:24 < quinn> yeah, i didn't know the port. i'd tried to set it ip earlier
21:24 < quinn> then lost my will to live and played wow for a while
21:24 < quinn> then you messaged me
21:24 <@sup_g> anyway, so quinn you can respect not mentioning any names of
targets to news/public/LE prior to our official release?
21:25 < quinn> yes
21:25 <@sup_g> we'd like to hook you up with some of the research so you can
prepare an article if you like ahead of time, but we can't compromise the source
until it's go time
21:25 <@uid0> quinn: Try Star wars The Old Republic. Addiction factor over 9000.
21:25 < quinn> i can give you that up to tuesday morning
21:25 < quinn> uid0: Jesus, i'm supposed to be raising a child...
21:26 <~elChe> xD
21:26 < quinn> (i've got to have a time when the embargo runs out)
21:26 < quinn> as in: when you guys release or tuesday morning, whichever is
sooner
21:27 <~elChe> we ll release
21:27 <~elChe> if u r worried about it
21:27 <~elChe> even if we grant access
21:27 <@sup_g> I'd say the 30th is a more comfortable date when we would be ready
to announce the target
21:27 <~elChe> u can release it anyway if we r late
21:27 < quinn> sup_g: ok, we can parcel it out a bit
21:27 <~elChe> sup_g we can open the bag from those confirmed
21:28 <~elChe> and keep the other one on hold
21:28 < quinn> if we say the 30th we don't want that to mean i can't write
*anything*before then
21:28 < quinn> but we need to be clear about what info is embargoes
21:28 < quinn> embargoed
21:28 <@sup_g> oh, yeah, that's no problem
21:28 <@sup_g> embargo is specifically on the name of the main company involved
21:28 < quinn> not only to protect you guise, but from me doing something
boneheaded
21:28 <@sup_g> since throughout the week there'll be teasers leaked anyway
21:28 < quinn> ok
21:28 < quinn> on the 30th i run the name, and not before
21:29 <~elChe> teaser will start dropping tomorrow xmas eve

```

```

                                #lulzxmas.log
21:29 < quinn> and i'm happy not knowing anytime soon fwiw
21:29 <@sup_g> elche: I'll have a PR late tonight or early tomorrow.
21:29 <~elChe> hm
21:29 < quinn> (on the data for the 30th)
21:29 <@sup_g> I have to line up some other last minute preparations while I
still have net
21:29 <~elChe> quinn will not check it tonight late to be honest
21:30 <@sup_g> Basically, we have a fuckload of private email spools from the
target, so much that will be near impossible for us to skim
21:30 <~elChe> better tomorrow so we can re-check it before
21:30 < quinn> ok
21:30 < quinn> and i can have a nice dinner with friends and family before i get
kidnap vanned by the three letter agencies? :)
21:31 <@sup_g> If practical, and desirable, we could give you preview access into
the content of the data, if it would help you with the article
21:31 <~elChe> of if u want sup_g to handle some pre-PR on the meanwhile..
21:31 <@sup_g> But obviously doing so would clue you into the target
21:31 <~elChe> and then we can retouch the final
21:31 < quinn> it would be helpful, if we can do it safely
21:31 <@sup_g> It would be available to you in a tor hidden services .onion url,
similar to our previous leaks
21:32 <@sup_g> Unless you have some advanced server mirroring capabilities that
we can upload all the raw files straight to.
21:32 <~elChe> sup_g: keep in mind quinn can be compromised, not cause she
wants...but she could
21:32 <@sup_g> k.
21:32 <~elChe> so we cant give clues ahead
21:32 <~elChe> keep it shadowed
21:32 <@sup_g> k so no mail?
21:32 < quinn> ideally for me, if you summarize what you've gotten and then pick
out a few pieces that demonstrate its importance, that would be xmas for me with
a bow, but if you don't have the time for that, and it's not secure enough, i
understand
21:33 < quinn> absolutely no mail
21:33 < quinn> er, email to me
21:33 <~elChe> mails if u want sup_g without headers
21:33 < quinn> mail is obv the actual content
21:33 <~elChe> remove headers and id references
21:33 < quinn> elche : yes exactly
21:34 <~elChe> choose the more lulzy ones
21:34 < quinn> well, mix with consequential ones
21:34 < quinn> or i won't have a story
21:34 <~elChe> 5 of them more some screenshots and PR will help waiting the pack
21:34 <~elChe> lulzy quinn means big burden
21:35 <~elChe> so i think consequential
21:35 < quinn> fair enough
21:35 <~elChe> hmm probably some porn reference eventually could happen
21:35 < quinn> sometimes lulzy means, you know, guy cheating on wife, which i
can't work with
21:35 < quinn> i would expect nothing less. :)
21:35 <~elChe> well aaron barr wife asking for divorce did it on colbert
report...
21:36 <~elChe> so ethics can be flexible sometimes..
21:36 < quinn> only because the way it happened was newsworthy and the content
supported it as well
21:36 <~elChe> yep i know i just wanted to mention aaron..
21:36 <~elChe> for the lulz u know
21:36 < quinn> *then* we can talk about the wife porn stuff
21:36 < quinn> aaron barr is inherently lulzy.
21:37 <@sup_g> elche without headers or stripping any mention of the target name
will be exceedingly difficult
21:37 < quinn> everything he did made that whole situation much much worse
21:37 < quinn> for him
21:37 <@sup_g> ~160GB
21:37 <~elChe> yep i know
21:37 < quinn> do what you can and no more. elche is right
21:37 <~elChe> but u just need to peek the most interesting ones
21:37 <~elChe> u find quickly

```

```

                                #lulzxmas.log
21:38 < quinn> i'm not going to be alone if i can help it for the next week
21:38 <~elChe> and then rip off the headers
21:38 <~elChe> not being alone means?
21:38 <~elChe> i ll bring barely legal models with u?
21:38 < quinn> meaning i'm scared of getting snapped up my LE
21:38 < quinn> heheh
21:38 <@sup_g> then honestly
21:38 <~elChe> oh that...
21:38 <~elChe> ok
21:38 <@sup_g> maybe calling it off is best for all parties =)
21:39 < quinn> sup_g i am probably just paranoid
21:39 <~elChe> sup_g we should bring waht is already ...ready to go wild
21:39 < quinn> and i'llbe damned if i'll let my own government stop me from
reporting events through mere paranoia of intimidation
21:39 <~elChe> and avoid mention too much about the other
21:40 <~elChe> that will be just fine
21:40 <~elChe> then we pick up some emails
21:40 < quinn> mainly if i get taken into custody or questioned i want to make
sure the world knows about it very quickly
21:40 <@sup_g> elche: that's fine then - mention of other targets, and no mention
of the big one till last minute
21:40 < quinn> that sounds good
21:40 <~elChe> juicy ones and we send it without headers just as previes
21:40 <~elChe> preview
21:40 <~elChe> previews
21:40 <~elChe> whatever
21:40 < quinn> i imagine the target is likely to recognize their own words though
21:41 < quinn> i imagine that's a factor in what and how you release
21:41 < quinn> as teasers
21:41 <@sup_g> yes it's going to be tricky
21:41 <@sup_g> again we have multiple targets, though
21:41 < quinn> right
21:42 <@uid0> quinn: You don't keep logs with this client, do you?
21:42 < quinn> oh fuck no
21:42 <@uid0> good
21:44 < quinn> or of im chats
21:44 < quinn> or basically anything where logging can be turned off
21:44 <~elChe> :( neither those romantic ones?
21:44 <~elChe> lol
21:46 <@uid0> we read enough romantic memos of you elChe. xD
21:46 <@sup_g> ^
21:47 < quinn> elche: they are ephemeral as the wind
21:47 < quinn> and live on only in my heart
21:47 < quinn> or whatever that organ is below the liver
21:48 <~elChe> hm seems another release coming on soon too
21:48 <~elChe> hahahah quinn
21:48 <@uid0> elChe: w00t?
21:49 <~elChe> not confirmed yet
21:49 <~elChe> quinn u mean your appendix?
21:49 <~elChe> is there the place for me?
21:50 <~elChe> or even lower..?
21:50 <~elChe> lol
21:52 <~elChe> ok guise not sure
21:52 <~elChe> but greenpeace
21:52 <~elChe> sorry
21:52 < quinn> there, or spleen
21:52 <~elChe> some guise bringing stuff also
21:52 < quinn> you'll always be welcome in my spleen
21:52 < quinn> spleen
21:52 <~elChe> thanks i guess
21:52 < quinn> gall baldder? better view
21:53 < quinn> now i'm just listing organs
21:54 <~elChe> hm ill took pancreas
21:54 <~elChe> i can mess many things from there
21:55 < quinn> aw, how sweet
21:55 < quinn> ba doom cha
22:00 <~elChe> quinn sup_g is working hard trying to finish something for u now
22:00 < quinn> thanks

```

```

#lulzxcmas.log
22:01 <~elChe> meanwhile, do u like champagne?
22:01 <~elChe> hahahha ok ill stop it
22:01 < quinn> but don't make me a priority
22:01 < quinn> safety and your own goals should come before the journo
22:01 <~elChe> quinn we know ppl want to stay away from work on xmas
22:01 <@sup_g> ok then in that case, I'd rather work on the PR late tonight, and
have everything ready tomorrow morning.
22:01 <~elChe> so u can take your time reading during this weekend
22:02 < quinn> and if you guise give me stuff and wired can't post it because my
ed is in fucking mexico i don't want you getting pissed at me:)
22:02 < quinn> ok
22:02 < quinn> i'm working through the holiday
22:02 < quinn> those lazy fuckers on salary are the ones that take vacations
22:02 <~elChe> i think it ll be ok cause we r readying shit
22:02 <~elChe> probably tomorrow we ll troll out and drop some info and
screenshots and shits
22:02 <~elChe> to heat up
22:03 < quinn> but i have my news director on the phone, and i'll tell him to log
in and approve my post tomorrow
22:03 < quinn> ok
22:03 <@sup_g> we're definitely dropping some shit tomorrow public, but it isn't
all ofit
22:04 < quinn> ok
22:08 <~elChe> ok we have the whole next week to start
22:08 <~elChe> xmas should see some drops
22:08 <~elChe> as teasers
22:08 <~elChe> so thats already covered more or less
22:09 <~elChe> we can advance something to quinn for this weekend and she could
ping editor then
22:09 <~elChe> and so then we ll still have the whole week to finish shits
22:10 <~elChe> brb cigarette
22:10 < quinn> ok, once i've got the pr and whatever you package, i'll, as i was
saying, start ruining my editor's xmas :)
22:11 <~elChe> hm
22:11 <~elChe> sounds good
22:12 <~elChe> so basically we r plotting here about ruining everyones xmas
22:12 <~elChe> lol
22:12 < quinn> anonygrinch
22:12 <~elChe> XD
22:18 <@uid0> Anon Operations, we do what we must because we can. For the good of
all of us, except the ones who are feds... *sings*
22:19 < quinn> heheheh
22:19 < quinn> coulton would be proud
22:20 <@uid0> A piece of writing from Topiary that almost nobody has seen:
http://pastebin.com/wasYak6g
22:20 <~elChe> hahah
22:20 < quinn> pastebin is down for me
22:21 <~elChe> because u live in a dictatorship
22:21 <~elChe> pastebin is fin
22:21 <~elChe> lol
22:21 < quinn> heh
22:21 < quinn> goog cache still works
22:22 <~elChe> still down?
22:22 <~elChe> i ll upload it if u cant get it
22:22 <~elChe> is pastebin censored on US?
22:23 < quinn> dunno
23:38 -!- quinn [quinn@kerpia-AF880741.hfc.comcastbusiness.net] has quit [User

23:42 <~elChe> uid0:
23:43 <~elChe> u there?
23:43 <@uid0> yes
23:43 <~elChe> someone snitched about str to BB
23:43 <~elChe> BB tweeted
23:43 <~elChe> we r screwed now
23:44 <@uid0> elChe: sup_g is talking to him
23:44 <~elChe> sup_g: cant get info about who leaked the info
23:46 <~elChe> ok so now we already lost wired
23:47 <~elChe> we dont know if any other copy of mails are going around

```

```

                                #lulzxmas.log
23:48 <~elChe> and strangely we got our dumpserver down one day before xmas
23:49 <@uid0> Also where's Discordian/HBAnon? Haven't seen him in some days.
23:49 <@sup_g> wel
23:49 <@sup_g> There are no other copies of mails floating around
23:49 <@sup_g> There is just a's server, and revsec's which I am currently
copying it to.
23:49 <@sup_g> But it's not complete yet.
23:50 <~elChe> pull out revsec
23:50 <~elChe> until we can understand better their game
23:50 <@sup_g> well, we do need a server
23:51 <@sup_g> it's copying as we speak, 20GB
23:51 <@sup_g> 10% done so far
23:51 <@sup_g> it'll be done late tonight.
23:51 <~elChe> hm
23:51 <~elChe> ok but i just said it
23:52 <@uid0> Sabu: Du you have any guess who might've told him?
23:54 <~elChe> ok something its not going clean here
23:54 <~elChe> so probably better i just step out

00:14 <~elChe> how?
00:14 <~elChe> dont know
00:15 <~elChe> he tweeted about it, cause ofc he cant keep his mouth closed
00:15 <~elChe> and here we re
00:15 <@alex> did he tweet the target
00:15 <@alex> ?
00:15 <~elChe> nop
00:15 <@sup_g> No, but he knows it.
00:15 <~elChe> just 2.4 millions mails
00:15 <~elChe> reference
00:15 <@alex> he should shut the fuck up
00:15 <~elChe> he cant
00:15 <~elChe> heroin guy
00:16 <@alex> ffs
00:16 <@alex> how did this happen
00:16 <~elChe> we dont know he doesnt want to say who the fuck told him
00:16 <~elChe> Sabu should ask him probably
00:16 <@alex> well its 2.7
00:16 <@alex> but its much worse that he knows the target
00:16 <~elChe> yep
00:17 <@sup_g> <wicked> update: all potential ppl who knew anything abt this at
all are solid on my end, with exception of jmc (not responding atm) and H (not
online atm)
00:17 <~elChe> he tweeted about those published tomorrow
00:17 <~elChe> so something stragne going on
00:17 <~elChe> to be published*
00:17 <@alex> well the 2.7 million number source was me
00:17 <@alex> i told you, sabu and anarch
00:17 <~elChe> hm
00:18 <~elChe> wait
00:18 <@sup_g> BB seems to say the source was quite close to the hack.
00:18 <~elChe> u said 2.7
00:18 <@sup_g> Even going as far as saying the one responsible for it
00:18 <@sup_g> BB said 2.4, btw.
00:18 <~elChe> hm
00:18 <@sup_g> <BarrettBrown> ... and while they continue to provide me with
info
00:19 <~elChe> i already said revolsec
00:19 <~elChe> 'they'
00:19 <~elChe> if it were us
00:19 <@alex> this is fucking retarded
00:19 <@alex> basically we were responsible for it

```

```

                                #lulzmas.log
00:19 <~elche> he wouldnt use 'they'
00:19 <@alex> and the revo sec fags
00:19 <@alex> in an early stage
00:20 <~elche> well i know there was some movement today in the revolsec camp
00:20 <~elche> i got snitch there too
00:20 <@uid0> Also we "lost" cz box for unknown reasons.
00:20 <~elche> but without details
00:21 <~elche> cz is backed up
00:21 <~elche> in worst case we reset vps
00:21 <~elche> and ill upload all again
00:21 <@alex> this kind of forced us
00:21 <@alex> to RM startfor now
00:21 <@sup_g> so we have choices now
00:21 <@alex> www,core,clearspace
00:21 <@sup_g> ride on them while we can?
00:21 <@sup_g> and *sh
00:21 <@alex> ^this
00:21 <~elche> hm...
00:21 <~elche> if we rm
00:21 <@sup_g> xmas coming early?
00:22 <@sup_g> it might jeopardize cards.
00:22 <~elche> we need to publish the whole thing
00:22 <@alex> we can rm them
00:22 <@alex> and say we are still evaluating the data
00:22 <~elche> as u want guise but CCs will be off
00:22 <@alex> will cause media attention upfront
00:22 <@uid0> even more leaks
00:22 <@uid0> Zardeath9 Zardeath9 by BarrettBrownLOL@
00:22 <@uid0> @BarrettBrownLOL it is hinted at by a few on G+ too so they can't
get but so angry
00:22 <@uid0> 13 minutes ago
00:22 <~elche> ofc we already spent 500 000$
00:22 <~elche> but well
00:23 <@uid0> in response to this
00:23 <@uid0> BarrettBrownLOL Barrett Brown
00:23 <@uid0> A couple of the #Antisec folks are mad that one of them told me
about the upcoming release. Expect some anti-Barrett stuff along with it.
00:23 <@uid0> 20 minutes ago
00:23 <@sup_g> well.
00:23 <@alex> >anti-Barrett stuff
00:23 <@sup_g> If we wait too long, name will get leaked.
00:23 <@alex> incoming
00:23 <@sup_g> Then it'll be too late.
00:23 <@sup_g> alex: that was a reference to something I said to him
00:24 <@sup_g> i'll pm you log if you like: I already pasted to our #antisec
00:24 <~elche> wtf?
00:24 <~elche> do i need to ping norton now?
00:24 <@uid0> BarrettBrownLOL Barrett Brown
00:24 <@uid0> @
00:24 <@uid0> @Zardeath9 They also told wired about it, apparently. There's a
reason one of their people got me involved.
00:24 <@sup_g> ended with exchange of insults and mild threats
00:24 <@uid0> 1 minute ago
00:24 <~elche> ok ok
00:24 <~elche> wait
00:24 <~elche> how the hell they know that
00:24 <@sup_g> I told him he fucked up our embargo with wired.
00:24 <@sup_g> In response to his 'offer' of getting NBC
00:25 <~elche> guise
00:25 <~elche> for gods sake
00:25 <~elche> can u stop talking to him
00:25 <~elche> his an attention whore
00:25 <~elche> and like all whores
00:25 <~elche> he ll keep crying and shouting out all he hears
00:26 <~elche> someone on pmpj
00:26 <@uid0> irc.projectpm.net?
00:26 <~elche> please go and tell BB that i said he stop whoring or i ll knock
him on his face

```

```

                                #lulzxmas.log
00:26 <@uid0> or what's his network?
00:26 <~elche> and he compromised our security
00:26 <~elche> and that really pisses me off
00:27 <@alex> we need sabu
00:27 <@alex> now
00:27 <~elche> yep we need Sabu now
00:27 <~elche> Sabu Sabu Sabu please wake up
00:27 <~elche> fuck
00:27 <~elche> is he on jabber?
00:27 <@alex> nope
00:27 <~elche> fuck
00:28 <@sup_g> ok well
00:28 <@sup_g> we need to make a decision
00:28 <@sup_g> I personally don't think we should wait until they disable our
ability to rm
00:29 <~elche> im down for wahtever u choose
00:29 <@sup_g> alex let's line this shit up in order then.
00:29 <~elche> first if we pwn now we lose CCs but
00:29 <~elche> its ok we already abused from them wild
00:29 <@alex> we should deface their mainpage
00:29 <@sup_g> my only real concern is that the press release is not quite
finished
00:29 <~elche> PR can wait
00:29 <@alex> we just deface it for now
00:29 <@alex> like
00:29 <@sup_g> with lulzxmas vid?
00:29 <@alex> "we are done. more incoming"
00:30 <~elche> defacement is a clear msg
00:30 <@alex> something like dat
00:30 <~elche> yep lulzxmas video
00:30 <@sup_g> ok can we get a screenshot or two of DHS/FBI making donations?
00:30 <@uid0> You ever played Half Life 1? First or second level is "Unforseen
consequences". ;)
00:30 <~elche> cocksec
00:30 <~elche> lol
00:30 <~elche> ok do u want quinn?
00:30 <@sup_g> k alex me and you
00:30 <@alex> "we finished our work you servers."
00:30 <@alex> something like dat
00:31 <@sup_g> xmas is coming early apparently
00:31 <@sup_g> i'll ready the html defacement
00:31 <@sup_g> should we order this shit?
00:31 <@alex> problem is we can RM
00:31 <@sup_g> first to rm: core, clearspace, www, then sh?
00:31 <@alex> if we want to deface
00:31 <@alex> can we?
00:31 <@sup_g> we can deface for literally 3-4 minutes
00:31 <@sup_g> long enough to get mirrored on zone-h
00:32 <~elche> no more than that?
00:32 <@alex> there has to be a way
00:32 <@alex> that allows defacing
00:32 <@alex> and rm'ing
00:32 <@sup_g> sure there is
00:33 <@sup_g> first we rm -rf /var/www/ or whatever
00:33 <@sup_g> wget our index.html
00:33 <@sup_g> submit to zone-h
00:33 <@sup_g> tweet
00:33 <@sup_g> then immediately rm -rf
00:33 <@sup_g> I can do this
00:33 <@alex> do it like that
00:33 <@sup_g> k.
00:33 <@alex> problem is rm'ing clearspace
00:33 <@alex> we dont have normal ssh session
00:33 <~elche> deface with lulzxmas video to recover the brand on our side
00:33 <~elche> lol
00:33 <@alex> and need to login with password
00:33 <@sup_g> k.
00:34 <@alex> you need todo that SSH_PASS

```

#lulzxcmas.log

00:34 <@alex> thing
00:34 <@alex> variable
00:34 <@alex> you sent me a few days ago
00:34 <@sup_g> ah yes
00:34 <@sup_g> HMMMMMMMMMM.
00:34 <@sup_g> we might want to line that up first to make sure that's possible.
00:35 <@sup_g> i'm gonna work on the defacement html real quick.
00:35 <~elche> i dont trust zone-h since they got subpoena so we need to shoot
the hell out on screenshots ourselves
00:35 <@sup_g> zone-h is fine
00:36 <@alex> just tweet it and people will
00:36 <@uid0> as long as you're behind over 9000 proxies. :p
00:36 <@sup_g> hey also
00:36 <~elche> ok
00:36 <@sup_g> we need to copy the mail offsite
00:36 <@sup_g> in case they go after your server really quickly
00:37 <@alex> they should not be able
00:37 <@alex> to find any reference to it
00:37 <@sup_g> elche, can you imagebin a screenshot of a DHS/FBI donation?
00:37 <@sup_g> which will also go in the defacement
00:37 <~elche> ok working now on that
00:37 <@alex> it shouldnt be a big defacement
00:37 <@alex> keep it simple
00:38 <@alex> give no information
00:38 <@alex> of what we gor
00:38 <@alex> *got
00:38 <@uid0> "More to come. Expect us!"
00:38 <@alex> ^something like dat
00:38 <@sup_g> I think at least one donation screenshot is fine.
00:38 <@sup_g> Lulzxcmas vid, cat /etc/shadow, and donation screenie
00:39 <@alex> /etc/shadow only imo
00:39 <@sup_g> maybe we should raid projectpm
00:39 <@sup_g> fuck bb
00:40 <@alex> i wonder if we should do nothing
00:40 <@sup_g> I dont' want to lose the ability to rm.
00:40 <@sup_g> Also,
00:40 <@alex> even if he tweets it
00:40 <@sup_g> if youll remember the sheriff hack
00:40 <@alex> true
00:40 <@sup_g> they wer edefaced / rm'd before the emails were delivered
00:40 <@sup_g> emails delivered a full week later
00:41 <@sup_g> in fact, the quotes and ridiculous speculations from the chiefs
made it all the more hilarious
00:41 <@sup_g> "I don't believe they got any sensitive info."
00:41 <@sup_g> etc
00:41 <@alex> yeah
00:41 <@alex> so dont show
00:41 <@alex> that we donated from their credit cards
00:41 <@alex> just give the the fact
00:41 <@sup_g> But some of that is happening tomorrow anyway, no?
00:42 <@alex> let it happen tomrrow then
00:42 <@alex> wait
00:42 <@alex> what exactly will happen tomorrow?
00:42 <~elche> i m readying the screenshots
00:42 <@alex> i am not up to date
00:42 <~elche> dhs and dia.mil
00:42 <@sup_g> A handful of screenies, a handful of cards
00:42 <~elche> both donation
00:43 <@sup_g> Possibly the entire specialforces addr/cc dump as well
00:43 <@sup_g> ~8000 cards
00:43 <@alex> well i dont want the cc's stratfor related for now
00:43 <@sup_g> And remember, we still have two aces in the hole, the other
targets set to go off on the 31st
00:43 <@alex> but its your decision
00:44 <@sup_g> well.
00:44 <@sup_g> I think no matter what we do, there will be wild speculation as to
what was on stratfor
00:45 <@sup_g> and I believe a full investigation will be underway pretty

```

                                #lulzmas.log
promptly, including FBI asking stratfor sysadmins as to what kind of data they
had
00:45 <@alex> ^this
00:45 <~elche> 8000 cards are enough i would say
00:45 <@alex> we need to rm dat shit
00:45 <@alex> really carefully
00:45 <@sup_g> let's line up commands ahead of time
00:45 <@sup_g> it'd be nice to shread logs first
00:45 <@alex> yeah dont just rm logs
00:46 <@uid0> kill them...but peacefully. (c) elche ;)
00:46 <@alex> ^^
00:46 <~elche> xD
00:46 <@sup_g> http://www.youtube.com/watch?v=BdqoSWtYPHE  <- is the one right?
00:46 <~elche> ok got quinn back
00:46 <~elche> yep that one sup_g
00:46 <~elche> if we do it
00:47 <~elche> she ll wake up his editor in dont know where
00:47 <~elche> fuck fuck with all this shit
00:47 <@alex> sup_g
00:47 <@sup_g> yes
00:47 <@alex> just shred everything
00:48 <@alex> fbi will probably take the servers
00:48 <~elche> yep shred is good
00:48 <~elche> or random ddd
00:48 <@alex> ^this
00:48 <~elche> dev random dd
00:48 <~elche> shred is slow
00:48 <@uid0> urandom is slow also
00:48 <@uid0> I have a really fast rng here
00:49 <~elche> zero is not good enough
00:49 <@sup_g> someone line something up that's good enough
00:49 <@sup_g> im making html
00:50 <@alex> my english is retarded
00:53 <@uid0> [REDACTED]
00:55 <@sup_g> tellas
00:55 <@sup_g> I have to leave soon
00:55 <@sup_g> hrm.
00:55 <@sup_g> how bad do you think if we wait ~15 hours?
00:56 <@sup_g> so we can do donations and defacement and rm -rf all at same time?
01:00 <@uid0> sup_g: Are you trying to evaluate the leak by telling to #antise?
^^
01:00 <~elche> hm ok
01:00 <~elche> idont want u post many screensthos
01:00 <@sup_g> hey elche
01:00 <@sup_g> maybe don't upload just yet
01:00 <~elche> many amazon shipping stuff to foundations
01:01 <@sup_g> just have it ready for tomorrow when we do this
01:01 <~elche> to land on 27 dec
01:01 <@uid0> Also we should hold back the emails for a week or so. 1) BBs claims
will show up as false 2) Speculations and lulz will ensue
01:01 <~elche> we should do it now
01:01 <~elche> we ll not have time for donations
01:02 <@alex> the mails
01:02 <@sup_g> Emails can't come tomorrow anyway
01:02 <~elche> and we risk if this got leaked before
01:02 <@alex> are not even close to ready
01:02 <@sup_g> Not ready
01:02 <~elche> donations will be cancelled soon
01:02 <@alex> they are like -100% done
01:02 <@uid0> heh, alright
01:02 <~elche> just defacement and rm
01:02 <@sup_g> alex: in all honesty, we could deploy the emails without
rendering.
01:02 <@sup_g> they are .eml files, can be dragged into thudnerbird etc
01:03 <@sup_g> html formatting is better, but not necessary
01:03 <@sup_g> also I have to split in 10, and don't want to do a rush deface/rm
job
01:03 <@sup_g> I can guarantee I will be online in ~15 hours for several hours to

```

```

                                #lulzxmas.log
make sure everything gets done.
01:03 <@sup_g> in the meantime, everything just stays between us five
01:03 <~elChe> hm
01:03 <@sup_g> and FBI here lol.
01:04 <~elChe> ok ok
01:04 <~elChe> hm
01:04 <@uid0> sup_g: Not really. You told #antisecc. :p
01:04 <@sup_g> well as far as specifics
01:04 <@sup_g> shit we been tweeting 'coming soon!!!' all week
01:04 <~elChe> we should just deface ...
01:04 <@sup_g> =(
01:04 <~elChe> or we risk someone else do
01:04 <@sup_g> not ready yet
01:04 <~elChe> ok but i just said it
01:05 <~elChe> if anything goes wrong at least we know about tit
01:05 <@sup_g> yeah
01:05 <@sup_g> well
01:06 <@sup_g> it is friday night, their IT people aren't on the box normally.
01:06 <@sup_g> only possibility is if BB does run his mouth about the target
01:06 <~elChe> nope i heard
01:06 <@alex> its almost fucking xmas
01:06 <~elChe> all ppl just went on holiday trip
01:06 <@alex> even if he says it right now
01:06 <@alex> we got at least 24hours
01:06 <@sup_g> yes
01:06 <@alex> probably more
01:06 <@sup_g> well if he says it, FBI will rush in probably
01:06 <~elChe> but we lose surprise
01:06 <@alex> hes not a srs source
01:07 <~elChe> agh
01:07 <@sup_g> all his bs aside, I somewhat don't think he will name the target.
01:07 <~elChe> i cant trust BB keeps his mouth closed...
01:07 <~elChe> its stronger than him
01:07 <@sup_g> well regardless, I can't stay to see this through this minute =(
01:07 <@sup_g> and maybe it'd be better to go with the donations and shit anyway
01:07 <@sup_g> we can do it live again
01:09 <@sup_g> are we good then? I gotta split
01:09 <@alex> yeah
01:09 <@sup_g> good luck all
01:09 <@uid0> stay safe sup_g
01:09 <@sup_g> I may pop in a few hours just for 15 minutes
01:10 <@sup_g> but can't stay
01:10 <@sup_g> <3
01:10 <@uid0> password is [REDACTED], so we know it's really you :p
01:10 <@sup_g> k.
01:10 <@uid0> xD
01:10 <@sup_g> ;D
01:11 <@alex> lulz
01:13 -!- sup_g [v@kerpia-430129C8.ipredator.se] has quit [Ping timeout]
01:14 <~elChe> agh
01:14 <~elChe> i just read the antisecc shit between BB and sup
01:15 <~elChe> i want to punch him so hard
01:15 <@uid0> BB?
01:15 <~elChe> have u read the same i did?
01:15 <~elChe> barrett
01:15 <@uid0> uhm, I think so.
01:15 <~elChe> waht assholes
01:15 <@uid0> I wanted to punch him for a long time now. :p

13:50 <~elChe> hi man
13:50 <~elChe> im fucking tired lol
13:50 <@sup_g> hah
13:50 <~elChe> but i ll be up during day ofc
13:50 <@sup_g> that sucks
13:50 <@sup_g> great
13:50 <@sup_g> because I have a good 5 hours as well
13:50 <@sup_g> stable net
13:50 <@sup_g> it's going down
13:50 <~elChe> cool
13:50 <~elChe> i m ordering new server
13:51 <@sup_g> great
13:51 <@sup_g> the other one went back up
13:51 <~elChe> filled ticket cause just found 120gb
13:51 <~elChe> i m asking for 250gb of hd quota
13:51 <~elChe> but i send them money already
13:51 <@sup_g> hmm well maybe they will do it with more money
13:51 <~elChe> they usually resolves my shits
13:51 <@sup_g> we don't necessarily have to release mail today
13:51 <~elChe> yep ofc
13:52 <~elChe> but i know it will take time to get it
13:52 <~elChe> so i started it
13:52 <@sup_g> we don't necessarily have to nuke the target, but maybe we should anyway
13:52 <~elChe> also cz is back
13:52 <@sup_g> yep on it now
13:52 <~elChe> not compromised
13:52 <@sup_g> this is good
13:52 <@sup_g> I can resume uploading and rendering mail
13:52 <@sup_g> I was thinking though
13:53 <@sup_g> maybe we shouldnt release ANYTHING on NY target yet
13:53 <@sup_g> at all even by new years, because we still could feasible get more mail, and it's deserving of a separate release anyway
13:53 <@sup_g> I havent' even tried half the logins to the various internal portals they have yet
13:53 <@sup_g> stuff like dcjs.ny.gov, ejustice.ny.gov, etc
13:54 <~elChe> hm ok
13:54 <@sup_g> the Cali target I have all lined up
13:54 <@sup_g> verified ready to own, too
13:54 <~elChe> but we need to give to post something
13:55 <~elChe> or just withdraw about all and make as nothing happened
13:55 <~elChe> but we risk about losing credibility
13:55 <@sup_g> you mean today?
13:55 <@sup_g> we can ride on them if we want
13:55 <@sup_g> do you want to see the release text? the intro and main target section is done and looking great
13:56 <~elChe> ok
13:57 <@sup_g> we may need to modify it slightly based on decisions regarding the cards
13:57 <~elChe> where u ll resume uploading sup_g ?
13:58 <~elChe> we didnt get the BB issue sorted yet
13:59 <@sup_g> he was told to keep his mouth shut
13:59 <@sup_g> and he got pissy
13:59 <@sup_g> he didn't announce target though right?
13:59 <@sup_g> even so, we may want to think about hitting it today anyway
13:59 <~elChe> do u know BB?
13:59 <@sup_g> i've chatted with him a few times but I've never worked with him
13:59 <@sup_g> or know him personally
14:00 <@sup_g> pm for release
14:01 <~elChe> BB always was a delusional guy with attentionwhorism syndrome
14:01 <~elChe> he cant keep his mouth closed
14:02 <@sup_g> yeah he fucked up majorly this time
14:02 <~elChe> he just cant do that, its stronger than him
14:02 <@sup_g> fortunately it doesn't seem to have compromised any plans
14:02 <~elChe> if ppl start fingering him
14:02 <@sup_g> yeah he really proved himself untrustworthy this time
14:02 <~elChe> about how he failed on his prediction
14:02 <~elChe> he ll open his mouth

#lulzxmas.log

14:02 <@sup_g> yes it's possible
14:03 <@sup_g> I think we should ride on their asses today anyway
14:03 <@sup_g> I'm itchin
14:03 <~elChe> i m fucking pissed off about the whole thing
14:03 <~elChe> that stupid junkie
14:03 <~elChe> blewed off all potential
14:03 <~elChe> to do a shitload of things
14:04 <~elChe> im fucking angry
14:04 <@sup_g> yeah it's bullshit
14:04 <~elChe> but now im considering
14:04 <@sup_g> even worse that he is keeping his mouth shut to us about who it was
14:04 <~elChe> we need to protect assets first
14:05 <~elChe> so angry or not angry we need to play chess
14:05 <~elChe> if he opens hi mouth just once again
14:05 <~elChe> we lost all cause sysadmin will just shut all down
14:06 <@sup_g> that's why we need to rm today
14:06 <@sup_g> they aren't working
14:06 <@sup_g> it will ruin their xmas
14:06 <@sup_g> even if we dont have data ready, it's probably our best bet
14:06 <@sup_g> it's possible they will try to get a working system up within a few days, but we may have leads back in anyway
14:07 <~elChe> they cant get their data back from us
14:07 <~elChe> thats simple
14:07 <@sup_g> yep =)
14:07 <@sup_g> in fact, their reaction and denials could be even lulzier
14:07 <@sup_g> see release, btw
14:10 <~elChe> reading
14:10 <~elChe> hm
14:10 <~elChe> when u ll post that PR?
14:10 <~elChe> supposedly?
14:10 <@sup_g> see that's the thing
14:11 <@sup_g> this text is sort of an "after the fact" type thing
14:11 <~elChe> cause it gives up about everything
14:11 <@sup_g> meant for the intro to the zine
14:11 <~elChe> ok
14:11 <@sup_g> if we are to use parts of it for something today, we have to remove some parts
14:11 <~elChe> hm
14:11 <~elChe> what if..
14:12 <~elChe> we rm strt, defacement
14:12 <~elChe> and then we take time for the rest
14:12 <@sup_g> oh yeah
14:12 <~elChe> that will bring hype
14:12 <@sup_g> also cali wasn't gonna go today or anything
14:12 <~elChe> and keep ppl holding on the zine
14:12 <@sup_g> it was just there because I'm done with an initial draft and someone else can work on it now
14:12 <@sup_g> the first two sections have been edited by several people
14:13 <@sup_g> I kind of like the idea of holding on and not posting any official announcement or anything
14:13 <@sup_g> and then come the first, we tell all
14:13 <@sup_g> we can just RM today and release a stream of teasers, maybe some users, maybe some cars
14:13 <@sup_g> ds
14:14 <~elChe> we need to take strat down
14:14 <~elChe> so we cant exorcise us from the risk of snitches
14:14 <~elChe> can*
14:14 <@sup_g> yep
14:14 <@sup_g> it's happening today
14:14 <~elChe> its like a thorn in our feet
14:14 <@sup_g> I ahve defacement lined up
14:14 <@sup_g> and also
14:14 <@sup_g> I wanted to spam the FUCK out of their user base
14:14 <~elChe> which ETA?
14:15 <@sup_g> whenever we want really
14:15 <@sup_g> alex will be back sometime soon he said
14:15 <@sup_g> then we'll do it

```

                                #lulzxmas.log
14:15 <@sup_g> maybe you can line up the teasers for today too
14:16 <~elChe> we need best timing about press
14:16 <~elChe> hold the lulzxmas video there cause today is xmas
14:16 <@sup_g> I think we should do it live on IRC.
14:17 <@sup_g> Im down to get on a channel and lead people on
14:17 <~elChe> and i got already the screenshots to use
14:17 <~elChe> i dont want to lose quinn on this
14:17 <@sup_g> yeah
14:17 <@sup_g> but even if we do, it's not biggest loss
14:17 <~elChe> or she ll never trust us again
14:17 <@sup_g> she's still covers hit after the fact, probably
14:18 <@sup_g> it'll probably just mean she won't be down to work with us on
prerelease shit
14:18 <~elChe> its ok
14:18 <~elChe> but we should get her checking when defacement will be done
14:18 <~elChe> and alive
14:18 <@sup_g> yes
14:18 <@sup_g> though we shouldn't have it alive for more than a minute or two
14:18 <@sup_g> just enough to zone-h and then tweet
14:18 <~elChe> yep
14:18 <~elChe> so its important timing
14:19 <@sup_g> yes
14:19 <@sup_g> we should get people hyped via twitter
14:19 <~elChe> ok
14:19 <~elChe> but we need to set ETA
14:19 <@sup_g> How much time you have? Cause I got enough time.
14:19 <@sup_g> I think 2 hours is an appropriate ETA
14:20 <~elChe> fine let me check all timezones for next 2 hours
14:21 <~elChe> hm its ok i think
14:21 <@sup_g> yes it's a good time
14:22 <@sup_g> Hrm.
14:22 <@sup_g> Hrm.
14:22 <@sup_g> uid0 must have changed the twitter pass
14:22 <~elChe> i asked him to do as security protocol during BB issue
14:23 <@sup_g> k
14:23 <~elChe> when we didnt know what happend to cz yet
14:23 <@sup_g> well if he dont' get on then we wont be able to tweet from main
one
14:23 <~elChe> i can tweet
14:23 <~elChe> using talkens
14:24 <@sup_g> ah ok that's still good then
14:24 <~elChe> i do all time
14:24 <~elChe> tokens
14:24 <~elChe> lol
14:24 <~elChe> i ll prepare tokens for you later
14:26 <~elChe> sup_g:
14:26 <@sup_g> yo
14:26 <~elChe> if we ll fucking do it
14:27 <~elChe> quinn can call nyc editor to prepare the terrain
14:27 <~elChe> article can be posted quickly then
14:27 <@sup_g> great
14:28 <~elChe> hm
14:28 <@sup_g> for the defacement all I got is:
14:28 <@sup_g> Merry Lulzxmas! Are you ready for a week of mayhem? h0h0h0h0h0
14:28 <@sup_g> the ulzxmas vid
14:28 <~elChe> i think when we r like half hour before
14:28 <@sup_g> # id; cat /etc/shadow; rm -rf /
14:28 <~elChe> she calls him
14:28 <@sup_g> and then a copy of the text of the article 'the coming
insurrection
14:28 <@sup_g> it'll be hilarious
14:28 <@sup_g> uid0 [uid0@all.day.every.day] has quit [Ping timeout]
14:29 <@sup_g> i'm gonna write some mass spam script too
14:29 <~elChe> and then we get her testifying she watched all happening on the
web
14:29 <~elChe> mean defacement and shits public
14:29 <@sup_g> yes
14:29 <@sup_g> also

```

```

                                #lulzxmas.log
14:29 <~elChe> sup_g: u need to devrandom the db containing CCs first
14:29 <@sup_g> we need to have an IRC base of operations
14:30 <~elChe> Sabu is not back to get antisecc back in anonops
14:30 <~elChe> i talked to owen
14:30 <~elChe> they r ok with us
14:30 <~elChe> even releasing some CCs
14:31 <~elChe> we could just ping out as common guise on anonops channel
14:31 <~elChe> the most popular one now
14:31 <~elChe> and troll em all
14:32 <~elChe> but we ll have tweeter anyway
14:33 <@sup_g> =)
14:33 <@sup_g> do they have webchat?

14:33 <@sup_g> Merry Lulzxmas! Are you ready for a week of mayhem? h0h0h0h0h0
14:33 <@sup_g> # id; cat /etc/shadow; rm -rf /
14:33 <~elChe> mibbit works sup_g
14:34 <~elChe> i tested it using opemmaa excuse
14:34 <@sup_g> ok as long as we are able to promote a channel via twitter
14:35 <@uid0> hu? Twitter is working fine!
14:35 <@sup_g> k i see pass is changed
14:35 <@sup_g> also uid0 do you want to look over the press
14:35 <@sup_g> if we are going to be releasing any statement today, we should
base it off this, but take certain parts out
14:36 <@sup_g> but we can probably just do with the rm -rf and the donations
14:36 <@uid0> oh yeah, changed pass as security measure yesterday
14:37 <@sup_g> and then we need to gt more servers in which to copy mail to
14:40 <~elChe> sup_g: need to know where u resumed uploading to?
14:40 <~elChe> if u r talking about mails
14:41 <@sup_g> oh yeah
14:41 <@sup_g> back to revsec's server
14:41 <@sup_g> duh
14:41 <~elChe> hm
14:41 <@sup_g> just fucking with you man
14:41 <@sup_g> no we need new servers asap
14:41 <@sup_g> I haven't tried copying it elsewhere since we killed the revsec
upload
14:41 <~elChe> i ordered them
14:42 <~elChe> i msorry about that sup_g but we need to see whats up outside
14:42 <~elChe> i didnt like all that story about BB
14:42 <~elChe> and who the fuck was giving the info around
14:42 <~elChe> we lost assets on this stupid story
14:44 <~elChe> before we had time on our side and now we r playing chess looking
the watch
14:44 <@sup_g> yeah
14:44 <@sup_g> it's all good though
14:44 <@sup_g> we're not in bad shape
14:45 <~elChe> ok i ll upload screenshots for you guise
14:45 <@sup_g> ok also
14:46 <@sup_g> we should dump at least a few hundred random cards straight out
14:46 <@sup_g> give kiddies somethign to play with
14:47 <@uid0> what's the Breanna Manning Support Organization? oo
14:48 <~elChe> uploading
14:48 <@sup_g> it's bradley manning

14:49 <~elche> check the screenshots
14:49 <~elche> i like that saying
14:50 <~elche> 'im in lesbians with u guise'
14:51 <~elche> hm its not there
14:53 <~elche> ok ill reupload them
14:53 <@uid0> sup_g: Actually I'd keep that statement for the 1st.
14:53 <@uid0> It's great in its current form and shouldn't be recut now.
14:53 <@sup_g> uid0 yeah that was the idea
14:53 <@sup_g> we don't really need to say anything more today anyway
14:53 <@sup_g> once target is known, let them speculate away
14:55 <~elche> reuploading
14:55 <~elche> same passwds than before
14:56 <@sup_g> yeah I was having trouble with it anyway

15:19 <@sup_g> Nice.
15:19 <@sup_g> Can we get them twitters going, hypin people up?
15:19 <@sup_g> Are we doing this still in like an hour or two?
15:21 <@uid0> If you wanna do it, I'll start to tweet now.
15:22 <~elche> have u seen the screenshots?
15:22 <@sup_g> We just need to decide a place
15:22 <@sup_g> elche, I haven't been able to open that 7z
15:22 <~elche> hm
15:22 <@sup_g> but its whatever, so long as we can put em up on imagebin or
whatever when the time comes
15:22 <~elche> paswd : [REDACTED]
15:23 <~elche> hm u r on mac
15:23 <~elche> use 7zx
15:25 <@sup_g> too lazy atm
15:27 <~elche> hahah
15:27 <~elche> 7zx is the most lazy app ever made
15:27 <~elche> well one of them...
15:27 <~elche> lol
15:28 <@sup_g> ok I am ssh'd into core
15:28 <@sup_g> we can ride on these piggies now if we like
15:28 <~elche> uid0: r u tweeting the hype?
15:28 <~elche> have u got my screenshot uid0 ?
15:29 <~elche> take that called dialulz
15:29 <~elche> and dhs
15:29 <@uid0> wait a sec
15:29 <@sup_g> we need a IRC as a public base of operations
15:30 <@sup_g> anonops? projectpm, 2600?
15:30 <~elche> anonops for gods sake
15:30 <~elche> projectpm my balls
15:30 <@uid0> password for wikisend not working elche
15:30 <@uid0> elche: which chan on anonops?
15:31 <~elche> im i anonops

15:32 <~elche> so forget about it
15:32 <@sup_g> theoretically we are ready to ride
15:32 <@sup_g> i'm rooted up ready to roll
15:32 <~elche> anonops channel most popular channel there
15:32 <~elche> so it ll be fine i guess
15:33 <@uid0> ok, do you have a mibbit link?
15:33 <~elche> wait
15:33 <@uid0> Also can't download those screens elche. lol101 is not working as pw
for me.
15:34 <~elche> ahg wait i ll tar them
15:35 <~elche> meanwhile post here the opemmaa link

17:45 <@sup_g> shred seems to take a long time
17:46 <@uid0> sure, depending on what you shred
17:46 <@uid0> It's reading from /dev/urandom afaik
17:47 <@sup_g> well it's shredding /opt/zimbra/log/* right now
17:49 <@sup_g> i'm just gonna let that along with /var/log/* run for a few minutes
17:49 <@sup_g> then just rm -rf with shred running in the background anyway
17:49 <@sup_g> theoretically it'll remain in memory and keep shredding
17:50 <@sup_g> this is core
17:50 <@sup_g> and www is the one we want to watch out for anyway

12:01 <~elChe> they screencasted the defacement
12:01 <@sup_g> nice
12:01 <@sup_g> reading now
12:02 <~elChe> also ioerror thumb'd up the incoming insurrection
12:02 <@sup_g> today we should drop more mayhem
12:02 <@sup_g> hah yes I knew it would be an appropriate choice
12:02 <@sup_g> it's a bit intellectual though
12:02 <@sup_g> in fact upon first notice it looks like a stratfor article
12:02 <@sup_g> I mail bombed the first 100,000 users in their users db as well

13:08 <~elChe> lol
13:08 <~elChe> thanks twtd
13:30 <@sup_g> hey
13:31 <@sup_g> now that they realize that the CC info is in our hands
13:31 <@sup_g> they'll start the cancellations and all
13:31 <@sup_g> so we might want to consider dropping some cards to public to wreak havoc
13:32 <@sup_g> also I think we should make demands and if they are not met by a certain time, we drop more info
13:32 <@sup_g> like 'drop sopa immediately or else we will dump 10k cards'
13:54 <@sup_g> fyi someloser cracked 52k of the user hashes so far
13:55 <@sup_g> it's kind of difficult to read and parse right now
13:55 <@sup_g> but I can merge it with the user list I have so far
13:55 <@sup_g> so it's more human readable
14:05 <~elChe> im pretty much sure
14:05 <~elChe> they r not able to cancel
14:05 <~elChe> massively
14:05 <~elChe> 90 000
14:06 <@sup_g> we have choices now
14:06 <@sup_g> Everyone's waiting for the data
14:06 <~elChe> and even to get db back
14:06 <~elChe> drop something
14:06 <~elChe> and make them wait for more
14:06 <~elChe> we need to get time again on our side
14:06 <@sup_g> I think we should make a demand. Like "If all charges against Bradley Manning aren't dropped by the end of the day, we will release 10,000 live credit cards"
14:07 <~elChe> hahahaha
14:07 <~elChe> so basically
14:07 <~elChe> drop the cards
14:07 <@sup_g> Yes.
14:07 <~elChe> but dont menace
14:07 <@sup_g> But make it look like they had a choice.
14:07 <~elChe> they ll came with the terrorist card
14:07 <@sup_g> "If SOPA and NDAA is not immediately retracted, we will drop 10,000 credit cards and addresses to DHS employees."
14:07 <@sup_g> who cares
14:07 <~elChe> we ll just drop and thats all
14:08 <@sup_g> I really think we should do some demands, maybe we can use softer language, but we need to make it look like they had a choice to comly
14:08 <~elChe> then we ll shoulld make them funny
14:08 <~elChe> like
14:08 <~elChe> drop charges agains manning and decret naked girls day

14:09 <~elche> or we ll drop cards
14:09 <~elche> or something like that
14:09 <@sup_g> decret?
14:09 <~elche> still we ll be on the humor fuzzy line
14:09 <@sup_g> Sure
14:09 <@sup_g> But have at least some concrete issue as well
14:09 <@sup_g> Mix them maybe.
14:10 <~elche> yep half serious half joking
14:10 <@sup_g> Great.
14:10 <~elche> to avoid being accused of terrorist radical crazy ppl
14:10 <~elche> we need to stay in lulz way
14:11 <@sup_g> Eh, theyll do that anyway but yeah.
14:11 <@sup_g> Hmmm.
14:11 <@sup_g> what to do what to do
14:11 <~elche> ask for manning
14:11 <~elche> mix with something funny
14:11 <~elche> like free Canada from US slavery
14:12 <~elche> with ETA of 2 hours and 4 bottles of beer
14:12 <~elche> and then we drop
14:12 <@sup_g> Yes
14:12 <@sup_g> And to show we are serious, we drop 1,000 cards just to kick it off.
14:12 <@sup_g> Good?
14:12 <~elche> exactly
14:12 <~elche> not need to give 10 000
14:12 <~elche> we drop in pack of 1000
14:12 <@sup_g> I'll clip up ~1000 cards in a .txt and upload now.
14:13 <@sup_g> So we release 1,000 cards, and then our "demand"
14:13 <~elche> mix the card as much as possible
14:13 <@sup_g> I'll use the non-private list.
14:14 <@sup_g> we'll start with the "A"s.
14:14 <@sup_g> Oh, maybe we can ask for a nice meal for Bradley Manning while he is in custody during xmas.
14:15 <~elche> whatever creative and original thing will be fine
14:15 <@sup_g> Twitter password?
14:15 <~elche> i dont have it
14:15 <~elche> i m using tokens
14:16 <@sup_g> hmm well asl long as you can tweet
14:16 <~elche> i preferred to lock down password utilizations
14:16 <~elche> and we use just tokens
14:16 <~elche> if something is compromised
14:16 <~elche> u can block the tokens from api twitter console
14:17 <@sup_g> that's a good idea
14:18 <@sup_g> tokens are essentially cookies, right?
14:21 <@sup_g> elche:
14:22 <@sup_g> <FreeEmAll> OK to use anonops for public mayhem again today via mibbit links?
14:22 <@sup_g> <evilworks> we can't handle it, no
14:23 <@sup_g> Also the As are 4000 records.
14:23 <~elche> yep happen yesterday
14:23 <~elche> happened
14:23 <@sup_g> Should we use another server?
14:23 <@sup_g> DUde, let's fuck over irc.2600.net

14:30 <~elche> sup_g:
14:30 <~elche> if want we can drop more
14:30 <~elche> but we should wait couples of hours
14:30 <~elche> its early
14:31 <@sup_g> I'm thinking we drop the As first, like right now, and then let it build more of a buzz for a few hours, like 4-5 hours, when our demand runs out.
14:31 <@sup_g> Then we drop B
14:34 <~elche> its too early
14:34 <~elche> ppl or is crashed on bed
14:34 <@sup_g> I'll upload a very brief statement to pastebin, and then wikisend a.tar.gz
14:34 <~elche> or is eating with their families

#lulzxmash.log

14:34 <@sup_g> Then some people are going to get some rather disturbing phone calls while they are eating with their family, when this list is dropped.
14:34 <@sup_g> People like A Aaronson
14:35 <~elChe> hm ok
14:35 <~elChe> but im seeing ppl is still discovering this shit
14:35 <~elChe> i d prefer it spreads lil bit more
14:36 <~elChe> but whatever
14:36 <@sup_g> well maybe we can wait 30-60 minutes till release
14:36 <@sup_g> Maybe shoot a tweet from @airc saying "In an hour, we will begin releasing live CCs"
14:36 <@sup_g> but better wording
14:36 <@sup_g> And we need a base of operations. irc.2600.net?
14:37 <~elChe> if we do that
14:37 <~elChe> we risk to CC
14:37 <~elChe> we risk to lost anonIRC
14:37 <@sup_g> hmm yes we can't do that, ever
14:37 <@sup_g> Can we retweet from another account?
14:38 <~elChe> but we can third partied it
14:38 <~elChe> like pastebin with all
14:38 <~elChe> and we just dropped like we heard about it
14:39 <~elChe> they would like an excuse to blow twt account out
14:39 <@sup_g> Good idea.
14:39 <~elChe> we need to keep fuzzy all
14:52 <@sup_g> How's this?
14:52 <@sup_g> How is everybody enjoying Lulzxmash so far? Did you enjoy the epic defacement and destruction of Stratfor's www, mail, clearspace and development servers? Hey George Friedman, did you ever figure out how much of your subscriber data was compromised yet? If you haven't yet, then allow us to clue you in.
14:52 <@sup_g> Attacked are ~4000 credit cards, md5 passwords, and home addresses to just a few of Stratfor's "private client list". Not as many as you expected? worry not, fellow pirates and robin hoods. These are just the "A"s.
14:52 <@sup_g> while the rich and powerful are enjoying themselves with all their bourgeois gifts and lavish meals, our comrade Bradley Manning is not having that great of a time in federal custody. Instead of being heralded as a fighter for free information and government transparency, he is criminalized, marginalized, and incarcerated, threatened with life imprisonment.
14:52 <@sup_g> we hereby demand that Bradley Manning be given a delicious meal this Lulzxmash, and no, not the "holiday special" in the prison chow hall. We want him out on the streets at a fancy restaurant of his choosing, and we want this to happen in less than five hours. If we don't, then we will see that every client of Stratfor that starts with a "B" will not be having all that great of a holiday season this year.
14:52 <@sup_g> *attached are ~4000
14:53 <@sup_g> Hmm, 2600 don't like tor anymore.
14:53 <@sup_g> Need another place.
14:54 <@sup_g> elche
14:54 <~elChe> sup_g: u need to leave clear
14:54 <~elChe> u rooted their servers
14:54 <~elChe> to differentiate us
14:54 <@sup_g> Ah ok.
14:54 <~elChe> no simple dump
14:54 <~elChe> u rooted all
14:54 <@sup_g> well, it doesn't necessarily take credit
14:54 <~elChe> yep ofc not
14:55 <@sup_g> But don't specify which servers?
14:55 <@sup_g> I guess that'll all be told in the zine .txt anyway.
14:55 <~elChe> but its a clear message to avoid potential drama
14:55 <~elChe> u got the dump
14:55 <~elChe> u rooted all

14:57 <~elChe> i know we dont give a fuck aabout it
14:57 <~elChe> but not good for public relationships
14:57 <@sup_g> OK, then maybe we don't have to say "what we will do if we don't
get our demands"
14:57 <@sup_g> what we will do is somewhat implied anyway
14:57 <~elChe> yep
14:57 <~elChe> avoid the menace
14:58 <~elChe> just a simple modest petition
14:58 <@sup_g> we hereby demand that Bradley Manning be given a delicious meal
this Lulzxmas, and no, not the "holiday special" in the prison chow hall. we want

15:01 <~elChe> the rest
15:01 <@sup_g> k
15:01 <~elChe> not the five hours part
15:02 <~elChe> the menace will be implicit
15:02 <~elChe> when we start dropping shits
15:02 <~elChe> smart ppl d be able to read between lines
15:07 <@sup_g> OK, I secured a channel on irc.2600.net.
15:08 <@sup_g> Is that where we should have our party?
15:08 <~elChe> mibbit link?
15:08 <~elChe> i m not sure about irc this
15:08 <~elChe> probbly just drop on tweeter
15:09 <~elChe> but if u r convinced lets do it
15:09 <@sup_g> Sure.
15:09 <@sup_g> Let's do this.
15:09 <~elChe> keep in mind 2600 will shut us down quickly
15:09 <@sup_g> I just asked.
15:09 <~elChe> and we ll give away all ips
15:10 <~elChe> they ll give away all IPs related to
15:10 <~elChe> i mean
15:10 <@sup_g> hmm yes no hostmasks I see.
15:10 <~elChe> its ok for us
15:11 <~elChe> but no for the common internet troll logging there
15:11 <~elChe> we ll get them on prison
15:11 <@sup_g> yeah maybe it's better if we didn't then.
15:11 <@sup_g> crypto? or is that too close to home.
15:12 <~elChe> ask joepie
15:12 <~elChe> if he agreed its ok
15:12 <~elChe> if not we can just tweet and see how it spreads as fire
15:12 <@sup_g> The heat's probably too rough.
15:12 <~elChe> personally im sure we ll get better results on twt than irc
15:13 <~elChe> but if u want both
15:13 <~elChe> for the lulz
15:13 <~elChe> its just fine
15:13 <@sup_g> Let's invade projectpm. Fuck em.
15:13 <~elChe> no no no no
15:13 <~elChe> then BB will start braggin
15:13 <~elChe> about it
15:14 <@sup_g> Is that really a problem?
15:14 <@sup_g> Let him take the heat if he wants it.

15:16 <@sup_g> yes.
15:16 <~elChe> wait i ll lurk there
15:16 <~elChe> it accepts tor?
15:17 <@sup_g> Yes.
15:17 <~elChe> ok
15:17 <@sup_g> It's probably our best bet.
15:17 <@sup_g> Sent twitter invite?
15:17 <~elChe> wait i ll lurk lil bit there now
15:17 <@sup_g> I just reg'd #lulzxmas
15:18 <~elChe> ok
15:19 <~elChe> hm
15:19 <~elChe> is it irc.projectpm.org?
15:19 <~elChe> cant get there
15:20 <@sup_g> irc.project-pm.org +6697
15:28 <@sup_g> well
15:28 <@sup_g> maybe we should just stick to twitter
15:28 <@sup_g> we can chill there, but maybe it would bring unnecessary heat
15:29 <~elChe> i think better to avoid drama whoring and cocks
15:29 <@sup_g> yeah
15:29 <@sup_g> well
15:29 <~elChe> to stick on twitter to be honest
15:29 <@sup_g> I'm about to pastebin the statement and links ot the archive
15:29 <@sup_g> Ready to roll?
15:29 <~elChe> do u get some screenshot about donations?
15:29 <~elChe> i can repack on tar them
15:30 <@sup_g> Actually,
15:30 <@sup_g> Can we upload to our .onion, the screenies?
15:30 <~elChe> yep sure
15:30 <~elChe> is that cz?
15:30 <@sup_g> wait hmm.
15:30 <@sup_g> yes
15:30 <@sup_g> Maybe we should not do that .onion for the CC stuff.
15:30 <~elChe> ok i ll put them on your home
15:30 <@sup_g> Increases the heat. Imagebin?
15:30 <~elChe> ok ok
15:30 <@sup_g> Either way, I'll link to a few in the statement, if you get a few
online.
15:30 <~elChe> i can upload some to imagebin
15:31 <~elChe> and give u links
15:31 <@sup_g> sure go
15:31 <@sup_g> =)
15:31 <~elChe> ok working on that
15:31 <~elChe> are u 'o' there on projpm?
15:31 <@sup_g> yes
15:32 <~elChe> i ll troll lil bit to stir things
15:37 <@sup_g> elche you lining up the screenies?
15:38 <@sup_g> I can link to a few of them in this statement.
15:39 <~elChe> yep sure im choosing now them
15:39 <~elChe> i ll now upload them and give u the links
15:39 <@sup_g> k
15:40 <~elChe> hey waths that u posted on projpm?
15:40 <@sup_g> the "A" list.

```

15:47 <@sup_g> elche
15:48 <@sup_g> you got screenies?
15:48 <~elChe> yep done
15:48 <~elChe> links
15:48 <@sup_g> =)
15:48 <@sup_g> plz.
15:48 <~elChe> <http://imagebin.org/>
15:48 <~elChe> <http://imagebin.org/>
15:48 <~elChe> <http://imagebin.org/>
15:48 <~elChe> <http://imagebin.org/>
15:49 <~elChe> <http://imagebin.org/>
15:49 <~elChe> thats all for now
15:49 <@sup_g> k.
15:49 <@sup_g> pastebin'n now
15:50 <~elChe> ok post on project pm to keep an eye on twitter
15:50 <~elChe> i ll do same on anonops
15:51 <@sup_g> <http://pastebin.com/>
15:51 <~elChe> oh wait agh
15:51 <~elChe> one of them should say
15:51 <~elChe> thank you <3 fbi
15:51 <~elChe> but imagebin didnt parse it
15:51 <@sup_g> hmm
15:51 <@sup_g> it's not that big of a dael
15:51 <~elChe> i ll reupload
15:51 <@sup_g> you can do it via tweet
15:51 <~elChe> hm ok
15:51 <~elChe> ok nvm then
15:52 <~elChe> lets do it
15:52 <~elChe> give me link
15:52 <@sup_g> tweet first?
15:52 <@sup_g> or paste in channels
15:52 <@sup_g> <http://pastebin.com/>
15:52 <@sup_g> it contains the archive links in there
15:52 <~elChe> tweet first but at the same time we said that on irc
15:52 <~elChe> i ll keep the tweet hold
15:52 <~elChe> ok?
15:52 <@sup_g> yep
15:52 <@sup_g> i'll just paste in irc
15:53 <~elChe> oh on
15:53 <~elChe> wait
15:53 <~elChe> can u add ascii art
15:53 <@sup_g> wait?
15:53 <~elChe> letters for lulzxmas
15:53 <@sup_g> shit I gotta split for 30 minutes
15:53 <~elChe> hm ok i ll tweet it like that then...
15:53 <@sup_g> maybe with the B list
15:53 <@sup_g> let's just dump this now
15:53 <@sup_g> and let it build
15:53 <~elChe> ok
15:55 <~elChe> tweeted
15:55 <@sup_g> ;D
15:55 <@sup_g> phase 1
15:57 <~elChe> lol 4000 ccs?
15:57 <~elChe> hahahaa
15:57 <@sup_g> Oops hah.
15:57 <~elChe> next time just a bunch of 1 000
15:57 <~elChe> so we can do it more frequently
15:57 <@sup_g> K.
15:58 <~elChe> ok now lets see what happens at twitter
15:58 <@sup_g> bb1
15:58 <@sup_g> 30-45
15:59 <~elChe> ok
16:00 <~elChe> hmm
16:00 <~elChe> wtf is this
16:00 <~elChe> Anontastic Anon y mouse
16:00 <~elChe> #Stratfor.com is still "undergoing maintenance" almost 24 hours
later. "Please check back soon." Ouch. Burn. #lulzxmas
16:00 <~elChe> sup_g ^

#lulzXmas.log

16:21 <@sup_g> back
16:30 <~elChe> hi sup_g
16:30 <~elChe> lol
16:30 <~elChe> i m being nice this xmas
16:31 <@sup_g> =)
16:31 <@sup_g> ok also
16:31 <@sup_g> I am talking to johnmccain
16:31 <@sup_g> and figured out the BB situation.
16:31 <@sup_g> apparently him, hydr, and BB talked about stratfor two months ago
16:31 <@sup_g> strategized about it before we were ever involved
16:36 <~elChe> ok
16:36 <~elChe> 2 months to strategize it....
16:36 <~elChe> lol i love our timings
16:37 <@sup_g> I mean,
16:37 <@sup_g> Looking back, I don't think it was inappropriate for them to
converse with BB about it.
16:37 <@sup_g> Converse with him two months ago about it, that is.
16:37 <@sup_g> Fault is still BB for trying to hint it, for fame purposes
16:37 <~elChe> cause they r newfags and dont understand many subtle things going
under the bridge
16:38 <~elChe> we r full of attention whorem, feds, snitches and more
dangerous..spooks
16:38 <~elChe> an ppl seems not understanding how the whole shit interacts
16:40 <@sup_g> wicked said they have never had a leak or breach or shit like this
happen before.
16:40 <~elChe> hahaaha
16:40 <~elChe> li_llet Alex Lillo
16:40 <~elChe> @
16:40 <~elChe> RT @AnonymousIRC Merry #LulzXmas, someone just gave us this
pastebin.com/bQ2YHDDw #Anonymous #AntiSec ==> OWNED como una catedral. LOLXMAS!
16:41 <~elChe> hm
16:42 <~elChe> sup_g: do u think they got the emails..
16:42 <~elChe> so that cause the difference
16:42 <~elChe> 2.4 to our 2.7
16:42 <@sup_g> No way for them to get the emails.
16:42 <@sup_g> Impossible, unless they leached it off the source itself.
16:42 <@sup_g> It only copied ~20GB out of ~160GB
16:42 <@sup_g> And I wasn't talking to any of them while I was doing it
16:42 <~elChe> ok ok but i meand they dumped the emails before
16:43 <~elChe> revolve
16:43 <@sup_g> Did they?
16:43 <~elChe> dont know
16:43 <@sup_g> My understanding is that they never have.
16:43 <@sup_g> They never have had any direct access to any of the boxes.
16:43 <~elChe> how then
16:43 <@sup_g> Until we came around.
16:43 <@sup_g> They had remote mysql root logins.
16:43 <~elChe> they started planning something they didnt own
16:43 <@sup_g> I'm talking to johnmccain now
16:43 <@sup_g> well, they did find the initial breach, and get the initial data
16:43 <~elChe> be discrete
16:43 <~elChe> we never know
16:44 <@sup_g> And strategized amongst themselves and told BB about it
16:44 <@sup_g> I don't think there's too much wrongdoing here, except on the part
of BB for running his mouth about an op that he wasn't involved in.
16:44 <~elChe> how did they know there were 2.4 mil of them?
16:45 <@sup_g> hmm
16:47 <~elChe> next teaser u prepare
16:47 <~elChe> leave it clear u rooted the fuck out from them
16:47 <@sup_g> hmm?
16:47 <@sup_g> don't mention that they were rooted?
16:48 <~elChe> not in the last one we just tweeted
16:48 <~elChe> i mentioned in a tweet yesterday
16:48 <~elChe> with the main screenshot
16:48 <@sup_g> So we should mention that they were rooted and rm'd to fuck?
16:48 <~elChe> i think its clear but i should prefer we insist so it s really
stated without doubts
16:49 <~elChe> at least until zine

#lulzmas.log

16:49 <@sup_g> K.
16:49 <@sup_g> So say that we rooted all four servers.
16:49 <~elChe> i m sure many ppl will understand u rm d
16:49 <~elChe> so probably u needed escalated privileges
16:49 <~elChe> but not the common of ppl
16:49 <~elChe> better to keep things clear in that case
16:50 <@sup_g> I'll even paste the uname -a of core, which is a newer kernel, and
not vulnerable to any public sploits.
16:50 <~elChe> cool
16:50 <@sup_g> also, the news is now finally starting to pour in like fuck
16:50 <~elChe> prepare something nice that a normal geek can understand but also
someone like ioerror
16:50 <~elChe> could
16:51 <@sup_g> Hmmmmm.
16:51 <@sup_g> I mean, a lot of that is in the zine..
16:51 <~elChe> yep but meanwhile theres main hype on this
16:55 <~elChe> i m seeing the news
16:55 <~elChe> mainly they r reposting from AP
16:55 <@sup_g> yes
16:55 <@sup_g> maybe there will be more coverage later regarding the 4000k cards.
16:58 <~elChe> hmm at least we got
16:58 <~elChe> top stories on google news technology
17:28 <@sup_g> also elche
17:28 <@sup_g> they are still offering that revsec server to host
17:28 <@sup_g> what is the danger at this point in doing so?
17:28 <@sup_g> we could use all the servers we can get, really.
17:30 <~elChe> imho opinion better to hold on it
17:30 <~elChe> theres already a server being deployed
17:30 <~elChe> with mails
17:30 <@sup_g> We can still choose when to release
17:30 <~elChe> and 2 more coming soon
17:30 <@sup_g> We'll need more than 1 for sure
17:30 <@sup_g> Hmm ok.
17:30 <~elChe> we could get revolsec server to mirror
17:31 <~elChe> once we release publicly
17:31 <~elChe> but to keep the timing on our side
17:31 <~elChe> best to keep it quiet
17:31 < Sabu> yo yo
17:31 <@sup_g> k
17:31 <@sup_g> that's a good plan
17:31 <@sup_g> sup dawg
17:31 <~elChe> hi Sabu
17:32 <~elChe> once we release publicly
17:32 <~elChe> or 'Abu' now
17:32 <~elChe> lol
17:32 <@sup_g> lol.
17:34 < Sabu> whoa the_ut is out?????????????
17:34 < Sabu> thats the man right there
17:34 <@sup_g> yep =)
17:34 <@sup_g> in a halfway house.
17:34 <@sup_g> gonna give him props in zine release
17:34 <@sup_g> in new york, actually.
17:34 <@sup_g> he did time in seattle
17:36 <~elChe> same, AP
17:36 <~elChe>
<http://online.wsj.com/article/SB10001424052970203479104577120530217909036.html>
17:37 <~elChe> hey
17:37 <~elChe> from evilworks
17:37 <~elChe> [REDACTED]
17:38 <@sup_g> someloser gave me a 52k list so far
17:38 <@sup_g> I am actually writing a quick script that takes his and evilworks'
results and merges it with our users and CC lists.
17:39 < Sabu> ut's in new york?
17:39 < Sabu> I should run into him by accident
17:39 < Sabu> find out where the niggas at
17:39 <@sup_g> You might.
17:39 <@sup_g> He's at the halfway house.
17:39 < Sabu> looking it up now

17:39 < Sabu> sec

17:39 <@sup_g>

www.bop.gov/

17:40 < Sabu> brooklyn nice. hmm

17:40 < Sabu> I know in the mornings he probably has to travel to some sort of program as a condition of him staying in that house

17:41 < Sabu> best bet would be to catch him in the mornings

17:41 <@sup_g> Careful, homeboy.

17:41 <@sup_g> For a number of reasons.

17:41 < Sabu> got you

17:42 < Sabu> sneak that nigga my v mask haha

17:42 <@sup_g> hey also

17:42 <@sup_g> someone named miscreant is on anonops

17:42 <@sup_g> was chatting with him lightly bout oldschool IRC days

17:43 <@sup_g> and he said if I see you, tell you to hit him up

17:43 < Sabu> mhm

17:43 < Sabu> word

17:46 < Sabu> yo my nigga are we going to strictly spend these few days working on stratfor releases or are we also gonna drop those other firms we got/

17:46 <@sup_g> On the 30th or 31st, we'll hit the cali cops

17:46 <@sup_g> possibly NY cops too, though I was considering holding all of the NY shit for another future release

17:48 < Sabu> well that kid "god" keeps hitting me up every day. hes the one that owned advocacy.nyc.gov. I'm kind of pissed off that he dropped dump without telling us first

17:49 <~elChe> oh i thought 31 was a good time for it

17:49 < Sabu> because theres logins in there and I think we could have ended up uploading a shell onto it

17:49 < Sabu> and owning it

17:49 <@sup_g> Yeah, that would have been big.

17:49 <@sup_g> See, that's the concern with the NY data we have.

17:49 <@sup_g> I have not even tried a few of the logins yet.

17:49 <@sup_g> To ejustice.ny.gov and dcjs.ny.gov.

17:50 < Sabu> mhm

17:50 <@sup_g> The california target, however, is all wrapped up ready to go.

17:50 <~elChe> well i dont see any hurry now...

17:50 < Sabu> alex says cincom is ready to go as well

17:50 <~elChe> i mean for nyc

17:50 < Sabu> you're right elche

17:50 < Sabu> btw

17:51 <~elChe> also we can play longer with stratfor if its worth

17:51 < Sabu> have you guys had the chance to speak to palladium/

17:51 <@sup_g> ready to go?

17:51 <@sup_g> shit I thought there was more work

17:51 <@sup_g> never

17:51 <~elChe> that cause i d prefer to dont mirror the mails on revolve yet

17:51 < Sabu> nigga says pwnsauce turned 100% full informant after he got arrested

17:51 < Sabu> thats crazy

17:51 <~elChe> cause the tell everything to mama and mama leaks to french dgse intel

17:52 < Sabu> mama is french intel yes?

17:52 <~elChe> yep

17:52 < Sabu> he/she reminds me of testeux1 that french assbat

17:52 <~elChe> not agent tho

17:52 <~elChe> civilian contractor

17:52 < Sabu> how'd you know this/

17:53 <~elChe> psychollogist

17:53 <~elChe> yehezkel was after her long time

17:53 <~elChe> he told he never liked the way she manipulated french side

17:53 <~elChe> but i dont know anything about french anon

17:53 <~elChe> so i hint some contact i have

17:54 <~elChe> to confirm dgse has someone working on us

17:54 <~elChe> and so

17:55 <~elChe> lol she was lurking sup_g and she almost got him

17:55 <~elChe> xD

17:55 <~elChe> ahahahahah

17:55 <~elche> sorry sup_g
17:55 <~elche> but its funny
17:56 <~elche> but she knows how to do it, i know
17:56 <@sup_g> hah she ain't get shit
17:56 <@sup_g> I never talked to her about anything except freeanons
17:57 <~elche> yeah i know just annoying u
17:57 <@sup_g> she said she was an anarchist
17:57 <~elche> hahahah
17:57 <~elche> yeah sure...
17:57 <@sup_g> and the other freeanons peeps are cool
17:57 <@sup_g> also anarchists
17:57 <@sup_g> like vanzetti, nix
17:57 <@sup_g> they good ppl
17:57 <~elche> vanzetti is good ppl
17:58 <~elche> her work is about lurking infiltrate earn confidence
17:58 <~elche> and leak
17:58 <~elche> profile
17:58 <~elche> if i m commie
17:58 <~elche> she ll say shes commie and so
17:59 <@sup_g> well I dont' fall for shit like that, considering that's half my
other line of work
18:04 < Sabu> wait
18:04 < Sabu> mama tried socialing sup_g
18:04 < Sabu> lolol
18:04 < Sabu> when the fuck this happened
18:05 <@sup_g> I work with freeanons, make flyers, their website, etc
18:05 <@sup_g> mama is one of the main people there
18:05 <@sup_g> I had no idea she was french intel
18:05 <@sup_g> Still confused and baffled by it.
18:05 < Sabu> yeah
18:06 < Sabu> theres a lot of intel people running around
18:06 < Sabu> and you know wat I noticed
18:06 < Sabu> a lot of them are french
18:06 < Sabu> it baffles me
18:06 < Sabu> why are french intel on us so bad?
18:06 < Sabu> its not like we have done serious work in france
18:06 < Sabu> it almost motivates me to start working on french government
18:06 < Sabu> mama is definitely not the only one
18:07 <~elche> Sabu, cause 2012
18:07 <~elche> sarkozy playing re election
18:07 <~elche> and many red light about anonymous breaking into french elections
then
18:08 <~elche> also cause tunisia and egypt and libya etc
18:09 <~elche> we fucking ruined france diplomatics in front of tunisian ppl
18:09 <~elche> since then we got lurkers probably
18:10 <~elche> then france pushing NFZ same time than us
18:10 <~elche> for libya
18:10 < Sabu> makes sense
18:11 < Sabu> so shall we fuck sarkozy's shit up for the 2k12
18:11 <~elche> i m sure we dont need to care
18:11 <~elche> surely pro-socialist hackers will do that
18:11 <~elche> and endorse that to us
18:12 <~elche> if not them green party ones will do
18:12 <~elche> for gods sake hahahahhaa like half france will do it probably
18:13 <@sup_g> yeah fuck sarkozy
18:14 <~elche> greenpeace ones for sure lol hahaha
18:15 <~elche> sarkozy protected edf when they were investigated cause the paid
for hacking greenpeace servers
18:16 <~elche> and german piratenparty didnt forget he pressed bka to seize
piratenpad
18:16 <~elche> lol
18:16 <~elche> i guess we ll get fun on those elections
18:21 < Sabu> <http://www.worldstaruncut.com/uncut/41273> this bitch is fire
18:21 < Sabu> yo my nigga I'd beat that for hours
18:22 <@sup_g> elche: what's the ETA on releasing the "B"s?
18:22 <@sup_g> maybe another hour or two?
18:23 <@sup_g> you damn dirty dog sabu
18:25 <~elche> yep

#lulzmas.log

18:25 <~elChe> 2 hours seems nice
18:26 <~elChe> looking at the mayhem provoked
18:26 <~elChe> i think its underexploited
18:26 <~elChe> if u ll release another pastebin
18:26 <~elChe> include also about the 1 000 000 dollars total donation
18:27 <~elChe> sabu mentioned yesterday
18:27 <~elChe> to back his affirmation
18:28 <~elChe> mention something like 1 000 000 made randomly low amounts
18:28 <@sup_g> k
18:28 <@sup_g> maybe a few more screenies?
18:28 <@sup_g> k.
18:28 <~elChe> not needed
18:28 <~elChe> nobody will question that currently
18:28 < Sabu> ryan clearly just sent me a message; <http://paste2.org/p/1839638>
18:28 < Sabu> he's saying he didn't snitch on lulzsec
18:32 <@sup_g> "when the press reported 'cooperation', it was just a copypasta of what his lawyer stated in open court. The cooperation was him shutting down his botnet with the police and letting them have his e-mail accounts, IM accounts, stuff like that. He cooperated in everything they asked, but he didn't know anything about Topiary or Kayla to snitch about"
18:32 <@sup_g> gave access to his emails and ims? well shit
18:32 <@sup_g> the whole posting full host info on anonops users is enough to want to never ever work with him
18:35 <~elChe> hm
18:35 < Sabu> I'm talking to ryan clearly right now
18:36 < Sabu> hes on irc
18:36 < Sabu> copping a plea to me
18:36 < Sabu> telling me I hurt him
18:36 <~elChe> yep he digged his own hole
18:36 < Sabu> and thanks me for not lettin him into lulzsec
18:37 <~elChe> i feel bad for him but he build out all the reasons to make ppl hating him
18:37 <@sup_g> its true
18:37 <~elChe> nobody is getting mad cause other one snitched as much as when he did
18:38 < Sabu> 18:36 <rdw> until they saw my chat windows
18:38 < Sabu> 18:36 <rdw> they dont have logs, they had open windows
18:38 < Sabu> 18:36 <rdw> they literally raided me as i was talkin to him
18:38 < Sabu> 18:36 <Sabu> damn
18:38 < Sabu> 18:36 <Sabu> I feel bad for topiary. his life erally got fucked behind all this
18:38 < Sabu> 18:36 <rdw> i always had the hope that
18:38 < Sabu> 18:36 <rdw> hes good man
18:38 < Sabu> 18:36 <rdw> hes only got
18:38 < Sabu> 18:36 <rdw> conspiracy charges
18:38 < Sabu> 18:36 <rdw> he'll get away with it
18:38 < Sabu> 18:36 <Sabu> and it was thanks to that m_nerva leak
18:38 < Sabu> 18:36 <Sabu> it gave away too much info
18:38 < Sabu> 18:36 <rdw> its because he ran the twitter
18:38 < Sabu> 18:36 <Sabu> you should have not let it happen
18:38 < Sabu> 18:37 <rdw> yeah
18:38 < Sabu> 18:37 <rdw> i wish i did things differently
18:38 < Sabu> 18:37 <Sabu> me too
18:38 < Sabu> 18:37 <rdw> but you know, we were business partners
18:38 < Sabu> 18:37 <rdw> i still told you all about it though
18:38 < Sabu> 18:37 <rdw> as it was happening
18:38 < Sabu> 18:37 <Sabu> I know this
18:38 < Sabu> 18:37 <rdw> topiary will be fine
18:38 < Sabu> 18:37 <Sabu> but that leaked ended up getting topiary/recursion/neuron/pwnsauce arrested
18:38 < Sabu> 18:37 <rdw> im the worse off i think
18:38 < Sabu> 18:37 <rdw> idk what they have on kayla
18:38 < Sabu> 18:37 <rdw> but from
18:38 < Sabu> 18:37 <Sabu> m_nerva is as bad as adrian lamo my nigga
18:38 < Sabu> 18:37 <rdw> off the record convos with the police
18:38 < Sabu> 18:37 <rdw> topiary didnt wipe anything
18:38 < Sabu> 18:37 <rdw> which got him fucked mroe
18:38 < Sabu> 18:37 <rdw> he had the press releases and stuff

#lulzxcmas.log

18:38 < Sabu> 18:37 <Sabu> :/
18:38 < Sabu> for those that dont know ryan helped m_nerva leak that #pe log
18:38 < Sabu> that gave away maaaad info on our sony hacks
18:40 <~elChe> hm
18:40 < Sabu> 18:39 <Sabu> did them niggas ask about me/
18:40 < Sabu> 18:39 <rdw> i dont expect you to trust me
18:40 < Sabu> 18:39 <rdw> anyone who has been v&
18:40 < Sabu> 18:39 <rdw> shouldnt be trusted anymore
18:40 < Sabu> 18:39 <rdw> i know i have no place in the game anymore
18:40 < Sabu> 18:39 <rdw> yeah
18:40 < Sabu> 18:39 <rdw> once they found out about my lulzsec connection
18:40 < Sabu> 18:39 <rdw> i told them about xavier de leon
18:40 < Sabu> 18:40 <rdw> they asked about topairy aswell
18:40 < Sabu> 18:40 <rdw> i told them
18:40 < Sabu> 18:40 <rdw> what the public knew
18:40 < Sabu> 18:40 <rdw> i thought that he was
18:40 < Sabu> 18:40 <rdw> that old dox on him
18:40 < Sabu> 18:40 <rdw> like
18:40 < Sabu> 18:40 <rdw> that Daniel
18:40 < Sabu> 18:40 <rdw> whatever
18:40 < Sabu> 18:40 <rdw> and i waited a day or tw before giving them access to
my server
18:40 < Sabu> 18:40 <rdw> to give people time to wipe shit
18:41 < Sabu> me==xavier de leon. when I did security research in the "greyhat"
scene
18:41 < Sabu> not my real name obviously
18:41 < Sabu> just a moniker I made up to release my research
18:42 <@sup_g> <rdw> i told them about xavier de leon
18:42 <@sup_g> in other words
18:42 <@sup_g> he told everything he knew
18:42 <~elChe> all this makes me think we shouldnt trust twitter for anything
18:42 <@sup_g> cooperated fully
18:42 <@sup_g> end of story
18:42 < Sabu> yup
18:42 <@sup_g> he gave them access to his servers ffs
18:42 < Sabu> yup
18:42 <~elChe> Sabu and i m talking about q DMS also
18:42 <@sup_g> didn't even make them go through the court order process
18:43 <@sup_g> yeah? he was doing a lot of messages?
18:43 <@sup_g> feds probably read em
18:44 <~elChe> i mean: Sabu and that goes for those q's DMS between you guise
18:44 < Sabu> yeah
18:45 <@sup_g> speaking of
18:45 <@sup_g> where's q?
18:45 <~elChe> twitter will give up minimun all IPs
18:45 < Sabu> good question. last I heard he was having irl problems
18:45 <~elChe> they are forced to do that
18:45 < Sabu> and wanted to escape
18:45 < Sabu> don't be surprised if he never comes back
18:45 <~elChe> hm
18:45 < Sabu> 1) opsec. 2) moves on
18:45 < Sabu> hes not v& and they'll never find him
18:45 < Sabu> same as they'll never find sup_g
18:46 <~elChe> irl related to us? or just their own ones?
18:46 <@sup_g> hopefully
18:46 < Sabu> irl as in hes having physical issues
18:46 <~elChe> ok ok
18:46 <@sup_g> oh with his personal life
18:46 < Sabu> yeah
18:46 <@sup_g> nothing to do with hacking the matrix
18:47 <~elChe> hm sucks
18:47 <@sup_g> well if they ever find and arrest me, there'll be no doubt in
anyone's mind that it was indeed me all along
18:48 <~elChe> well i think they didnt really get kayla
18:48 < Sabu> likewise. I'm in this for the long haul
18:48 <~elChe> proof of that im still here
18:48 < Sabu> I already got a banging attorney on retainer to hold me down
18:48 < Sabu> its just a matter of playing te waiting game

```

#lulzxmas.log
18:48 < Sabu> andowning them until then
18:49 < Sabu> shits just crazy
18:49 < Sabu> I grew up on the streets. I never thought I'd be here with you
niggas :)
18:49 <~elChe> Sabu u never got updates about her?
18:50 < Sabu> kayla? nein.
18:51 <~elChe> she could identify me possitively if she cooperates so i m pretty
much sure shes fine
18:51 < Sabu> but apparently she will be in court with ryan on january 17th
18:51 < Sabu> so we will know the truth about kayla then
18:51 <@sup_g> btw currently merging someloser's and evilworks' cracked md5 list
and applying it to the .mil and .gov accounts that were in the 860,000 users.csv
file
18:51 < Sabu> apparently from what ryan says kayla was indeed arrested
18:51 <~elChe> oh no poor kayla
18:51 < Sabu> sup_g: sounds good
18:51 <~elChe> fucking shit
18:51 <@sup_g> !!!!!
18:51 <@sup_g> for real?
18:52 < Sabu> and he will be in court with kayla jan 17th so I think we need to
do something
18:52 <@sup_g> dude if thats true
18:52 <@sup_g> that just makes me want to own even more police
18:52 <~elChe> hm release something on 17 ?
18:53 <@sup_g> well the 31st is a good day for a few reasons
18:53 <@sup_g> the noise demo thing I was telling you about
18:53 <@sup_g> in greece, they firebomb jails and probation offices and shit
18:53 < Sabu> yeah
18:56 <~elChe> Sabu can u get someone with some really fucking dangerous malware?
18:57 <~elChe> we r not exploiting emails as we should
18:59 < Sabu> yes
18:59 < Sabu> I feel like a fucking middle-man of the underground haha. a pimp
and shit
19:01 <~elChe> lol
19:02 <~elChe> what's a #stratfor? Jimmy holds it upside down, and so does
#Antisec http://youtu.be/wyGGG1I-rf8 #LulzXmas #Anonymous
19:02 <~elChe> tweeted
19:02 <~elChe> lol
19:16 <~elChe> lol
19:16 <~elChe> check this out

19:16 <~elChe> Emergency Christmas #Anonymous Press Release THE STRATFOR #HACK IS
NOT THE WORK OF ANONYMOUS Stratfor is an (cont) t1.gd/eugt8d
19:16 <~elChe> http://www.twitlonger.com/show/eugt8d
19:18 <@sup_g> Sabu and his crew are nothing more than opportunistic attention
whores who are possibly agent provocateurs. As a media source, Stratfor's work is
protected by the freedom of press, a principle which Anonymous values greatly.
19:18 <@sup_g> This hack is most definitely not the work of Anonymous.
19:18 <@sup_g> lol
19:20 <~elChe> sup_g, ur definitively an agent provocateur working for 1%
19:20 <~elChe> now i m sure about it
19:20 <~elChe> thanks pirate13!!
19:20 <@sup_g> dude
19:20 <@sup_g> q seriously asked me that once
19:20 <@sup_g> no joke
19:20 <~elChe> ahhaha
19:21 <@sup_g> he's like 'mm all these attacks on police targets? are oyu sure
you are not trying to provoke the police into attacking real protesters?'
19:21 <@sup_g> i'm like kid? real protestesr? I been in the street a decade ago,
unlike these OWS newbies
19:22 <@sup_g> getting my ass beat.
19:22 <@sup_g> and then anarchists and now hacker who target police are blamed
for what the police do
19:24 <~elChe> in my own experience provoking police help to expand and dynamize
things, i like final results over faggotry
19:25 <~elChe> the usual resource about police sending infiltrators to justify
their violence
19:25 <~elChe> nowadays doesnt work anymore

```

#lulzxmas.log

19:26 <@sup_g> police will brutalize people regardless

19:26 <@sup_g> and some people have every reason, personal or political, to get rowdy

19:26 <@sup_g> but anyway as far as stratfor

19:26 <~elChe> we all learnt from london riots

19:26 <@sup_g> besides their own organization or politics

19:26 <@sup_g> their client base is the main target here =>

19:26 <~elChe> too much doesnt work neither

19:34 < Sabu> lololool

19:34 < Sabu> Ramin Rabieian you are a security firm with the job to reduce risk and you didn't encrypt your client's info, thank g-d you guys have my expired credit info. LOL what a joke.

19:35 < Sabu> the facebook page is getting flamed

19:35 <@sup_g> Hahaha

19:35 <@sup_g> Fuck yeah.

19:35 <@sup_g> tweet it!!

19:35 < Sabu> Jens Wiechers Yeah, just what you need when you get up on Dec. 25th, two hours on the line with AMEX trying to get a human to get your card killed before some prickly fourteen-year old script kiddie buys boatloads of certain implements intended for specifically female orifices, typically pink, to send to your house...

19:36 <~elChe> Victor Gebilaguin The hackers ought to be shot then hanged upside down in public.

19:36 <~elChe> then how the fuck they can call us radicals???

19:38 <~elChe> omg

19:38 < Sabu> tweeted

19:38 <~elChe> i ll rt

19:39 <@sup_g> this is hilarious

19:39 <@sup_g> they are PISSED

19:40 < Sabu> that roger guy is fucking cazy

19:40 <@sup_g> some of these quotes will make the zine .txt

19:40 <@sup_g> they are too hilarious to pass up

19:41 <@sup_g> Also.

19:41 <@sup_g> We can cross check these names....

19:45 <~elche> interesting
19:45 <@sup_g> Didn't expire yet, either.
19:45 <@sup_g> Yall can go ahead and ride on him.
19:49 <~elche> wait weres that guy in the comments
19:50 <~elche> cant find it again now
19:52 <@sup_g> elche you want to go and order something?
19:54 <~elche> i just posted that on anonops
19:54 <~elche> i guess many will take care
19:55 <@sup_g> lol.
19:55 <@sup_g> i'll pastebin for the fuck of it
19:55 <@sup_g> then you can twitter
20:01 <~elche> nah
20:01 <@sup_g> [REDACTED]
20:01 <@sup_g> well it's on [REDACTED] anyway
20:01 <~elche> hm we ll give that tag more importance he has
20:01 <~elche> agh
20:01 <~elche> i m so so so so tempted to tweet that
20:01 <~elche> lol
20:02 <@sup_g> Hmm.
20:02 <@sup_g> It's not that big of a problem.
20:02 <@sup_g> I'm gonna look up all these people pasting negative hularious shit
though.
20:02 <@sup_g> it'll make for good readings in thie zine =)
20:03 <@sup_g> now this roger guy I'd REALLY like to hit.
20:03 < Sabu> sup_g: ever hear of a security researcher by the name of landstock
?
20:03 < Sabu> from efnet
20:03 < Sabu> mid-90s?
20:04 < Sabu> hes hitting me up acting all emo
20:04 <@sup_g> Nope
20:05 <~elche> aghh i hate when i do something cause the lulz is stronger than
me...
20:06 <~elche> tweeted
20:07 <@sup_g> =)
20:07 <@sup_g> That FB is picking up steam, now.
20:13 <~elche> ok we r on mashable again
20:14 < Sabu> yeah/
20:14 <~elche> <http://mashable.com/2011/12/25/anonymous-hacks/>
20:26 <~elche> ooh my fucking god
20:26 < Sabu> guess who I'm talkin to
20:26 < Sabu> that snitch faggot root
20:26 <~elche> we r really stirring a fucking storm
20:26 < Sabu> the one that wrote this email
20:26 < Sabu> [REDACTED]
20:26 < Sabu> elche I know this stratfor might overtake my hbgary hack :(
20:26 <~elche> ioerror oen?
20:26 <@sup_g> hah I saw that earlier
20:26 <@sup_g> snitched on ioerror, too
20:27 <@sup_g> got his real name?
20:27 <~elche> lol nothing will overtake your hbgary hack
20:27 <~elche> its anon history
20:27 <~elche> it seems is that verisign employee
20:28 < Sabu> yeah
20:28 < Sabu> hes a verisign employee
20:28 <@sup_g> sabu I just saw the colbert report vid of the hbgary hack for the
first time

20:28 <@sup_g> fucking classic.
 20:29 < Sabu> ya
 20:29 < Sabu> I hope kayla tells them the truth that it was me that did it all.
 I'd rather her get hit with conspiracy. they cant prove shit against her
 20:29 < Sabu> 20:24 <STRATFOR> i've created spent half my life trying to sell
 verisign as a secure trusted root solution
 20:29 < Sabu> 20:24 <STRATFOR> because of me all the Verisign root certs are in
 every device
 20:29 < Sabu> 20:24 <Sabu> haha
 20:29 < Sabu> 20:24 <Sabu> you're delusional
 20:29 < Sabu> 20:24 <STRATFOR> the point is what are you doing for the noble
 cause?
 20:29 < Sabu> 20:24 <STRATFOR> maybe i am
 20:29 < Sabu> 20:24 <Sabu> you're literally delusional. like, crazy delusional
 20:29 < Sabu> 20:25 <Sabu> this year alone CA' around the world have been hacked
 back and forth
 20:29 < Sabu> 20:25 <Sabu> and don't be surprised if verisign is owned
 20:29 < Sabu> 20:25 <STRATFOR> yes it is
 20:29 < Sabu> 20:25 <STRATFOR> by Symantec actually
 20:29 < Sabu> 20:25 <Sabu> have the feds spoken to you at all face to face about
 the little you know/
 20:29 < Sabu> 20:26 <Sabu> I'll be surprised if they even talk to you
 20:29 < Sabu> 20:26 <STRATFOR> maybe? maybe not
 20:29 < Sabu> 20:27 <STRATFOR> the point is what's the noble purpose of it all?
 20:29 < Sabu> 20:27 <STRATFOR> FBI is spending a considerable amount of resources
 trying to chase you and your reminding five
 20:29 < Sabu> 20:28 <STRATFOR> the guys arrested for LOIC is a waste of tax payer
 money
 20:31 < Sabu> [REDACTED] sigh I wish we had a kingkope on our
 team that kept 0days 0day
 20:31 < Sabu> his remote telnetd exploit will own so much shit
 20:31 <@sup_g> who really runs telnetd these days tho?
 20:32 < Sabu> a lot of isps
 20:32 < Sabu> trust me
 20:32 < Sabu> I owned addr.com in te 2000s with GOBBLES remote telnetd root
 20:32 < Sabu> took over several hundred servers
 20:32 < Sabu> abut 50k domains instantly
 20:33 <@sup_g> lol gobbles.
 20:33 < Sabu> ;x
 20:33 < Sabu> x
 20:33 < Sabu> x;
 20:33 < Sabu> ;x
 20:35 <~elche> actually at least at one thing apart symantec he s right
 20:36 <~elche> about fbi spending resources
 20:36 <~elche> and after this shit on stratfor
 20:36 <~elche> sure it ll get all mad
 20:36 < Sabu> yup
 20:36 <~elche> quinn already told me journos involved on hacker stories
 20:36 <~elche> are being spied
 20:37 < Sabu> ?
 20:37 <@sup_g> hmmm
 20:37 <~elche> ?
 20:37 <~elche> i thought u already knew it
 20:38 <~elche> they mad
 20:38 <@sup_g> I asked SteveD3 about it before.
 20:38 <@sup_g> He said his office got some calls.
 20:38 < Sabu> who is being spied/
 20:38 <@sup_g> And wouldn't elaborate.
 20:38 <@sup_g> He broke the Vanguard news story before we made it public
 20:38 <~elche> quinn was in the past
 20:38 < Sabu> probably parmy is a good one
 20:38 < Sabu> shes most likely spied
 20:38 < Sabu> big time
 20:39 <~elche> parmy is being spied for sure by gchq
 20:39 <~elche> just they need to intercept her calls
 20:39 <~elche> absolute comfort
 20:40 <@sup_g> sabu also
 20:40 < Sabu> yup

#lulzXmas.log

20:40 <@sup_g> regarding Oday
20:40 <@sup_g> we can trade password lists
20:40 <@sup_g> i've got a lot in the archive
20:40 < Sabu> mhm
20:40 < Sabu> I guess the most valueable are whitehats/security research passes
20:40 <@sup_g> or trade bounce boxes I've got a few
20:40 < Sabu> store those somewhere
20:40 < Sabu> and I'll find the right people
20:40 <@sup_g> you know what would be an epic breach
20:41 <@sup_g> iddefense
20:41 <@sup_g> err no wait
20:41 < Sabu> I told you guys ac1db1tc3z hit me up again?
20:41 <@sup_g> zdi disclosures.
20:41 <@sup_g> zdi disclosures would be absolute win.
20:41 < Sabu> agreed
20:41 < Sabu> I honestly would love to hit them all
20:41 <@sup_g> almost every week they brag on full-disclosure about having PoC code for vulnerabilities they report to the vendor.
20:41 <@sup_g> what's AB up to
20:42 < Sabu> just giving us props. letting us know they're watching our progress
20:42 < Sabu> (but wont give us their precious Odays... maybe one day...)
20:42 <@sup_g> nice.
20:42 <@sup_g> I was worrying hostilities were brewing.
20:43 < Sabu> we seem to be doing one thing right that they can't argue against
20:43 < Sabu> mayhem
20:43 < Sabu> the fact we are staying in line with el8s idea of mayhem is enoug to shut niggas up
20:44 <@sup_g> more white hats are getting owned now than ever before
20:44 <@sup_g> just not the normal names youd expect to get hit
20:44 <@sup_g> but really, how many times can mitnick and kaminsky get owned
20:44 <@sup_g> aaron barr was the worst of ALL of them, imo
20:45 <~elChe> lol
20:45 <~elChe> Jason wimler h0h0h0 all your lulz are belong to Xmas
20:45 < Sabu> agreed
20:45 <@sup_g> [REDACTED] Atlanta Federal Reserve
[REDACTED]
20:45 <@sup_g> [REDACTED] Federal Reserve Bank of
[REDACTED]
20:45 <~elChe> what is happening at facebook is crazy lol
20:46 < Sabu> can you guys count how many whitehats we owned since hbgary?
20:46 < Sabu> greg from rootkit.com and jussi (nokias security expert) was one of my highlights (besides owning dan kaminsky0
20:46 < Sabu> I always hated that commercialization of rootkits
20:46 < Sabu> so owning greg hugland made me smile
20:52 <@sup_g> Um.
20:52 <@sup_g> BTW
20:52 <@sup_g> Of the 40,000 @.mil and @.gov addresses that were in users table
20:52 < Sabu> ya
20:52 <@sup_g> 4500 of them cracked so far.
20:52 < Sabu> good shit
20:52 <@sup_g> Looking at the plaintexts now =D
20:53 <@sup_g> If we do this right, we can guarantee ownings well into 2012
20:53 <@sup_g> I am thinking that maybe we can trade with this.
20:53 <@sup_g> Or even give it out to our trusted comrades to keep priv8 and rape
20:53 <@sup_g> At this point clock is ticking, as they been notified of breach.
20:56 <~elChe> yep totally agreed
20:56 <~elChe> i think total chaos will come on monday
20:57 <~elChe> since we catch em all with the pants down this xmas
20:57 <@sup_g> =D
20:57 <@sup_g> I can upload our private list to the .onion
20:57 <@sup_g> and we can give the URL to only our closest comrades with the understanding it is to be kept priv8
20:59 < Sabu> yup

```

                                #lulzmas.log
20:59 <~elche> then Sabu will have to jump server to server
20:59 < Sabu> you can run an onion on my 2tb box actually
20:59 <~elche> lol Sabu u ll not sleep today
20:59 < Sabu> its unmetered gigabit line
21:01 <@sup_g> you sure that's wise?
21:01 <@sup_g> is that box connected to you personally, if discovered?
21:02 < Sabu> http://seclists.org/fulldisclosure/2011/Dec/464 apparently
linux/debian telnetds are vulnerable also
21:02 < Sabu> the box is not connected to me, but to a host I fuck with
21:02 < Sabu> I'd rather not lose the box, but if its behind an onion it should
be fine
21:03 <@sup_g> theoretically
21:03 <@sup_g> but that is good though, another .onion to host them emails
21:03 <@sup_g> we need to copy mails to more servers ASAP
21:03 < Sabu> 20:58 <STRATFOR> i had a choice, i knew the FBI wasn't going to do
anything
21:03 < Sabu> 20:58 <STRATFOR> unless i took a deal
21:03 < Sabu> 20:58 <STRATFOR> in regards to the 40 something US IP's
21:03 < Sabu> 20:58 <STRATFOR> of the honey potted IP data
21:03 < Sabu> 21:00 <Sabu> so you got caught up?
21:03 < Sabu> 21:01 <STRATFOR> well they would have ultimately found my Tor
Button code signing manifest
21:03 < Sabu> 21:01 <STRATFOR> you already know since verisign code signing certs
are considered as an elevated trust root cert
21:03 < Sabu> 21:02 <STRATFOR> most extensions for example automatically install
once you click the .xpi if you have an elevated trust coding signing cert
21:03 < Sabu> 21:02 <STRATFOR> it was going to take some time for the San Fran IC
task force to get that Tor button
21:03 < Sabu> 21:02 <STRATFOR> but once they do
21:03 < Sabu> 21:03 <Sabu> so you abused your power at verisign to setup that tor
button?
21:03 < Sabu> 21:03 <Sabu> better question is
21:03 < Sabu> 21:03 <Sabu> do you still have power have verisign? can you make us
certs?
21:03 < Sabu> I'm going to abuse this kid if he really has verisign access
21:05 <@sup_g> lol nice.
21:05 <@sup_g> make him feel guilty about that snitching shit
21:05 <~elche> lol looking at google news i dont think we ll have problems about
media coverage
21:05 < Sabu> yup
21:05 < Sabu> 21:03 <STRATFOR> yes.... but the problem is pki logs
21:05 < Sabu> 21:04 <Sabu> where are pki logs stored at
21:05 < Sabu> 21:04 <STRATFOR> they are stored on a secondary database that i
don't have administrative access at
21:05 < Sabu> 21:04 <Sabu> if you give us access to verisign, we'll get access to
that db and wipe your los
21:05 < Sabu> 21:04 <Sabu> logs
21:05 < Sabu> 21:04 <STRATFOR> and the problem is that database doesn't use
Active Directory authenticaion
21:05 < Sabu> 21:04 <Sabu> we help each other out
21:05 < Sabu> 21:04 <Sabu> but you can't fucking narc on us dude
21:05 < Sabu> 21:05 <Sabu> what does that other db use?
21:05 < Sabu> 21:05 <Sabu> I'll make sure your logs disappear in return for
verisign access. what say you/
21:05 < Sabu> 21:05 <STRATFOR> it uses a RSA goldkey OTP
21:05 < Sabu> this will be epic.
21:05 < Sabu> ahaha
21:05 <@sup_g> but
21:06 <@sup_g> he may be entrapping you
21:06 < Sabu> thats fine
21:06 < Sabu> he can entrap me all day
21:06 <@sup_g> he did email the FBI saying he had info on you
21:06 < Sabu> (he doesnt9
21:06 <~elche> about servers
21:06 <@sup_g> also is there anything about evilworks I should know?
21:06 <@sup_g> he been talking with me all day
21:06 <~elche> i ll get more servers this week to mirror
21:06 < Sabu> evilworks is a faggot

```

```

#lulzxmas.log
21:06 <~elChe> so i think stratfor mails would be fine
21:06 < Sabu> he has an ego problem. he doesnt like lulzsec/antise
21:07 < Sabu> he feels we are/were a burden to anonymous/anonops
21:07 <@sup_g> hmm.
21:07 < Sabu> I donated $1200 to them
21:07 <@sup_g> for some reason he is passing me shit
21:07 < Sabu> and he still /clear'd #antise every other day
21:07 < Sabu> what is he saying/
21:07 <~elChe> i have good relationship with evilworks
21:07 <~elChe> he ll be nice
21:07 <@sup_g> he pasted me logs from blowfish where blowfish was telling him
about how he has vulnerabilities in american family association
21:07 <@sup_g> AFA has come under fire for some islamophobic shit recently
21:08 <@sup_g> in fact wasn't AFA owned recently?
21:08 < Sabu> yeah
21:08 < Sabu> it was
21:08 < Sabu> by exphlnty
21:08 <@sup_g> sup with that guy btw
21:08 <@sup_g> he doing some half assed ownigns of big targets and claiming
antise
21:09 <@sup_g> if he is owning shit, it'd be nice to work on shit a bit deeper
with him
21:09 < Sabu> I think hes a newbie but he did own big things
21:09 < Sabu> he just doesnt know wtf to do with it
21:09 < Sabu> I will speak to him and others like him to come to me with the dbs
before releasing
21:11 <~elChe> One receipt - to the American Red Cross - had Allen Barr's name on
it.
21:11 <~elChe> Barr, of Austin, Texas, recently retired from the Texas Department
of Banking and said he discovered last Friday that a total of $700 had been spent
from his account. Barr, who has spent more than a decade dealing with cybercrime
at banks, said five transactions were made in total.
21:11 <@sup_g> Hilarious.
21:12 < Sabu> indeed
21:12 <@sup_g> The financial meltdown aspect of this owning really sets it off
over the top.
21:12 <@sup_g> I'm creaming my pants thinking of these DHS and FBI assholes
getting calls from the AP and the credit card corporations.
21:12 <@sup_g> "They donated to WHAT??"
21:13 < Sabu> yup
21:14 <@sup_g> ""It made me feel terrible. It made my wife feel terrible. We had
to close the account.""
21:14 <@sup_g> Not save the children!
21:18 <~elChe> agh why they crying
21:19 <~elChe> we did reasonable donations
21:19 <~elChe> only at big scale
21:19 <~elChe> but no so so so money from each one
21:19 <~elChe> so much*
21:39 <@sup_g> =)
21:39 <@sup_g> so anyway elche
21:40 <@sup_g> think we should get on that next list sometime?
21:43 -!- sup_g [v@kerpia-FAE47673.formlessnetworking.net] has quit [Input/output

21:51 <~elChe> sup_g:
21:52 <@sup_g> We probably should post at least one more set today.
21:52 <~elChe> do u want to drop something else ?
21:52 <~elChe> ok
21:52 <~elChe> make it as lulzy as u can
21:52 <@sup_g> Sure.
21:52 < Sabu> https://twitter.com/#!/sabu I wonder if we can own this acct :X
21:52 <@sup_g> The "B"s?
21:52 < Sabu> why not fuck with whitehats
21:52 <~elChe> ascii included if possible
21:52 < Sabu> and post whitehats dox
21:53 < Sabu> with ccs

```

#1ulzxmas.log

21:53 < Sabu> raytheon etc
21:53 < Sabu> I saw many whitehats in there
21:54 <~elChe> fuck he doesnt update since 2007
21:54 <@sup_g> Actually, Bs aren't that many. Maybe we should do "B" and "C".
21:55 <~elChe>
21:55 <~elChe> 
21:55 <~elChe>
21:55 <~elChe>
21:55 <~elChe>
21:56 <@sup_g> Nice.
21:56 < Sabu> [REDACTED]@gmail.com is the niggas mail
21:56 < Sabu> I either crack his shit or be nice and email him
21:56 < Sabu> hmmm decisions
21:57 <~elChe> spearph him pressing to connect to twitter or lost his account
cause it wasnt updated since 2007
22:00 < Sabu> working on it
22:00 < Sabu> I see someone cracked <https://twitter.com/#!/anonymous> and using it
for gay shit
22:00 < Sabu> trolling
22:01 <~elChe> haahha
22:10 < Sabu> this stratfor shit is exploding moer than I thought
22:10 < Sabu> question; where is hyr?
22:10 < Sabu> homeboy disappeared
22:11 <@sup_g> well
22:11 <@sup_g> uid0 and wicked said he popped on a few days ago
22:11 <@sup_g> just for a few minutes
22:12 <@sup_g> apparently, he spends most of his time out on the sea
22:12 < Sabu> hes got way more hacks in his sleeves
22:12 < Sabu> hes romanian you know he got mad shit
22:13 <@sup_g> Yes actually thye ahve more targets lined up and want our help
apparently
22:14 <@sup_g> Mostly syrian shit
22:14 <@sup_g> elche you there?
22:14 <@sup_g> is our .onion up? can't ssh or sftp to it
22:14 <~elChe> yep
22:14 <~elChe> agh
22:14 <~elChe> wait
22:15 <~elChe> hm
22:15 <~elChe> i can
22:15 <~elChe> hm
22:15 <~elChe> and u r logged currently
22:16 <@sup_g> nm I got it.
22:16 <@sup_g> it's just slow, not sure if it's me or them
22:16 <@sup_g> yes
22:16 <~elChe> hm seem fast here
22:17 <@sup_g> seems to be me
22:19 <~elChe> RT_com RT
22:19 <~elChe> Some #Anonymous members claim responsibility for #Stratfor hack,
group's press release denies it<http://on.rt.com/14bbbv>
22:20 <~elChe> which group's press release?
22:20 <@sup_g> probably that dumbass pastebin statement
22:21 < Sabu> I got good news gents
22:21 < Sabu> I got this kid to expose who was behind bricksquad/HTP hack of
anonops. dox and all that
22:21 <~elChe> wasnt fox?
22:21 < Sabu> apparently the kid is "zeekill" if you google it you see him
talking about #command
22:22 <~elChe> hm
22:22 <@sup_g> evilworks was talkinga bout zeekill
22:22 < Sabu> we have our target.
22:22 < Sabu> gotta own him
22:22 < Sabu> what did evilworks say about him?
22:22 < Sabu> <zeekill> I pasted all the chats from operation payback #command
22:22 < Sabu> <zeekill> pastebin doesn't delete chatlogs
22:23 <@sup_g> evilworks say he wishes someone would target zeekill because of
all the pain he brings
22:24 <@sup_g> I believe he actually said if we kill zeekill, anonops is all ours

                                #lulzmas.log
22:25 <@sup_g> this 'stratfor hack was not anon' is gaining traction
22:25 < Sabu> so kill it
22:29 <~elche> Sabu i only hope u dont give early access to BB to your server
22:30 <~elche> cause what hes saying on projpm is making me getting a headache
22:30 <~elche> and how the hell he now knows its 2.7 mil
22:30 < Sabu> I don't even speak to bb
22:31 <~elche> and not 2.4 as early he stated
22:31 < Sabu> only ones with access to my box is alex
22:31 <~elche> fuck shit
22:31 <~elche> someone is passing info
22:31 < Sabu> passing info about what/
22:31 < Sabu> ?
22:31 < Sabu> what is being said
22:31 <@sup_g> bb access to sabu's server?
22:31 <~elche> sup_g: when u discussed with him yesterday did u say 2.7 mil?
22:31 < Sabu> trust me. no one has access to any of my shit
22:31 <~elche> i ll paste here
22:32 < Sabu> ya
22:32 <@sup_g> elche I don't think so, but I might have

22:50 <@sup_g> also that wikisend link is all I have for now
22:50 <@sup_g> can you reupload?
22:52 <~elche> ok i ll make shorter version
22:52 <~elche> but u ll love it
22:59 <@sup_g> u got what you need?
23:00 <@sup_g> busy
23:00 <@sup_g> but
23:00 <@sup_g> BB just pm'd me this out the blue
23:00 <@sup_g> *BarrettBrown_* Earlier it occurred to me that it might be a good idea to tell Stratfor that you guys will consider making any reasonable redactions to e-mails that might endanger, say, activists living under dictatorships with whom they might have spoken
23:00 <@sup_g> *BarrettBrown_* if they fail to cooperate, it will be on them if any claims are made about this yield endangering anyone
23:00 <@sup_g> *BarrettBrown_* if they do cooperate, they might try to propose redactions that are intent on saving their asses or those of their clients/sources, in which case we'll be alerted to those things
23:00 <@sup_g> *BarrettBrown_* haven't thought it through entirely, but give it some thought

23:02 <~elche> check it
23:13 <@sup_g> nice.
23:17 <~elche> now well sit waiting how the fear of Oday on our side spreads
23:31 < Sabu> lets stop uploading shit to public sites like megaupload. it just compromised more ips we use.
23:31 < Sabu> stick to piratebay
23:32 < Sabu> which one of us has access to the antisec acct?
23:32 <~elche> sup_g:
23:33 <@sup_g> yes
23:33 <@sup_g> I got it.
23:33 <@sup_g> well, I have the tpb account
23:33 <@sup_g> but I don't have seedbox
23:33 <@sup_g> I can upload torrent but I cant make them or serve them
23:33 < Sabu> ok lets figure that out asap then
23:33 <@sup_g> and also, am I the only one who has it? because q gave it to me, and Im not sure anyone else does.
23:34 < Sabu> [REDACTED]

23:39 <~elche> furyoku has seedboxes
23:39 <~elche> as far as i know u only to have tpb
23:39 <@sup_g> ok I will ahve to give someone it then
23:39 <@sup_g> also
23:40 <@sup_g> hmm nm.
23:47 <@sup_g> also someloser is starting to check the passes from our private list against their mailservers
23:47 <@sup_g> to see if we can get us some .gov and mil spools

01:47 < Sabu> gotta take advantage of it
01:47 <~elChe> yep
01:47 <~elChe> u should get lulzsec back sabu
01:47 <~elChe> they love lulzsec
01:47 < Sabu> you think so?
01:47 < Sabu> yeah
01:47 < Sabu> I hear that a lot
01:47 <~elChe> in a really fuzzy way
01:47 <~elChe> at least
01:48 < Sabu> I mean I can start it whenever. however I won't do it unless we
follow in the same footsteps
01:48 < Sabu> meaning
01:48 < Sabu> we do big hacks every 1-3 days for a month straight
01:48 <~elChe> like something floating around
01:48 < Sabu> you guys werent there
01:48 < Sabu> but for that 2 months
01:48 < Sabu> I WORKED MY ASS OFF
01:48 < Sabu> me and kayla went on a rampage
01:49 < Sabu> best bet is to do all the hacks now, then sort it out and release
them every few days
01:49 < Sabu> the first time around we were haking shit on the fly
01:49 <~elChe> u dont need it just hold bring something cool
01:49 <~elChe> sometimes
01:49 < Sabu> true
01:49 <~elChe> to keep the legend alive
01:49 <~elChe> no more
01:49 < Sabu> lulzsec was probably a once in a lifetime
01:49 < Sabu> I wish you guys were on the team
01:50 < Sabu> I think it would have been better
01:50 <~elChe> we were following and laughing
01:50 < Sabu> the one thing I regretted was not being able to get all 1,000,000
credit cards off of sony in time
01:50 <@sup_g> it's true
01:50 < Sabu> I only got to like 40k via blind injection and gave up
01:50 <@sup_g> half measures are half dug graves
01:50 <@sup_g> yep I owned a few sites and put #lulzsec up tho I wasnt part of
the team at the time
01:51 < Sabu> :P
01:51 < Sabu> I remember
01:51 <~elChe> we should get some good malware and send it to all email high

and another demand
02:02 <@sup_g> maybe this time NDAA/SOPA?
02:02 <@sup_g> if it's not dropped by the end of the day and all
02:03 <@sup_g> we also have the wildcard, the specialforces credit cards and
addresses, that's 8k cards / 14k addresses
02:03 <~elChe> hm
02:03 <~elChe> why not drop those ones?
02:04 <@sup_g> yeah we can do them anytime

02:07 < Sabu> 02:04 <Sabu> we'll be happy
02:07 < Sabu> 02:05 <wicked> well, look at the CNN article kat just posted in
chan. DOD is clearly shaking in their boots, ppl dont know
02:07 < Sabu> what ya'll have, lots of uncertainty. Markets don't
like uncertainty. Flood out all CCs and millions of
02:07 < Sabu> mails belonging to fed agencies, banks, companies
etc, and that creates even more turbulence. That's my
02:07 < Sabu> opinion, at least.
02:07 < Sabu> he has a point
02:07 < Sabu> stratfor is more important that we think
02:07 < Sabu> we're holding onto mails that a lot of media and intelligence
relied upon
02:09 <@sup_g> yes
02:09 <@sup_g> big score, big score
02:10 <@sup_g> speaking of mails we need to get it out there ASAP
02:10 <@sup_g> while it's hot and while we have eager volunteers
02:10 <~elChe> we need journos
02:10 <~elChe> true journos and not trash

10:39 <~elChe> ok
10:39 <@sup_g> hey also
10:40 <@sup_g> fixing this mail tar is top priority
10:40 <@sup_g> I dont' know what the fuck is wrong with it.
10:40 <@sup_g> But I'm worried, because we got people asking to look at it, the

10:44 <@sup_g> but apparently it has issues after 2GB?
10:44 <@sup_g> bsd
10:45 <@uid0> so we can't get mail?
10:45 <@sup_g> well there's a few options
10:46 <@sup_g> sabu said he suspects he knows what's wrong, alex might have a
clue too
10:46 <@sup_g> also, I did copy ~10-15 spools by hand
10:46 <@sup_g> but we need to copy them from a bounce
10:47 <@sup_g> but yes we need to get on this mail, it's top priority
10:47 <@sup_g> we already showed our hand in the media that we have it
10:47 <@sup_g> if we fuck it up it'll be hard to control the spin
10:48 < Sabu> don't worry ma'am
10:48 < Sabu> im from the internet

11:16 <@sup_g> but 2nd line is what I tried.
11:16 <@sup_g> cpio: Damaged tar archive: Invalid argument
11:16 <@sup_g> after a while.
11:17 < Sabu> im running gtar with -R now to see where exactly at what block does
it die at
11:18 < Sabu> then going to hexedit my happy ass to that part of the file and see
what the FUC is going on
11:19 <@uid0> backup first! :>
11:19 <@sup_g> I did copy it actually
11:20 <@uid0> otherwise try "dar". it's able to detect data corruption thanks to
crc. only the file(s) with data corruption won't be restored. all others will be.
11:21 < Sabu> sweet
11:27 <@sup_g> luck?
11:29 < Sabu> tried 6 different methods of doing this
11:30 < Sabu> the one method that seems to not have failed is runnin gtar with -i
which ignores errored/zeros
11:30 < Sabu> but it hasnt produced any new mails since 442 watever
11:30 < Sabu> going to let it run in a screen
11:30 < Sabu> if it doesnt recover any mails we're going to do something ghetto
11:30 < Sabu> basically unconsider this .tar a mbox file. we'll need a mbox
converter to break this one file into a entire hierachy
11:31 < Sabu> tar doesnt compress so its essentially a mbox file
11:31 < Sabu> ill let you know of progress
11:32 < Sabu> its running in a screen on that box just -x it if I fall asleep
11:33 <@sup_g> where are you oututting too
11:33 <@sup_g> yeah it's essentially one big mbox file
11:33 <@sup_g> if we have to, we'll have to split it up manually
11:33 < Sabu> yup
11:33 <@sup_g> which will be ridiculous

11:37 <@sup_g> well.
11:37 <@sup_g> we're not COMPLETELY fucked.
11:37 < Sabu> well while this dumb shit tries to recover files im going to look
for a mbox converter
11:38 <@sup_g> on our webshell, I did copy like 10-15 spools.
11:38 < Sabu> extractor
11:38 <@sup_g> mhonarc
11:38 <@sup_g> is it
11:38 < Sabu> kk
11:38 < Sabu> let me grab that shit
11:38 < Sabu> brb
11:38 <@sup_g> but we still need to split up stops and starts
11:38 <@sup_g> can't just tell it to run on a giant 160GB file
11:38 <@sup_g> fuck I have trouble converting archives bigger than 3GB
11:38 <@sup_g> mem errs
11:39 < Sabu> ill let you know how it goes negro
11:39 <@sup_g> I am finishing up this PR for today,
11:39 <@sup_g> then I will get back to work on your server to extract shit from
clearspace
11:46 <@sup_g> sabu where are you exporting the mail to?
11:48 < Sabu> /var/tmp you should see a cockload of html files being generated by
mhonarc
11:48 < Sabu> and /var/tmp/opt is the output of gtar
11:48 < Sabu> both running simultaneously
11:49 < Sabu> mnoharc is working, but, each .html file contains not one email. it
contains like 50 emails per html file
11:49 <@sup_g> hmm may be able to configure that with separators

```

#lulzxmas.log

11:49 < Sabu> but

11:50 <@sup_g> hmm
11:50 <@sup_g> sabu I don't think it's picking up attachments or anything properly
11:50 <@sup_g> it's not splicing the attachments into separate files
11:50 <@sup_g> but there's probably a mhonarc config option
11:51 < Sabu> yeah
12:02 <@sup_g> also
12:02 <@sup_g> can we invite h here?
12:03 <@sup_g> so instead of dropping all that ridiculous shit in #antisecc, it could be at least here

12:24 <~elche> fuck
12:24 < hyrriiya> tar is sequential
12:24 < hyrriiya> so only the last bits will be fuqt
12:24 <~elche> at least we should recover something
12:24 <@sup_g> worst case scenario we have the 10-15 spools on that one bounce
12:24 <@sup_g> also we need this shit on other servers asap
12:25 <~elche> ok
12:25 <@sup_g> I am prepping the next drop and text
12:25 <~elche> we should try to recover all we can
12:25 <~elche> on current one
12:25 <~elche> then evaluate loss
12:25 <@sup_g> also we were hit up by AJEMatteen about wanting to do a video segment
12:25 <~elche> and mirror all
12:25 <@sup_g> passed him screenies, the lulzxmas teaser vid, the text we released so far
12:25 <~elche> fine

12:34 <~elche> how s going syria hyrriiya?
12:34 <@sup_g> and asked if whether stratfor would be interested in helping redact the info from the mail
12:34 <@sup_g> he got kevin garry, sr programmer, on the phone
12:35 <~elche> hm.
12:35 <~elche> i dont like to negotiate

and had all their SSNs and addresses dropped
12:45 <@sup_g> now they winning awards for cyber security lol
12:47 <~elChe> fuck...with tar...
12:53 <@sup_g> elche I have a preview of a statement if yu want to look at it
12:53 <@sup_g> wicked offered to touch it up as well? he worked on the intro for
the zine a bit too
13:03 <~elChe> ok
13:04 <@sup_g> k 1 min
13:09 <~elChe> dont forget the lulz sup_g
13:11 <@sup_g> ok

14:27 <hyrriiya> problem with syria is that its hard to make a diference for the
people
14:27 <hyrriiya> i've gonna try and keep the access i have as long as possible
14:27 <hyrriiya> but i have doubts it will get better for the people there
anytime soon
14:28 <hyrriiya> if NATO comes into play, it will suck
14:28 <hyrriiya> if assad stays, it will suck
14:28 <hyrriiya> there is no institution that u could contact that is interested
in helping the people
14:28 <hyrriiya> so im quietly getting in deeper :)
14:28 <hyrriiya> i currently control all internets there
14:28 <hyrriiya> im looking to grab 3g/WCDMA access now
14:29 <hyrriiya> i also have access to the military VPN's and the atomic energy

14:29 <hyrriya> but i feel for the people there, they are getting murdered and i cant do anything to help :(

14:30 <hyrriya> but whatever happens there, i plan to keep my access forever :D

14:30 <hyrriya> i currently have 3 banks there, so once the embargos go away i can fuck their cash

14:41 <~elche> hi

14:42 <@sup_g> sounds like a serious situation h

14:43 <@sup_g> elche see pm

14:43 <~elche> ok

14:57 <~elche> hyrriya: if u dont want to release syrian stuff

14:57 <~elche> just mess all there

18:04 <@sup_g> hey hey =)
18:04 <@sup_g> mail being sent to wikileaks as we speak
18:05 <@sup_g> but we should probably keep that association private for now
18:05 <@uid0> sure thing
18:05 <@uid0> also awesome
18:07 <@sup_g> yes if this collaboration works out it will be for the best

20:59 <@sup_g> whats good
20:59 <@sup_g> that tar is 120GB and climbing
20:59 <~elChe> hm ok
20:59 <~elChe> go jabber
20:59 <@sup_g> so it will be a few hours still until we can copy
20:59 <@sup_g> k
21:08 <~elChe> hm
21:43 <@sup_g> uid0
21:43 <@sup_g> you gonna be around within the next 2 hours?
21:44 <@sup_g> would like to do another teaser today
21:48 <@uid0> sure
21:49 <@sup_g> k
21:49 <@sup_g> I will be back in 30 minutes and get started on it then
21:50 <@uid0> alright, i'll be "there" ;)

22:58 <~elChe> hi
23:00 <@sup_g> yoyo
23:00 <@sup_g> preparing the next drop
23:00 <@sup_g> all the CCs and users DB
23:00 <@sup_g> may as well drop it off now and get a buzz going for the 31st
23:00 <~elChe> hm ok
23:00 <@sup_g> u want to polish off this statement?
23:00 <~elChe> yep its fine
23:00 <~elChe> link?
23:01 <@sup_g> $ du -sh *
23:01 <@sup_g> 11G    backup.tar.aes128
23:01 <@sup_g> 39G    clear.sql.aes128
23:01 <@sup_g> 152G    mbackup.tar.aes128
23:01 <@sup_g> JA almost done copying the files
23:01 <@sup_g> btw, that tar is done
23:01 <~elChe> how much its left ?
23:01 <~elChe> time to finish i mean
23:01 <@sup_g> mbackup looks like it might be done
23:02 <@sup_g> asking
23:02 <~elChe> time for JA to finish

```

23:02 <~elChe> ok ok
23:02 <@sup_g> still finishing up this statement btw almost done
23:03 <~elChe> no leaks about this partnering?
23:03 <~elChe> i saw strange BB tweets
23:04 <@sup_g> I have not told anyone outside of #antisecc channel
23:04 <~elChe> hm ok
23:04 <@sup_g> and have stressed that we should keep this quiet
23:04 <@sup_g> until WL announces
23:04 <~elChe> hm
23:04 <@sup_g> we don't want to jeopardize WL contact
23:04 <~elChe> i saw some strange tweets
23:05 <@uid0> sup_g: what will ja do with those files now?
23:05 <~elChe> i'll post on jab
23:05 <@uid0> also antisecc chan is not a good idea sup_g :\
23:05 <~elChe> we want at least CEO part released as soon as possible
23:05 <~elChe> hm?
23:05 <~elChe> wtf???
23:05 <@sup_g> our antisecc channel?
23:05 <@sup_g> no good?
23:05 <@uid0> sup_g: aye
23:06 <@sup_g> theoretically, everyone is vouched
23:06 <~elChe> wait have we post about WL on antisecc???
23:06 <~elChe> they snitch to BB
23:06 <~elChe> someone does at least
23:06 <@uid0> no, since the leak to BB it's no longer that way sup_g
23:06 <~elChe> wait i paste something
23:07 <@sup_g> wait
23:07 <@sup_g> is anything specific out there confirming WL collaboration, besides hearsay and rumors?
23:07 <@sup_g> because I saw stories two days ago blaming JA for this
23:07 <~elChe> BarrettBrownLOL Barrett Brown
23:07 <~elChe> @
23:07 <~elChe> @dailydot Uh, I'm not a member of Antisecc. But some of them, like Sabu, are in my IRC giving me updates, etc. Your source is wack.
23:07 <~elChe> 23 hours ago
23:07 <@sup_g> pff.
23:08 <@sup_g> me and sabu were both on project-pm shooting the shit a few days ago
23:08 <~elChe> @BarrettBrownLOL Barrett Brown
23:08 <~elChe> @FruzzE @dailydot @forbes "us" and "we" is accurate; the Antisecc folks have assisted with our investigation, as did Lulzsec. They're Anons
23:08 <@uid0> elChe: well, that's his unwarranted self importance and douchebaggery.
23:08 <~elChe> so..we work for him
23:08 <~elChe> didnt know it
23:08 <@sup_g> he will do some shit like this regardless
23:09 <@sup_g> but
23:09 <@sup_g> is there specific info that BB knows about WL collaboration?
23:09 <@sup_g> or that word got out somehow
23:09 <~elChe> wait one moer
23:09 <~elChe> [REDACTED] \u262e \u2665 u\u01ddss\u01ddi\u0287 u\u0265o\u0638 \u2665 \u262e
23:09 <~elChe> So I take it the #ProjectPM is not going down. If that is true you left a lot hanging, #Anonymous @ #Wikileaks @ #Antisecc credit is down
23:09 <@sup_g> I don't understand
23:09 <~elChe> and then there was some post in wikileaks section on reddit by BB
23:10 <@sup_g> from ja: mbackup.tar is almost done
23:10 <@sup_g> i'll wait for him to get that finished before we backup our own
23:10 <~elChe> ok
23:10 <@sup_g> which btw elChe
23:10 <@sup_g> compression or encryption recommendation?
23:10 <~elChe> ok
23:10 <@sup_g> the new .tar is complete
23:10 <~elChe> since last time with clearspace
23:10 <~elChe> i was worrying about 7z
23:10 <~elChe> for big shits
23:11 <@sup_g> can we just tar.gz and then use gpg to encrypt?
23:11 <~elChe> yeah gpg is fine

23:12 <@uid0> wikileaks WikiLeaks by BarrettBrownLOL
23:12 <@uid0> Millions of emails between some of the most powerful men in the world are about to be released. Help us search them reddit.com/r/wikiLeaks/co...
23:12 <@sup_g> [REDACTED]/stratfor_full.tar.gz.html <-
23:12 <@sup_g> notice that verzend.be's logo is the squatter's rights symbol?
23:12 <@sup_g> lol.
23:13 <~elChe> xD
23:14 <~elChe> hm
23:14 <~elChe> if needed i ll tweet something about bb
23:14 <~elChe> but i would prefer to avoid drama
23:14 <@uid0> yeah, no drama atm
23:15 <~elChe> ok
23:15 <~elChe> agh i would really like to send him to hospital ...
23:15 <~elChe> if we were irl... fuck...
23:15 <@sup_g> lol @ "Hmmm. where are the comments about these being incapable "script kiddies" now?"
23:15 <@sup_g> honestly
23:15 <@sup_g> I think we should avoid public condemnations of others
23:16 <@sup_g> with all BB's faults aside, a lot of news groups referred to his statement as being supportive
23:16 <@sup_g> even if he had nothign to do with the op, his public support is significant
23:16 <@sup_g> in spite of the media's attempts to make anon community look divided
23:16 <@sup_g> if we condemn him, itll make us look even more fractured
23:17 <~elChe> he made the right statement to avoid being plugged off
23:17 <~elChe> literally
23:17 <~elChe> but yeah i m raging
23:17 <~elChe> but i ll avoid drama
23:18 <~elChe> Sabu was around earlier i think
23:19 <@sup_g> from ja
23:19 <@sup_g> here is the safe way to move data
23:19 <@sup_g> [REDACTED]
[REDACTED]
23:19 <~elChe> we should ask him about BB too
23:19 <@sup_g> ask him what, his thoughts on this nut?
23:20 <~elChe> no
23:20 <~elChe> cause BB tweeted he was giving updates to him
23:20 <~elChe> at least to know if he s lying on that
23:21 <@sup_g> I told you what he said when I asked about Sabu right/
23:21 <@sup_g> he said as a matter of protocol they don't talk about whether they do or do not talk to other sources
23:21 <~elChe> no
23:21 <@uid0> wow, Elle MacPherson is still hot @ 48 :o
23:22 <~elChe> hahahahah since when bb takes care about protocols
23:22 <@uid0> elChe: Since he's abt to lose his sources and all axx to information.
23:22 <~elChe> hm
23:22 <~elChe> wait sup_g u r talking about JA or BB
23:22 <~elChe> ?
23:23 <~elChe> ok i guess ur talking about JA and sabu call thingy
23:23 <~elChe> so nvm then
23:23 <@sup_g> yes
23:23 <@sup_g> asking JA about sabu
23:23 <@sup_g> since sabu mentioned working with WL in the past
23:23 <~elChe> yeah got it now
23:23 <~elChe> no no
23:24 <~elChe> sabu just said he called his assistent or secretary
23:24 <~elChe> thats all i know
23:24 <@uid0> Sandra?
23:24 <~elChe> probably
23:24 <@sup_g> who knows, who knows
23:24 <@sup_g> JA said he has not spoken to anybody directly about Stratfor yet until me
23:24 <~elChe> whatever doesnt matter now i guess

Page 101

23:25 <~elChe> ok that makes sense
23:25 <~elChe> since sabu never talked to him directly
23:25 <@sup_g> "Leaked E-Mails [REDACTED]"
23:25 <@sup_g> ?
23:26 <~elChe> so i think for the moment WL is being really WL
23:26 <~elChe> cant reach
23:26 <@sup_g> <NBE> sepr the "Leaked E-Mails [REDACTED]"
23:26 <@sup_g> <whitekidney> ah =D
23:26 <@sup_g> <BarrettBrown> yo
23:26 <@sup_g> <o> except for the fact that the emails were not leaked yet.
23:26 <@sup_g> <BarrettBrown> <http://tinychat.com/projectpm>
23:26 <@sup_g> <BarrettBrown> sup o
23:26 <~elChe> wtf is that sup_g
23:26 <@sup_g> <BarrettBrown> any word yet?
23:26 <@sup_g> <whitekidney> BarrettBrown:
23:26 <@sup_g> <whitekidney> you're uh.. gonna have to contact some people
23:26 <@sup_g> <o> word is
23:27 <@sup_g> <NBE> o I don't know ... I just arrived here so I could
"volunteer" to help and I'm just following the urls in the topic ...
23:27 <@sup_g> * eznet_ has quit (Quit: Leaving)
23:27 <@sup_g> <o> bout to dump some secret missile launch codes
23:27 <@sup_g> <whitekidney> BarrettBrown: you're gonna have to get in touch
with people willing to offer hosting
23:27 <@sup_g> <o> go and tweet that
23:27 <@sup_g> <Morpeth> cool nbe, will be plenty of research to join in with
soon
23:27 <@sup_g> <BarrettBrown> cute, but any idea when e-mails will come out?
23:27 <@sup_g> <BarrettBrown> Sabu
23:27 <@sup_g> <BarrettBrown> hai anonpanda
23:27 <@sup_g> tool
23:28 <~elChe> hm
23:28 <~elChe> ok cant see that i2p thingy
23:28 <@uid0> same
23:28 <~elChe> wahts there?
23:28 <@sup_g> no idea I don't use i2p
23:28 <@sup_g> there's some i2p bridges out there somewhere
23:29 <@sup_g> btw gzip'n mailparse.tar
23:29 <@sup_g> almost done with statement
23:29 <@sup_g> "<Morpeth> the link was to hbg emails which are still available
here [REDACTED]"
23:29 <~elChe> hm
23:29 <~elChe> trolls
23:30 <@uid0> only the two of you + alex have axx to mails, right?
23:30 <@sup_g> and now, JA
23:30 <@sup_g> and sabu
23:30 <@sup_g> his server onv
23:30 <~elChe> uid0: remember me to nuke BBs router when all this finished
23:30 <@sup_g> obv
23:30 <@uid0> elChe: fuck it, I'll do it myself -.- that guy is costing me years
of lifetime
23:30 <~elChe> hahahah
23:30 <~elChe> i took a valium earlier
23:31 <~elChe> when talking with sup_g
23:31 <~elChe> xd
23:31 <@sup_g> it's gonna be nothing but blunts and bitches after the 1st
23:31 <~elChe> sup_g: say to JA to publish something about Strtf for as soon as
possible
23:32 <~elChe> or paranoia and madness will consume our hearts
23:32 <~elChe> lol !!!
23:32 <@sup_g> ok
23:32 <@uid0> elChe: tbh i'm fine when knowing that BB will be last person on
earth to get hands on these mails before rls :p
23:32 <~elChe> we can keep nuking his router during a month
23:33 <~elChe> and also pm irc
23:33 <~elChe> lol
23:34 <@sup_g> I just asked him what his thoughts are on PR and WL
23:34 <@sup_g> about deadlines, announcements, etc
23:34 <~elChe> ok

#lulzmas.log

23:34 <~elChe> this thing is hot now
23:35 <~elChe> its needed to went out soon meanwhile hype is high
23:35 <@sup_g> the suspense can be useful
23:35 <~elChe> and thats go also for WL interests not only our
23:35 <@sup_g> but I agree, more people will read over it and find dirt quicker
when it's hot
23:35 <~elChe> yeah
23:35 <~elChe> and also will avoid potential leaks
23:36 <~elChe> at least WL should post announce they will publish them soon
23:36 <~elChe> we could select some from stratf CEO
23:36 <~elChe> and publish those bunch in our servers saying
23:37 <~elChe> 'get all mails soon in wikileaks'
23:37 <~elChe> or something like that
23:37 <@sup_g> sounds good to me
23:37 <~elChe> that will enough to keep suspence
23:37 <@sup_g> but i'd like to hear more about WL's strategy
23:37 <~elChe> sure
23:37 <@sup_g> but he agreed that we need to get something out ASAP
23:38 <@sup_g> just to demonstrate it's existence, give folks something to read
into initially, and also to put stratfor on the defensive
23:38 <~elChe> WL can play wahtever strategy they want
23:38 <@sup_g> not that they aren't still trying to get back on their feet from
our insurrectionary fury
23:38 <~elChe> just post something now
23:38 <~elChe> only thing we r asking now
23:38 <~elChe> at least some PR saying they partnerer up with us
23:39 <@sup_g> well.
23:39 <~elChe> or just we gave them the shit
23:39 <@sup_g> that is the best bet
23:39 <~elChe> whatever
23:39 <@sup_g> but
23:39 <@uid0> This might get WL in a better position again. So win win. I mean 1
year ago all of the "higher ups" where shaking when hearing their name. Today
they lost that image somehow.
23:39 <@sup_g> I wonder how criminally liable JA and folks could be
23:39 <@sup_g> by admitting having received hacked stolen and controversial files
from us
23:39 <~elChe> well npr wanted them
23:39 <~elChe> AJE wanted them
23:40 <@sup_g> ther'es hundreds of news articles talking about 2.7 million emails
23:40 <~elChe> so i think ppl prefer to get the hands first on the mails
23:40 <~elChe> and later think aobut legal stuff
23:40 <@sup_g> there were a few good points though
23:40 <@sup_g> that someone mentioned regarding the need for professionals to go
through and prep these emails
23:40 <~elChe> yep its ok about it
23:40 <@sup_g> what if there is info on some correspondents in mexico regarding
cartels
23:40 <@sup_g> informants
23:40 <@sup_g> or activists in certain countries with dictatorships
23:40 <~elChe> journos can work on that
23:41 <~elChe> but we r not asking more than WL saying they ll publish our mails
23:41 <~elChe> the only condition we r asking for
23:41 <~elChe> not big deal isnt it?
23:41 <@sup_g> Mr Lipski, whose personal information was published online by
hackers, said the impending release of the emails could amount to a
"mini-wikiLeaks". He said that if hackers were able to penetrate Stratfor's
biggest income-earner, its consulting arm, threats to release the 2.7 million
emails were ominous.
23:43 <~elChe> ok
23:43 <@sup_g> still asking
23:44 <~elChe> that would also bring some relief to us...
23:44 <~elChe> thinkin about it
23:44 <~elChe> hm
23:44 <@sup_g> also
23:44 <@sup_g> and haven't heard back yet
23:44 <~elChe> i mean once world know WL have the emails
23:44 <@sup_g> but they may want to confirm the contents of these files before

```

                                #lulzmas.log
admitting that "We have the emails".
23:44 <@sup_g> it would look bad if they announced that and it turns out it's
bogus
23:45 <@uid0> ofc they will
23:45 <~elChe> LE will accept they cant get on us before making it public cause
its too late
23:45 <@uid0> Read "Inside wikileaks". Lots of bashing in there, but their modes
of operation are described pretty clear.
23:45 <~elChe> thats pretty much understable
23:45 <~elChe> ofc they need to check we gave waht we said we gave
23:46 <~elChe> but they dont need 2 months to do that
23:46 <@uid0> They not only check content, they also look if stuff looks credible
at all or made up
23:46 <~elChe> one day of full work would be enough to
23:46 <@uid0> elChe: They worked almost 11 months on the cables.
23:47 <~elChe> yep but cables was diff
23:47 <~elChe> they trusted one soldier bringing all that shit
23:47 <~elChe> without more to verify
23:47 <~elChe> all world know we pwnd strtfor
23:47 <~elChe> site is offline
23:47 <~elChe> all raeped
23:48 <~elChe> obviously something happened
23:48 <~elChe> and sup_g asked them to verify with anIRC
23:48 <~elChe> the twt account releasing all news about the shit
23:49 <~elChe> without mentioning the CCs donations...
23:49 <~elChe> the context on this situation is pretty much different
23:50 <~elChe> but finally we r not pressing them to publish all quickly
23:50 <~elChe> we r just asking to release some PR saying they have possession of
emails
23:50 <~elChe> and they ll work on them
23:51 <~elChe> or something similar at least
23:51 <@sup_g> ok talking to him again
23:51 <~elChe> so we can move on from this thing
23:51 <~elChe> and feel less pressed ourselves
23:51 <~elChe> about publishing them
23:52 <~elChe> and please this time they shouldnt let some rogue to erase the
things...
23:54 <@sup_g> yeah right? dropped the ball on that mofo
23:54 <@uid0> rogue? erase things?
23:54 <@sup_g> including some nazi leaks that I was really, really looking
forward to.
23:54 <@sup_g> what was that douch's ame...
23:54 <~elChe> the BofA shit uid0
23:54 <@uid0> oic, yeah
23:55 <~elChe> Daniel Domscheit-Berg
23:55 <@sup_g> "well. it remains to be seen what browns agenda is."
23:55 <@sup_g> lol.
23:56 <~elChe> that fucking asshole destroyed the BofA whole candy
23:56 <@sup_g> k elche lemme get oyu that statement
23:57 <@sup_g> "he's propped himself up as a main spearhead of this leak but we
don't work with him in any capacity" <- me
23:57 <@sup_g> "yes, that is what I understood.
23:57 <@sup_g> By the very fact that he has been so talkative." <- ja
23:58 <@sup_g> btw
23:58 <@sup_g> his writing style is very similar to what I've seen form previous
leaked logs between DDB and JA
23:58 <@sup_g> not that that means anything necessarily but it's interesting
23:58 <~elChe> hm
23:58 <~elChe> ok
23:59 <~elChe> yep seems him...
23:59 <~elChe> he ll start being acid then
--- Day changed Fri Dec 30 2011

                                #lulzxmas.log
00:01 <@sup_g> because it keeps the supply low (value high), and people gradually
become interested.
00:01 <@sup_g> the trade off is how long the enemy has to prepare to do damage
control
00:01 <@sup_g> but little impact = little damage
00:02 <~elChe> hm
00:02 <~elChe> yeah
00:02 <~elChe> anyway it looks fine for me
00:03 <~elChe> still we r looking for some PR saying wikileaks is studying those
emails or kina
00:03 <~elChe> kinda
00:03 <~elChe> not so difficult to do that for gods sake
00:04 <@uid0> elChe: That's not how they roll usually.
00:05 <~elChe> yep but its our head here also
00:05 <~elChe> ppl annoying us about mails and so
00:05 <~elChe> nobody will say a shit if WL is working already on them
00:05 <@sup_g> "We're down with that.
00:05 <@sup_g> 7:14
00:05 <@sup_g> But, we'd like some assurance that WL got it handled, what are
your thoughts on announcing that WL has the files or is taking a look at them.
(upon verification of the content of course)"
00:06 <@sup_g> "back in 30. first we spread the encrypted stuff. then survey the
data types (we need to find that consultancy!), then plan strategy timetable
00:06 <@sup_g> we like to give the enemy NOTHING.
00:06 <@sup_g> misinformation or no information.
00:06 <@sup_g> 7:15
00:06 <@sup_g> (the former is always better)"
00:07 <@sup_g> If we get everything safely and it's not all spam, we will be
delighted to handle it.
00:07 <~elChe> hm i undestand they ll start mirroring now
00:07 <@sup_g> then me: "There's concern from folks here that this is a ruse, and
that if we hold off on publishing any data for a month, and yall aren't going to
work on it or publish it, that we fucked up majorly (Folks still worried since
it's just me and you talking that you are fake)
00:07 <@sup_g> But I understand the need to first mirror data, then examine for
legitimacy, before any announcements"
00:09 <@sup_g> "We can tweet something to assure them. But it will be in code."
00:09 <~elChe> hm i got already a tweet
00:09 <@sup_g> yeah that's what I said
00:09 <@sup_g> he took off for a few
00:09 <@sup_g> well all we can do is make our own encrypted mirrors
00:09 <@sup_g> as backup in case WL drops the ball, or that this is fake
00:10 <~elChe> we r looking for just 'wikileaks got his hands on this shit, well
analyze its authenticity and value'
00:10 <~elChe> agh we r jumping into prison each time we do everything
00:10 <~elChe> its not a big risk that shit for them
00:11 <@sup_g> I don't think they operate like that
00:11 <@sup_g> They are far more careful and restrained then we are
00:11 <~elChe> i understand but we have this hack burning everywhere
00:11 <@sup_g> Though.
00:11 <@sup_g> we could always just announce it ourselves that we gave it over to
WL.
00:12 <@sup_g> That would have the added bonus of finding out whether this
contact is legit or not, because then the real WL would be like eh????
00:12 <~elChe> yep but we need them agree to do that
00:12 <@sup_g> I know.
00:12 <@sup_g> Might anger them.
00:12 <~elChe> we ll not tweet anything that would damage friends
00:12 <~elChe> if they agree its ok
00:12 <@uid0> sup_g: can't this person you're talking to just tweet exactly what
you tell her? :p

00:14 <@uid0> qwit kinda sucks
00:14 <@uid0> can't read dm from that client. -.-
00:14 <~elche> use last ttytter since lulztweeter is modded code from that
00:15 <~elche> i ll give u the conf and token
00:15 <@sup_g> ok elche you ready to check that statement out?
00:15 <@uid0> ok elche
00:15 <@sup_g> it's not taht great so mabye you want to add your spice
00:16 <~elche> u made good shit
00:16 <~elche> i just add some spice

01:01 <@sup_g> hey
01:01 <@sup_g> h is providing a box or two for us to copy
01:01 <@sup_g> seeing as we are encrypting the backup it's no worry?
01:01 <@sup_g> or should we wait?
01:02 <~elche> for encrypted backup i would say its ok i guess if u want it
01:02 <@sup_g> though
01:02 <@sup_g> maybe we should wait for another server first.
01:02 <@sup_g> giving up sabu's box's ip to wikileaks is one thing
01:02 <@sup_g> but this is not as secure
01:03 <~elche> ok we ordered one and payment is being processed
01:03 <@uid0> sup_g: rats for donavon. <-- ?
01:03 <~elche> 500gb
01:03 <@sup_g> uid0? hm?
01:03 <~elche> so jsut waiting for it
01:03 <@uid0> w! just tweeted this
01:04 <@sup_g> from JA: "we have tweeted 'rats for donavon' which is an anagram
for 'stratford on avon'
01:04 <@sup_g> looking good homeys
01:05 <~elche> ok guise so the pastebin?
01:05 <@sup_g> im posting now
01:05 <~elche> u cant take out the big boner if u want
01:06 <~elche> but i can guarantee success on it

01:06 <~elche> hahahahahhha
01:06 <~elche> i missed that uid0
01:06 <~elche> yeah yeah
01:08 <@uid0> It's a pretty offensive release text, but I liek.
01:09 <~elche> offensive...
01:09 <~elche> yeah.
01:12 <~elche> ok its getting late on european timezone
01:12 <~elche> can we get it out soon
01:14 <@sup_g> yes
01:14 <@sup_g> ready
01:17 <~elche> so is this a PR or statement?

01:33 <@sup_g> ?Please prepare to help search through them.?
01:33 <@sup_g> During an online chat late wednesday, he said the emails would be
released within the next day or two.
01:34 <@sup_g> BB is setting our release dates/times apparently
01:34 <~elChe> well good luck to deal with WL then
01:34 <@uid0> @BarrettBrownLOL No such rls date. umad?
01:34 <@uid0> He's pushing me to attacking him in some way. --
01:34 <~elChe> lol
01:35 <~elChe> nah probably better to ignore him
01:35 <~elChe> and make his assertions fail
01:36 <@sup_g> yeah please don't
01:36 <@sup_g> breakups are messy as it is
01:36 <@sup_g> and twitter never helps
01:36 <@sup_g> just ask abhaxas
01:41 <@sup_g> also
01:41 <@sup_g> we need seedbox
01:41 <@sup_g> for NYE's release
01:42 <~elChe> yep ask furyoku
01:42 <~elChe> wehn hes around
01:42 <@sup_g> yeah

17:41 <~elChe> hows going?
17:41 <@sup_g> good,
17:41 <@sup_g> got a lot of work over the next five hours
17:41 <@sup_g> I haven't even finished up the statement yet
17:41 <~elChe> great
17:42 <~elChe> i ll be around
17:42 <@sup_g> we may as well forget aobut the torrent for at least a day or so
17:42 <@sup_g> great
17:42 <@sup_g> well defacement is going off as planned
17:42 <@sup_g> I'll doubl check again in a few minutes anyway
17:42 <~elChe> yep sure about torrent
17:42 <@sup_g> even if we can't release the full zine, or the torrent
17:42 <~elChe> ok i perfect
17:42 <@sup_g> we can still deface cslea with their CC info
17:42 <@sup_g> and drop the CA/NY emails
17:42 <~elChe> yep great
17:42 <@sup_g> omfg
17:42 <~elChe> thats pretty muchs something cool on eve
17:42 <@sup_g> this stratfor list had henry kissinger
17:43 <~elChe> hahah probably
17:43 <@sup_g> former cia director
17:43 <@sup_g> jim woosley
17:43 <@sup_g> and former vice president dan quayle
17:43 <@sup_g> I can't think of many people higher on the food chain
17:44 <~elChe> great
17:44 <~elChe> u should pick up also
17:44 <~elChe> some of them
17:44 <@sup_g> henry motherfucking kissinger
17:44 <~elChe> to post
17:44 <@sup_g> well we already posted em
17:44 <~elChe> like teaser
17:44 <~elChe> ok
17:45 <~elChe> if u can put them all together i ll tweet it too
17:45 <@sup_g> lol @ hilarious statement being quoted by CNN and shit
17:45 <~elChe> hahhahha
17:45 <@sup_g> nah it's probably not that significant
17:45 <~elChe> next time u need to trust me for offensive shits
17:45 <~elChe> lol
17:46 <~elChe> u should have leave anonsanta big boner
17:46 <~elChe> xD
17:46 <@sup_g> some stuff, some stuff
17:46 <@sup_g> lol.
17:46 <@sup_g> I might disconnect in 10-15
17:46 <~elChe> ok
17:46 <@sup_g> but I will be back in another 20 after that
17:46 <~elChe> i ll be around for next hours
17:46 <~elChe> for sure
17:46 <~elChe> i could take time for answer if i taking some drinks
17:47 <~elChe> but i ll be all on for here
17:47 <@sup_g> k
17:47 <@sup_g> hmm JA is idle
17:47 <@sup_g> wonder if xfer completed
17:47 <@sup_g> that new box up? maybe we should copy
17:47 <~elChe> lol he s partying girls for sure
17:47 <~elChe> i ll wait for our friend to confirm
17:48 <@sup_g> it's still early here
17:48 <~elChe> yesterday we finished money transfer stuff and account
verifications
17:48 <@sup_g> awesome
17:48 <~elChe> so it should be online soon
17:48 <@sup_g> this defacement will feature some badass ASCII art

17:48 <~elChe> both of you
17:49 <@sup_g> nice
17:49 <~elChe> sup_g: keep the lulzxmas video on some place
17:49 <~elChe> so its clear we r still going hard in our lulzxmas campaign
17:49 <~elChe> for end of year
17:50 <~elChe> lulzxmas brand has got good vibes
17:50 <~elChe> and stirred motivations
17:50 <@sup_g> k I was gonna try to put another vid or two
17:50 <~elChe> yep sure
17:50 <@sup_g> we can't skip the hardcore rap
17:51 <~elChe> ok
17:51 <@sup_g> it's always been a running theme for my defacements
17:51 <@sup_g> got to have ASCII, got to have rap, got to have hacklog
17:51 <~elChe> great man
17:52 <~elChe> do u want i start stirring things?
17:52 <~elChe> or not yet?
17:52 <@sup_g> Sure.
17:53 <@sup_g> Actually, I may have a few teasers lined up
17:53 <@sup_g> Gonna try to get a live fbivirtualacademy.edu account again.

18:16 <@sup_g> whatever's clever
18:38 <@sup_g> ok elche
18:38 <@sup_g> u want to preview this bad ass ascii header graphic?
18:38 <@sup_g> for the zine
18:39 <@sup_g> I will copy a small preview to the .onion
18:44 <@sup_g> wicked sys can we get this trending

18:44 <@sup_g> maybe a RT
18:46 <~elChe> hm
18:47 <~elChe> lol
18:47 <~elChe> can i haz ascii?
18:47 <@sup_g> ok check out /test.html
18:47 <@sup_g> on the onion
18:48 <@sup_g> it's a little bit tall, but I think it's badass
18:48 <@sup_g> I hope it renders correctly in most browsers. It uses extended
ASCII characters
18:49 <~elChe> ok
18:51 <~elChe> holy shit
18:51 <~elChe> lol
18:52 <@sup_g> u like?
18:53 <~elChe> shit yeah!!!
18:53 <@sup_g> shit's badass.
18:53 <@sup_g> gorgon has been making badass ascii
18:53 <@sup_g> he made another 'antisec' bubble logo letters as well as the guy
fawkes mask
18:53 <~elChe> hm
18:54 <~elChe> u should sort that better
18:54 <~elChe> for example after ascii
18:54 <~elChe> u have list of sites

```

```

                                #lulzmas.log
18:54 <@sup_g> yeah actaully after the ASCII will go the statement itself
18:54 <@sup_g> it's just not quite finished
18:54 <~elChe> some of them seem more important that others
18:54 <~elChe> so they need to move up on the list
18:54 <~elChe> even if its just a name
18:55 <~elChe> its the perception of importance
18:56 <@sup_g> I hear ya
18:56 <@sup_g> I just copied off their site
18:59 <@sup_g> ok this is the winner: http://www.youtube.com/watch?v=RQthFDpYCys
19:00 <@sup_g> it's especially good because boots riley from the coup lives in
oakland and is involved with the occupation there
19:01 <@sup_g> the vid is just some generic shit, it wasn't produced by boots
himself, just a fan
19:02 <@sup_g> actually this video sucks, I just want the song
19:04 <@sup_g> going with http://www.youtube.com/watch?v=1Jotps9V4as because it
has the original album cover art, which in itself is controversial
19:04 <@sup_g> blowing up the world trade towers

21:14 <@sup_g> what's going down
21:14 <@uid0> nm, was pretty drunk the last 2 days ;)
21:15 <@uid0> Did I miss anything?
21:17 <@sup_g> yeah we went ahead and defaced cslea
21:17 <@sup_g> dropped the CA and NY spools
21:17 <@sup_g> gorgon made some *badass* ascii
21:17 <@uid0> anything new in case of "rats for donavon"? :>
21:18 <@sup_g> they confirmed they got it all
21:18 <@sup_g> well actually there's three smaller DBs I am uploading now
21:18 <@sup_g> that aren't as important, but, it's being handled
21:19 <@sup_g> they tweeted our CA and NY leak too
21:19 <@uid0> aye, just saw that
21:19 <@sup_g> it's pretty good
21:19 <@sup_g> when we get our 500GB server up
21:19 <@sup_g> we can start going through their mail ourselves
21:19 <@sup_g> we should at least leak one of the spools - george friedman's
21:19 <@sup_g> ourselves.
21:20 <@uid0> Are there eany snapshots of the defacement?
21:21 <@sup_g> yes it's on zone-h
21:21 <@sup_g> 1 min
21:21 <@sup_g> <http://t.co/dE8xi0bH>
21:23 <@sup_g> it was a bit cheesy though
21:23 <@sup_g> though I confirmed a month ago I was able to overwrite
index/default.asp, they have changed it since
21:23 <@sup_g> so all I could do was insert news and then do a full screen div
and iframe to our defacement
21:23 <@sup_g> it worked well and regardless they took the server down (it's
still down)
21:24 <@uid0> btw no "happy new year" tweet by now!?
21:24 <@uid0> Herro folks around the world. We wish a happy 2012 to all our
friends, enemies, haters, supporters and everyone else. Let's rock this year! <--
agreed?
21:26 <@sup_g> Do it
21:30 <@uid0> sup_g: Is a mailspool of Joe Arpaio in there?
21:30 <@sup_g> no, joe arpaio is arizona
21:30 <@sup_g> he just got in trouble, btw
21:31 <@uid0> Ah, damn. Always mixing them up -.-
21:31 <@sup_g> but let me see if any of his fool friends are up on that
21:33 <@sup_g> none for mcso.com
21:33 <@sup_g> I am currently trying hashes for 'infosec'
21:38 <@sup_g>

21:38 <@sup_g> doesn't work on pop3 on that server though =(
21:43 <@uid0> cute, how they think this 74. ip is of any help :>
21:44 <@sup_g> which?
21:44 <@sup_g> confused
21:46 <@uid0> sup_g: some IP based in Seattle. IN those mails.
21:46 <@uid0> From that hosting guy to Ken.
21:46 <@sup_g> ah
21:47 <@sup_g> eh
21:47 <@sup_g> i'm over cslea
21:47 <@sup_g> if anything, go after the doj targets in those passwords
21:47 <@sup_g> but I could not for the life of me get anywhere with doj.ca
21:47 <@sup_g> I hand tried every one of those passwords on both
fieldops.doj.ca.gov and smss.doj.ca.gov
21:47 <@sup_g> and could not find any other login portal, email, nothing
21:47 <@sup_g> same for ca.gov, had no luck
21:48 <@sup_g> so let crowds sort em out, I'm mostly interested in seeing where
these hashes lead us
21:50 <@sup_g> I still can't believe we got henry kissinger's CC.
21:51 <@sup_g> He is wanted in many countries as a war criminal
21:52 <@sup_g> LOL he used the pass '[REDACTED]',
21:58 <@sup_g> I will fuck a duck if we get into kissingers email
22:00 <@sup_g> Don't look like it tho.
22:06 < Sabu> YOH
22:06 < Sabu> YOH
22:06 < Sabu> YOH
22:08 <@sup_g> sup big homey
22:09 < Sabu> you already know neegah
22:09 < Sabu> poppin off
22:10 <@sup_g> ;D
22:10 <@sup_g> it's going to take at least a few days to properly format these
hacklogs
22:10 <@sup_g> it's all messy
22:10 <@sup_g> so zine will be a few days
22:10 <@sup_g> plus writing a manifesto type rant at the end that maybe people
could contribute to when i'm finished with draft
22:10 <@sup_g> mostly explaining our contributions as antisecc, our relationship
with anonymous, etc etc
22:10 <@sup_g> black hat bs
22:10 <@sup_g> btw I tried every hash/pass combo from users.csv that matched
'infosec'
22:11 <@sup_g> a few cracked but none of them double on their servers
22:12 <@sup_g> lol @

22:15 <@sup_g> this is a big email/md5 dump..
22:15 < Sabu> raythen is def in there
22:15 <@sup_g> a LOT of high profile people are in this, now it's a race to get
their spools before passes are changed
22:15 <@sup_g> i'm gonna look at the 'spyfiles' for a list of targets
22:17 < Sabu> mhm
22:17 <@sup_g> there's a few palantir hashes here
22:19 <@sup_g> but none were cracked by google.
22:21 <@sup_g> I never even HEARD of the majority of these companies on the
spyfiles list
22:27 <@sup_g> a *lot* of thalesgroup.com hashes.

23:45 <@uid0> sup_g: not hacked
23:46 <@sup_g> wow, a congressman is legion?
23:46 <@uid0> sup_g: Not worth a tweet that pastebin.
23:46 <@uid0> Just the usual "flames" and stuff from the usual trolls.
23:47 <@sup_g> oh no I was sayin tweet that congressman
23:47 <@uid0> oic, yeah
23:47 <@sup_g> dont' want to give these prosec trolls any attention
23:50 < Sabu> I spent last week collecting all the hacks we did under lulzsec that we didn't release
23:51 < Sabu> it was nostalgic
23:51 <@sup_g> fucking slow internet
23:51 <@sup_g> takes forever to google these hashes
23:54 <@sup_g> I really hope people are taking full advantage of this giant ass password list
23:54 <@sup_g> this net is frusrtating
23:54 <@sup_g> sabu any leads or potentials?
23:55 < Sabu> all .gov hacks, a lot of them we pillaged but never released. but nothing whitehat or interesting
23:55 <@sup_g> btw any target that runs plesk, h can root and hand over to us
23:55 <@sup_g> just check port 8443
23:55 < Sabu> I'll upload list in a few
23:55 < Sabu> got you
23:55 <@sup_g> either way
23:55 < Sabu> also
23:55 <@sup_g> it's only been a day and I want to get my hands dirty
23:55 < Sabu> spent new years with snlffle
23:56 <@sup_g> hah you losers
23:56 < Sabu> it was good because
23:56 < Sabu> I got us some things
23:56 < Sabu> 1) hes rooted sourceforge up and down and has 45+ projected trojaned and giving me info later
23:56 <@sup_g> i'm collecting a list of grepped 'securit' hashes that have been cracked, btw
23:56 <@sup_g> that's pretty amazing
23:56 < Sabu> 2) coreutils is backdoored. he gave me the keywords used
23:56 < Sabu> 3) linux kernel is backdoored by ab and I am trying to get it off him
23:57 < Sabu> I also got to see all their faces on tinychat
23:57 < Sabu> snlffles a neckbeared
23:57 < Sabu> haha
23:57 <@sup_g> lol.
23:57 <@sup_g> like weev used to be
23:57 < Sabu> ya
23:57 <@sup_g> fuck weev
23:57 < Sabu> weev hit me up
23:57 < Sabu> privately
23:57 <@sup_g> dude, fuck him
23:58 <@sup_g> he is a real pile, and now that he was busted, he's trying to hop on the anon/ows bandwagon
23:58 < Sabu> he admitted he wanted to argue with me publicly so he can get enough attention to write a story and make money off of it
23:58 < Sabu> but I shut him down
23:58 < Sabu> even biella messaged me like NICE!!!
23:58 <@sup_g> he used to be all white supremacist, but the small amount of time he did probably changed his tune

22:40 <@sup_g> what is "#SSS"?
22:40 <@sup_g> the sheriffs?
22:41 <@uid0> shooting sheriffs saturday
22:41 <@uid0> Remember, they got an "advance warning" from the FBI and moved
their box to increase lulz.
22:42 <@sup_g> ah right
22:42 <@sup_g> that was right after topes got busted
22:42 <@uid0> aye
22:42 <@sup_g> any further speculation as to what's up with this leak?
22:43 <@uid0> no
22:43 <@uid0> But something sounded strange to me.
22:43 <@uid0> we talked abt stratfor & the police thing alike.
22:43 <@uid0> But Stratfor apparently didn't receive any warnings.
22:43 <@sup_g> Or did they?
22:44 <@uid0> Nah, they would have done everything to avoid this.
22:44 <@sup_g> Sysadmin emails did seem to talk about 'security situation'
22:44 <@sup_g> but yes,
22:44 <@sup_g> they would have been able to protect themselves
22:44 <@uid0> I can't even imagine how much money they're losing atm.
22:44 <@sup_g> smart decision would be to pull all boxes offline
22:44 <@sup_g> All of it, probably.
22:44 <@sup_g> whatever they have left is probably going to CSID
22:44 <@uid0> hopefully :>
23:07 <~elChe> lol
23:07 <~elChe> they pretty much totally raped
23:08 <~elChe> also about cslea
23:08 <~elChe> this was my fav today
23:08 <~elChe> Teresa Dobbins, an employee of the Department of Justice, never
got word of the breach in November. And she wasn't informed that her personal
information, including her email address, phone number, and home address, were
leaked onto the web New Year's Day, until News 10 contacted her.
23:08 <~elChe> "If they were aware of it, they should have tried to notify me
before the media did," Dobbins said.
23:08 <~elChe> "I feel so violated...I really do because that is personal
information," said Dobbins. "It's way unnerving because all these people have
your info and they know you are part of law enforcement. It makes you
vulnerable."
23:09 <@sup_g> delaying the emails might even be beneficial

20:29 <@sup_g> I believe that if for whatever reason the feds have been holding
off on busting people, I think this latest round of attacks will cause increased
pressure
20:29 <@sup_g> congress and other powerful people are probably raging at the feds
to make arrests
20:29 <~elChe> also if u want we can get 120gb servers
20:29 <~elChe> and split files
20:30 <@sup_g> hrm
20:30 <@sup_g> I suppose we COULD do that..
20:30 <@sup_g> our current one si 120GB, no?
20:30 <@sup_g> cz
20:30 <~elChe> at least i can get those easily and quickly
20:31 <@sup_g> well
20:31 <@sup_g> if our current one is 120GB
20:31 <@sup_g> we may as well just use that for now
20:31 <@sup_g> and use sabus when he gets it online
20:31 <@sup_g> not sure how useful more 120GB ones will be
20:31 <@sup_g> h gave us some hacked servers but they are all on the same subnet
20:31 <@sup_g> and since we blew the fuck out of two of those boxes sending spam

#lulzxmas.log
20:32 <@sup_g> btw did you see them social security numbers on cslea
20:32 <@sup_g> those were there as recent as a week ago
20:32 <~elChe> no
20:32 <@sup_g> which means that even despite the breach and FBI tipoff
20:32 <@sup_g> they were still storing cleartext social security numbers
20:32 <~elChe> lol
20:32 <@sup_g> search the hacklog for .tab files near the CSLEA
20:32 <@sup_g> there's a bigass directory of .tab files and I echo a few of them
20:32 <@sup_g> only like two or three SSS tho
20:33 <@sup_g> months ago I downloaded them all but I unfortunately lost that
part =(
20:33 <@sup_g> but it's OK: in the hacklog displaying it is proof enough that
they were that irresponsible
20:33 <~elChe> yeah
20:34 <@sup_g> no one noticed that publicly yet apparently
20:34 <@sup_g> maybe CSLEA will be forced to make an admission of it

leads to a clip of 80s pop star Rick Astley singing "Never Gonna Give You Up," a
common internet meme known as rickrolling. A third link asks users to rate
Stratfor's incident response, but is actually an image of a joke report form.

00:48 <@sup_g> can I pass off a 600 user file to you for your cracking buddies
00:48 <@sup_g> for a side project not related to antisecc
00:48 <@sup_g> nazis
00:49 <&Sabu> yup
00:49 <&Sabu> do it
00:50 <@sup_g> ok
00:50 <&Sabu> also work with dv0, he's headin the german/austrian side of
opBlitzkrieg
00:50 <&Sabu> hes been ownin some shit on the side
00:50 <@sup_g> really
00:50 <@sup_g> then maybe I shoudl talk with him
00:51 <&Sabu> hes with the german group pwnies
00:51 <@sup_g> most of the released opblitzkrieg shit I've seen int he past week
00:51 <@sup_g> has all beens hit I dropped in the past year
00:51 <&Sabu> mhm
00:51 <@sup_g> also
00:51 <@sup_g> that 600 user file is on your server
00:51 <@sup_g> ~root/kkk.q1
00:51 <@sup_g> kkk.sql
00:51 <&Sabu> got you
00:51 <@sup_g> I wrote a shitty PHP script to crack vbulletin hashes

```

                                #lulzmas.log
00:52 <@sup_g> but it's taking FOREVER to just run one user
00:52 <@sup_g> btw we got some good press coverage fro rickrolling the stratfor
860,000 list
00:52 <@sup_g> with our zine, butthurt form, and rickroll vid
00:53 <&Sabu> I saw thahahahaha
00:53 <@sup_g> they even made a youtube video of themselves denying the email
00:53 <@sup_g> so easy to troll
00:53 <@sup_g> most people still don't realize From: email header ca be spoofed
00:55 <&Sabu> haha
00:55 <&Sabu> nuberts
00:56 <&Sabu> sup_g: want some good news now or later? ;0
00:56 <@sup_g> hah
00:56 <@sup_g> now obviously
00:57 <&Sabu> sra.com owned. I'm getting db now
00:57 <@sup_g> yo this stratfor hash list is hot
00:57 <@sup_g> oh shit for real?
00:58 <&Sabu> snlffle got it
00:58 <&Sabu> but hes hitting it first
00:58 <&Sabu> before we get it
00:58 <@sup_g> get teh spools
00:58 <@sup_g> 'cyber security and national security'
01:00 <&Sabu> workin on it. these niggas is greedy
01:00 <&Sabu> you know how they be
01:01 <&Sabu> 01:00 <@vigorish> Sabu, seems mass.gov and masspolice.gov are
running <= 2.0.58 apache, you might mod_rewrite that shiz.
01:01 <@sup_g> remember our new MO
01:01 <@sup_g> mail spools: get them first, get them all
01:01 <@sup_g> those two targets are invaluable
01:02 <@sup_g> considering repression of p0isan0n
01:02 <@sup_g> who is skiddie as fuck
01:02 <@sup_g> but s in trouble
01:02 <&Sabu> yup
01:03 <@sup_g> the only thing that sucks about these stratfor hashes
01:03 <@sup_g> is that they have been notified a million times
01:05 <&Sabu> hahahaah
01:05 <&Sabu> yeah
01:05 <&Sabu> but I bet you still will find niggas still using the passwords
01:05 <&Sabu> also the obvious; just because they change their exposed email
address password doesn't mean their alts are chaned
01:05 <&Sabu> or other logins like linkedins, facebooks etc
01:05 <&Sabu> we can use those (especially high profile targets) for SE
01:06 <@sup_g> yep
01:10 <@sup_g> well
01:10 <@sup_g> I am just gonna keep trying hashes
01:10 <@sup_g> while it is 'newer'
01:10 <&Sabu> sending your list to my team
01:11 <@sup_g> I appreciate it
01:11 <@sup_g> Ima have to hit up dv0 I had no idea
01:13 <&Sabu> yea. why do you think I have him around
01:13 <&Sabu> hes my connection to german and austrian hackers
01:13 <&Sabu> :)
01:14 <@sup_g> was he the one you gave that bigass nazi pass list
01:16 <&Sabu> yup
01:17 <@sup_g> nice.
01:17 <@sup_g> ima hit him up
01:17 <&Sabu> in fact
01:17 <&Sabu> he asked me for it again. you know I dont save shit
01:17 <&Sabu> so pass it over fam
01:17 <@sup_g> I will
01:17 <&Sabu> might help him on his neo-nazi tarets
01:17 <&Sabu> targets
01:17 <@sup_g> great =)
01:18 <@sup_g> nazis have been getting hit hard
01:18 <@sup_g> check nsoldguard.blogspot.com
01:18 <@sup_g> ;D
01:25 <&Sabu> sup_g: that new box will be in our hands tomorrow
01:26 <@sup_g> nice
01:28 <&Sabu> these niggas are being greedy for some reason

```

#lulzxmas.log

01:29 <@sup_g> bout what?
01:31 <&Sabu> 0days, their linux kernel backdoors, and sra.com and other whitehat
shit
01:31 <&Sabu> if they gonna hold it all back why even tell me anything about it
01:32 <@sup_g> eh
01:32 <@sup_g> let em
01:32 <@sup_g> they can release hweover they like, but if they need help
01:32 <&Sabu> yeah
01:45 <&Sabu> that list is cracking
01:45 <&Sabu> ill have results for you
01:46 <&Sabu> sup_g: you know my boys got heat for that one tweet I posted? about
the 92% cracked list?
01:46 <@sup_g> for real?
01:46 <@sup_g> because
01:46 <@sup_g> I saw the 92% figure referenced later
01:46 <@sup_g> in news posts
01:46 <&Sabu> niggas started doing research and put 2 and 2 together
01:46 <&Sabu> months ago
01:46 <&Sabu> hashcat team lost competition to russian team at defcon
01:46 <&Sabu> and I defended them to bitter end
01:46 <&Sabu> remember that?
01:47 <&Sabu> fast forward those same russian nigas hit them up on irc like
01:47 <&Sabu> "stop helping sabu crack hashes we know its you"
01:47 <@sup_g> damn
01:47 <@sup_g> well good thing it's not official
01:47 <&Sabu> yup
01:48 <&Sabu> nigga our squad is fire
01:48 <&Sabu> we gotta official crack teams <3ing us
01:49 <&Sabu> also
01:49 <&Sabu> we got a heads up
01:49 <&Sabu> mikko from f-secure is goin after us hard. he does 90% contracts
for finnish government
01:49 <@sup_g> fuck that guy
01:49 <&Sabu> and we leaked their secret service equivalent passwords with
stratfor
01:50 <@sup_g> he talked mad shit about lulzxmas
01:50 <&Sabu> exactly
01:50 <@sup_g> white hat gotta die
01:50 <&Sabu> because we dropped passwords on his clients
01:50 <&Sabu> so he's oing after us
01:50 <&Sabu> I'm like
01:50 <&Sabu> ok
01:50 <&Sabu> FIRST OFF I already rooted f-secure before
01:50 <&Sabu> it can happen again
01:50 <&Sabu> niggas need to sit the fuck down
01:50 <&Sabu> we dont play games over here
01:51 <&Sabu> you see those indian kids hacked indian intellience and dropped
nortn sources? they got much more sources
01:51 <&Sabu> and they rep anonymous
01:51 <&Sabu> I'm tryin to connect to them
01:51 <&Sabu> see if we can access that drop before they release it
01:51 <@sup_g> nice
01:52 <&Sabu> or at least if they drop it to rep #antisecc instea
01:52 <&Sabu> d
01:53 <@sup_g> tried like 30-40 accounts in the past 20 minutes
01:53 <@sup_g> none worked
01:53 <&Sabu> don't waste time. you know that list is cooked sadly
01:54 <&Sabu> if we had more time wit it then it coulda produced
01:54 <&Sabu> that one pass list owned 85% of top federal cntrctors in the u.s.

17:55 <@sup_g> inside job
17:55 <@sup_g> I did talk to JA yesterday
17:55 <@sup_g> asking when can we see some results or be able to do private searches
17:56 <@sup_g> he said they are making progress with the search engine and we should see something within a week
17:56 <@uid0> that's good news
17:57 <@sup_g> yes
17:57 <@sup_g> however
17:57 <@sup_g> we should still pursue our own private version of the mails
17:57 <@sup_g> just in case
17:57 <@sup_g> elche just got the hookup
18:01 <~elche> yeah
18:01 <~elche> i think they ll honor their word
18:01 <~elche> i was seeing some signals towards us
18:01 <~elche> so we r fine for the moment
18:02 <~elche> ofc we need to cp those mails on our own
18:02 <~elche> just in case
18:02 <@uid0> they RTed us some times since they received the mails.
18:08 <@sup_g> ok
18:08 <@sup_g> copying mail to new server
18:08 <@sup_g> finally we will have a second copy
18:08 <@sup_g> I been biting my nails for a month
18:08 <~elche> lol
18:08 <@sup_g> yeah since they been tipping their hat to us it seems like solid clue as to WLS legitimacy
18:09 <@sup_g> JA said he would be hitting sabu up too but not sure how that went

documents

05:07 <@uid0> Sabu: But for real, better chinese intel atm than any other intel.
;)

05:07 <@sup_g> not necessarily

05:08 <@sup_g> authorities do collaborate

05:08 <@sup_g> when it is convenient for them

05:08 <@sup_g> or if say the US wants someone, chinese intel may trade them that info for something else

05:08 <@uid0> sup_g: CN & US cooperating is highly unlikely.

05:08 <@sup_g> not too sure about that

05:08 <&Sabu> tell him bluntly to get us chinese servers and we'll gladly give him china-relate mails

05:08 <&Sabu> its a fair trade imo

23:24 <@sup_g> omfg
23:24 <@sup_g> big site
23:24 <&Sabu> yo yo
23:24 <~elChe> how big
23:25 <@sup_g> one of the biggest police forums and stores
23:25 <@sup_g> sabu we're on fire
23:25 <@uid0> elChe: well, it's somehow irrelevant, but on the other hand it's
related to the whole SOPA discussion.
23:25 <&Sabu> JEA
23:25 <&Sabu> sounds good to me
23:25 <@sup_g> I am uploading mail spools and databases to a large new york city
police supply store
23:25 <@sup_g> and working on this other big target now
23:26 <&Sabu> <3 wonderful
23:26 <&Sabu> you moved everything to /home/backup/ ?
23:26 <&Sabu> just upoaded hashes to crack in that bitch
23:26 <&Sabu> got my squad ready to crack
23:26 <~elChe> Sabu we need some cool malware
23:27 <&Sabu> ok working on it
23:27 <&Sabu> pdf doc docs et al?
23:27 <~elChe> yeah
23:27 <~elChe> to target high profile ppl
23:27 <~elChe> spearphish campaign
23:28 <&Sabu> I'll see if I can set that up. we need 0days though
23:28 <&Sabu> lets try to raise some $$ in case we need to buy some priv8 shit
23:28 <&Sabu> or recruit a browser/plugin/ext based researcher
23:29 <~elChe> alex was dreaming about SIPRnet...

00:20 <~elChe> about the blackout?
00:21 <@uid0> uhm, which one? I tweeted several articles.
00:23 <~elChe>
http://techland.time.com/2012/01/12/sopa-reddit-confirms-january-18-blackout-wiki
pedia-and-others-may-follow/
00:23 <~elChe> if not tell me i m ready with a tweet
00:24 <@uid0> Not sure elChe. ^^ Just tweet it.
00:25 <~elChe> lol ok
00:25 <~elChe> done
00:25 <~elChe>
http://venturebeat.com/2012/01/12/silicon-valley-shares-blame-for-sopa/
00:32 <@uid0> elChe: YourAnonNews received a message from EFF.
00:32 <@uid0> "we're thinking not tweeting on #j18 is a bad idea. Sites
blackened-out direct users to take action, giving SOPA more attention, which is
great"

```

```

                                #lulzxmash.log
00:32 <@uid0> "But users not tweeting gives SOPA less attention b/c people who
don't already know about SOPA will have no way of knowing about the protest"
00:32 <@uid0> "There's an imp't Internet security anti-SOPA hearing on Jan 18 that
needs to get attention too & not tweeting will hurt https://t.co/yQo1Jwp"
00:32 <@uid0> "That's just our two cents. Regardless, thanks for working so hard
to defeat SOPA!"
00:33 <~elche> thats mainly what EFF guys passed to me
00:34 <@uid0> Actually I think it's bs what they say.
00:34 <@sup_g> 3.4GB compressed mail spools from a police site
00:34 <@uid0> The word can and will get out before and after the blackout.
00:34 <@uid0> But sometimes silence can be louder than words.
00:34 <~elche> well probably
00:35 <~elche> but sure we cant risk this sopa thingy battle messing it with
drama
00:35 <~elche> so better we try to coordinate whatever possible
00:35 <~elche> even if we r not likely all that happy
00:35 <~elche> we need to win this on any way
00:36 <@uid0> I see it like this: there will be thousands of tweets regarding
SOPA the next days, so just keep tweeting won't make ANY impact at all.
00:36 <~elche> we need to keep pressure on big companies
00:37 <@uid0> what I'm not sure abt is whether to dos gov pages during the
hearing.
00:37 <~elche> im trying to get some friend lobbying google to move its fucking
ass
00:37 <@uid0> wikipedia definitely taking part would be awesome.
00:38 <~elche> yeah
00:38 <~elche> for real
00:38 <@uid0> Also I'm looking around for a new avatar to use until 18th or maybe
beyond.

http://blogs-images.forbes.com/erikkain/files/2012/01/sopa-logo-1.jpg
00:48 <@sup_g> ok folks
00:48 <@sup_g> I just got a bigass mail dump from a pretty decent sized site
00:48 <@sup_g> and I had an idea
00:49 <@sup_g> this guy sepr has been offering to host and parse and index/browse
through some shit for us for a while
00:49 <@sup_g> obviously we're not going through him for strat
00:50 <@uid0> wait, sepr was raided once, no?
00:50 <@sup_g> but what you say if we give him a few random spools and see if he
can deliver for us
00:50 <@uid0> inverting colors looks terrible, elche xD
00:50 <@sup_g> was he?
00:52 <@uid0> or maybe I'm wrong
00:52 <@sup_g> I told him no mention of name of target to anybody, no bb, nobody
00:52 <~elche> lol
00:52 <~elche> ?
00:53 <@sup_g> if it gets blown up, it's no major loss, as we already have mysql
and mail dumped
00:53 <@sup_g> then well know
00:53 <~elche> ok fine for me
00:53 <~elche> tho
00:53 <@uid0> He worked with BB in #OpMetalGear
00:53 <~elche> not direct upload to his servers
00:54 <@sup_g> I know he hosts shit for project-pm
00:54 <@uid0> And he used his real ip on anonops. :B
00:54 <~elche> from our resources
00:54 <@sup_g> elche yes
00:54 <@sup_g> thing is
00:54 <@sup_g> i'm dumping spools too fast to go through and parse myself
00:54 <@uid0> Actually I'm against working with ppl who work with BB, but not my
call.
00:55 <@uid0> Meh, need food before stores are closing. -.- brb
00:55 <@sup_g> also elche how goes downloading those old ca/ny spools so we can
upload to his seedbox?
00:57 <~elche> agh

```

```

03:22 <@sup_g> must have forgot
03:22 <@sup_g> keys work like cookies right?
03:23 <@uid0> they work without knowing the password, even if it's changed.
03:23 <@sup_g> nice
03:23 <@sup_g> well except the even if it's changed part
03:23 <@sup_g> is there a way to reset it so it won't be "in the wild" if stolen?
03:23 <@sup_g> not that it's tha timportant
03:23 <@uid0> yes
03:24 <@uid0> With the password one can revoke axx to certain apps.

20:42 <~elChe> Sabu uid0
20:42 <@uid0> elChe:
20:42 <&Sabu> yo
20:42 <~elChe> its aobut talking about the Associated Press thingy
20:42 <&Sabu> what ap thing ?
20:42 <@uid0> yup
20:43 <~elChe> http://overview.ap.org/team/
20:43 <~elChe> Jonathan Stray
20:43 <~elChe> ^
20:43 <@uid0> Sabu: AP interested in strat mails
20:44 <~elChe> he would like axx to Stratfor mails for AP
20:47 <~elChe> i think we should ask WL before any decision
20:47 <~elChe> thats imho
20:47 <@uid0> elChe: wikileaks won't publish if others get axx first imho

```

20:48 <&Sabu> honestly?
20:48 <@uid0> Since they have their own media deals which they drain money from
20:48 <~elChe> i think
20:48 <&Sabu> in my personal opinion
20:48 <&Sabu> (in my mind I'm starting to say fuck wikileaks)
20:49 <&Sabu> speaking to JA and speaking to people who worked with him
20:49 <&Sabu> their entire internal operations are weird. full of spying.
counter-spying. se. bunch of bullshit
20:49 <&Sabu> those people live in their own small deceptive world
20:49 <&Sabu> and JAs blazing through all those millions of dollars he made off
various donations and other shit
20:50 <&Sabu> and hasn't helped bradley manning besides sitting idle hoping
manning doesn't give him up on espionage charges
20:50 <&Sabu> also. they've had the stratfor mails for weeks
20:50 <&Sabu> put together a basic search engine and thats as far as they got
20:50 <~elChe> i c tho they could be good allies in these times. but im for
pressing them lil more to publish soon
20:51 <@uid0> yup ^
20:51 <~elChe> AP are ok also to work on the mails after public release too
20:51 <~elChe> but i m thinking about bringing this to press them lil bit to
publish
20:52 <~elChe> they know we have our own copies so they dont have the keys for
the candy on exclusive
20:52 <@uid0> AP should give us over 9000 bitcoins for the mails. xD
20:53 <~elChe> just for pragmatcal purpose i see the WL releasing them could be
a good media event for us
20:53 <~elChe> if we market it cleverly
20:53 <@uid0> yes
20:54 <@uid0> but also keep in mind, that there's no such thing as allies or
friends for JA.
20:54 <~elChe> tho i ll agree with any decision we took all of us about it
20:54 <@uid0> He even sold off DDB when he thought it was time to do so.
20:54 <~elChe> DDB was a traitor
20:54 <@uid0> no
20:55 <&Sabu> thats pretty much only it. wl releasing mails will be more
marketing us as a relevant source of information
20:55 <~elChe> ^
20:55 <~elChe> DDB deleted BofA shits
20:55 <~elChe> i m mad about it
20:56 <~elChe> that would have been its LOLcaust
20:56 <@uid0> elChe: Yeah, but what came before this was no betrayal.
20:56 <~elChe> but didnt happen
20:56 <~elChe> i m always all about leaving difference aside to go after the
common goal
20:57 <~elChe> results over drama
20:57 <~elChe> deleting BofA shits never was an option
20:57 <@uid0> well, depends. I wouldn't support anything I couldn't personally
stand for either.
20:57 <@uid0> I would've given it to a neutral 3rd party.
20:58 <@uid0> But wouldn't have given it back to WL in that situation either.
21:01 <@uid0> <http://visa.com.br> TANGO DOWN #megaup/rt y1 ;)

21:59 <~elChe> (23:05) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] but about YOU i
found out more than i thought before i started
21:59 <~elChe> (23:05) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] i wont call it dox
21:59 <~elChe> (23:05) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] doxing is for your
kiddies here & on twitter
22:00 <~elChe> (23:05) (->whidgle) well if u really want to do it, go ahead, but
dont menace me, just go and do it. i hope u dont make mistakes

```

22:00 <~elChe> (23:06) (->whidgle) but i dont have time for menaces i thought u wanted to discuss something more important than who i am or could be

22:00 <~elChe> (23:07) (->whidgle) and i dont work for govts for gods sake lol

22:00 <~elChe> (23:07) (->whidgle) c u and take care

22:00 <~elChe> (23:07) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] se~nor, YOU made the mistakes :D bwahahahaha

22:00 <~elChe> (23:09) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] btw ... the guy is from the same city like u, too ... wait... if it is not u - is it your dad?

22:00 <~elChe> wtf???

22:00 <~elChe> XD hahahahahaha

22:00 <@uid0> oo

22:00 <~elChe> (23:10) [whidgle!Mibbit@AN-pg8.vna.uc15h1.IP] is your dad also talking about honeypots, skriptkiddies, nmap, ssh-sniffer... u know...

22:01 <~elChe> hahahahahaha

22:01 <~elChe> epic fails is epic

22:01 <~elChe> i should pass him to you uid0 i m sure ull get lot of fun from him

22:09 <@uid0> elche: Nah, trolls are boring me lately.

22:10 <@uid0> @AnonDaily asking strange questions

22:10 <@uid0> you know that account?

22:10 <@uid0> 18:14:48 <AnonymousIRC> sup, you wanna talk?

22:10 <@uid0> 18:15:04 <AnonDaily> Yo, getting sick of anonops.li

22:10 <@uid0> 18:15:08 <AnonDaily> Cryto is the way to go

22:10 <@uid0> 18:15:17 <AnonDaily> fucking noobs over the wall

22:10 <@uid0> 18:15:34 <AnonDaily> throw me in to #antisec

22:10 <@uid0> 18:15:56 <AnonymousIRC> what you mean? Anything specific?

22:10 <@uid0> 18:16:27 <AnonDaily> Not really. Fuck ddos and all that shit. What goes on in crypto

22:10 <@uid0> 18:17:02 <AnonymousIRC> nothing really, just chose this network cause anonops isn't stable atm.

22:10 <@uid0> 18:17:27 <AnonDaily> need invite for #antisec here

22:10 <@uid0> 18:17:53 <AnonymousIRC> chan's closed, joe doesn't want it on here

22:10 <@uid0> 18:18:01 <AnonDaily> what are you in

22:10 <@uid0> 18:18:36 <AnonymousIRC> priv comms

22:10 <@uid0> 18:18:49 <AnonDaily> ioerror around?

22:10 <@uid0> 18:19:07 <AnonymousIRC> no

22:10 <@uid0> 18:19:17 <AnonDaily> shti ight, no worries, ill be around

22:12 <~elChe> hm

22:12 <~elChe> thats currently?

22:12 <@uid0> aye

22:12 <~elChe> wondering if its the same troll

22:19 <@uid0> elche: dunno, unlikely

22:19 <@uid0> has 30k+ followers

22:22 <@uid0> 18:21:28 <AnonDaily> wheres youranon

22:22 <@uid0> 18:23:23 <AnonymousIRC> AnonOps I guess

22:22 <@uid0> 18:23:44 <AnonDaily> whats he under

22:22 <@uid0> 18:24:03 <AnonymousIRC> dunno, changes from time to time and not really up to giving away nicknames

22:22 <@uid0> 18:24:14 <AnonDaily> hah nice, thx

22:22 <@uid0> 18:24:50 <AnonymousIRC> No offense, just if you wanna tlak to them you should ask on Twitter. :)

22:22 <@uid0> 18:24:57 <AnonymousIRC> s/tlak/talk

22:22 <@uid0> 18:25:01 <AnonDaily> :) fuck twitt

22:23 <@uid0> 18:25:14 <AnonDaily> that;s just the poster on the wall

22:23 <@uid0> 18:26:33 <AnonymousIRC> Ofc, but that's just what it's supposed to be.

22:23 <@uid0> 18:27:01 <AnonDaily> skids dont understand that

22:26 <&Sabu> lame social engineering

22:27 <@uid0> idd

22:40 <~elChe> lol

22:42 <@uid0> that acc exists since yesterday and has 30k followers...wth oo

22:43 <~elChe> ok

22:43 <~elChe> i think my troll is opnopro

#lulzmas.log

22:43 <@uid0> elChe: Mine is Arturas Rosenbacher.

22:43 <~elChe> hahahaha

22:44 <~elChe> AnonDaily account exist since more time than that

22:44 <~elChe> wait look this guise

22:44 <~elChe> xD

22:44 <@uid0> Maybe he wiped tweets then.

22:45 <~elChe> (23:16) [whidgle!Mibbit@AN-pg8.vna.ucl5h1.IP] if my spanish would be so good that i would be able to make complete sentences i would try to come close to your accent but hmm, i am only able to read it and this "lisp" is cute but cute isnt everything ;)

22:45 <~elChe> (23:27) [whidgle!Mibbit@AN-pg8.vna.ucl5h1.IP] oh, everyday i learn new things ... CITEFA means The Armed Forces Scientific and Technical Research Institute... oha

22:45 <@uid0> elChe: should I do a /msg whidgle protip: elChe is military intelligence!

22:45 <~elChe> thats must be opnopro he s convinced that, cause i use elChe, i must be argentinien

22:46 <~elChe> i google it

23:30 <~elChe> is that Avunit on anonops Avunit Avunit?
23:30 <@uid0> elChe: easy to find out.
23:30 <@uid0> lemme check!
23:31 <~elChe> its on reporter
23:34 <&Sabu> avunit is gone
23:34 <&Sabu> don't trust any fakers
23:34 <~elChe> hm..
23:35 <@uid0> not the real one
23:35 <@uid0> Just same name by accident.
23:35 <@uid0> Doesn't even know "our" Avunit.
23:36 <~elChe> :x
23:36 <&Sabu> he's gone. thats pretty much it
23:36 <@uid0> "Going on holiday...back in 2 weeks" that was the last I read from
him. long long time ago

23:42 <@uid0> that's why I hit you up on Aaron this morning ;)
23:42 <~elChe> lol
23:42 <~elChe> did we post that? with that title?
23:42 <~elChe> XD
23:43 <&Sabu> I did ;)
23:43 <&Sabu> hes a birdcake
23:43 <@uid0> elChe: No, you said "i prefer to avoid comments yet"
23:45 <~elChe> lol yeah but that title is so so..
23:45 <~elChe> ok
23:46 <~elChe> i ll search sabu on to rt at least
23:52 <~elChe> uid0:
23:53 <~elChe> should we tweet about AnonDaily being rosenbacher
23:53 <@uid0> elChe?
23:53 <~elChe> or not?
23:53 <@uid0> elChe: That's no secret. ^^
23:53 <~elChe> to refresh memories about it
23:53 <@uid0> Don't think we should do anything.

13:40 <~elche> hm
13:40 <~elche> ill change to clarify
13:40 <~elche> that users is gid 0
13:41 <~elche> all the shellcode is new
13:42 <~elche> i remplaced those i picked up on internet to save time
13:42 <~elche> all new and working
13:42 <~elche> lol
13:42 <~elche> im talking alone
19:03 <&Sabu> elche
19:03 <&Sabu> your job is to find out who got arrested:
19:03 <&Sabu> 10:51 <x> sup nigger
19:03 <&Sabu> 10:51 <x> 2 new people have been arrested. do you know who?
19:03 <&Sabu> 10:52 <x> keep this down low, its from my lawyers so you cant go
repeating it
19:03 <&Sabu> 10:52 <x> do a roll call check if everyone is ok
19:03 <&Sabu> u/win 19
19:26 <~elche> ?
19:26 <~elche> holyshit
19:26 <&Sabu> jea be on the lookout for anyone missing
19:27 <~elche> who was that?
19:27 <&Sabu> ryan clearly
19:27 <~elche> aproximately
19:27 <~elche> so that was in uk
19:27 <&Sabu> ja
19:27 <~elche> hm
19:27 <&Sabu> I know two people got arrested - x25_princess and abhaxas
19:27 <&Sabu> but why would they tell ryan that?
19:27 <~elche> hm
19:28 <~elche> movl was talking to one of them yesterday
19:28 <~elche> of us*
19:28 <~elche> supposedly hes abhaxas
19:29 <~elche> we need to protect the guise as much as we can
19:30 <&Sabu> ja
19:30 <~elche> they need to step up security and avoid exposing in strange irc
19:30 <&Sabu> our opsec must be strengthened
19:30 <&Sabu> none of speaks of anyting personal in our lives
19:30 <&Sabu> as soon as we do
19:30 <&Sabu> chastize
19:30 <&Sabu> be critical
19:30 <&Sabu> no dates. times. timezones. jobs. careers. girlfriends. nothing
19:31 <~elche> but i understood the guise working actively pretty much know how
cover his asses
19:31 <~elche> i got word they r after ouch and q
19:32 <&Sabu> ja
19:32 <&Sabu> btw
19:32 <~elche> also we need to bring back kayla
19:32 <&Sabu> tis exploits going to fail on a lot of servers because of missing
objdump
19:32 <&Sabu> FILE *command = popen("objdump -d /bin/su|grep '<exit@plt>'|head -n
1|cut -d ' ' -f 1|sed 's/^[0]*\\([\\^0]*\\)/0x\\1/'", "r");

```

```

                                #lulzxmas.log
19:32 <&Sabu> got to do some memory ninjutsu to avoid probs
19:32 <~elche> they can do it and use the -o thingy in those without
19:33 <~elche> do it on local*
19:33 <~elche> ok
19:34 <~elche> tho many servers come with objdump by default
19:34 <~elche> but yeah
19:38 <~elche> Sabu we need to troll as kayla is still around on inner secret
circles, they dont have anything substancial on that. so if ppl got arrested
theres no way they proved implicaton 'beyond any doubt'
19:41 <&Sabu> tats fine
19:41 <&Sabu> we should be able to write like her
19:41 <~elche> i can
19:41 <&Sabu> what would win=if we could get her twitter
19:42 <~elche> tho not needed to put kayla everywhere
19:42 <~elche> she never talked too much on public chans anyway
19:42 <&Sabu> mhm
19:43 <~elche> ok the shell is back and i took the rest of files
19:43 <~elche> i ll look into there later
19:43 <&Sabu> which?
19:44 <&Sabu> your box/
19:44 <~elche> if we get the vmsplICE working..
19:44 <~elche> no the brazilina govt
19:44 <~elche> they have 22 and password enabled
19:44 <~elche> no more sec options
19:44 <~elche> if we put user on passwd and shadw
19:45 <~elche> we got it
20:14 <&Sabu> mm
20:17 <~elche> 5
